Rezoning #2025-00005 Special Use Permit #2025-00049 Encroachment #2025-00006 601 Wythe Street – Office to Residential Conversion

Application	Ger	neral Data
Request: Public Hearing and consideration of a request for (A) a Rezoning from CD-X/Commercial Downtown Zone (Old Town North) to CRMU-X/Commercial	Planning Commission Hearing:	October 9, 2025
Residential Mixed Use (Old Town North) zone; (B) a Special Use Permit for a multi-unit dwelling use; and (C) an Encroachment into the public right-of-way for upper floor balconies, street-level bollards, a permanent planter, and walls.	City Council Hearing:	October 18, 2025
Address: 601 Wythe Street	Zone:	Existing: CD-X/Commercial Downtown Zone (Old Town North) Proposed: CRMU-X/Commercial- Residential-Mixed-Use (Old Town North) zone
Applicant: 601 Wythe Street LLC represented by Kenneth Wire, attorney	Small Area Plan:	Old Town North

Staff Recommendation: APPROVAL

Staff Reviewers: Tony LaColla, AICP, anthony.lacolla@alexandriava.gov

Sam Shelby, sam.shelby@alexandriava.gov

<u>PLANNING COMMISSION ACTION, OCTOBER 9, 2025</u>: On a motion made by Vice Chair Koenig, seconded by Commissioner Manor, the Planning Commission moved to recommend approval of REZ #2025-0005. The motion carried on a motion of 7 to 0.

On a second motion made by Vice Chair Koenig, also seconded by Commissioner Manor, the Planning Commission moved to recommend approval of SUP #2025-0049. The motion carried on a motion of 7 to 0.

On a third motion made by Vice Chair Koenig, seconded by Commissioner Lennihan, the Planning Commission moved to recommend approval of ENC #2025-0006. The motion carried on a motion of 7 to 0.

Reason: The Planning Commission agreed with staff's analysis and recommendation.

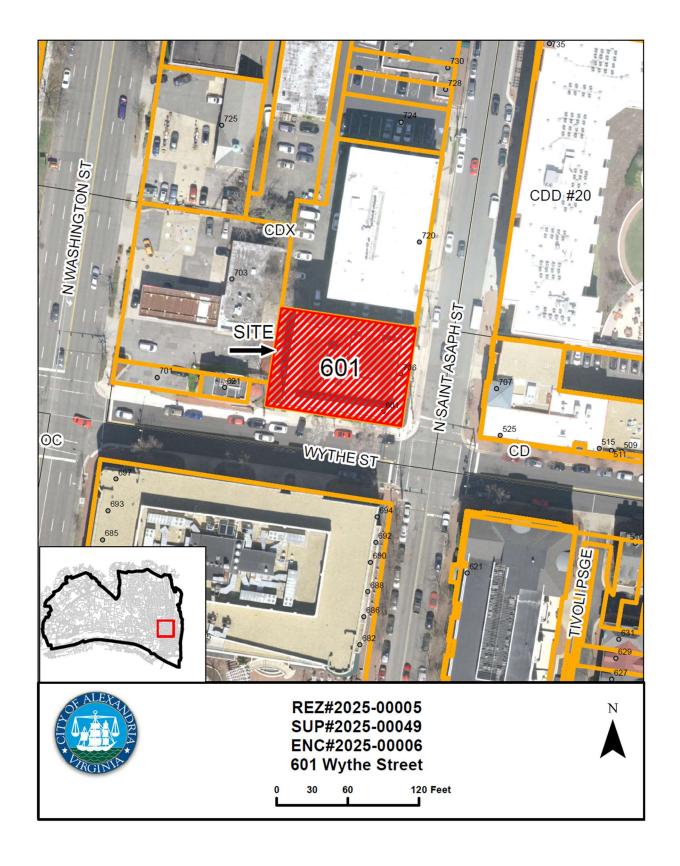

Discussion:

Commissioners Ramirez and Brown spoke in support of the request. Vice Chair Koenig clarified with staff that the building would continue to be considered noncomplying. Chair McMahon spoke in support of the request and expressed appreciation for the applicant to endure the complexity of the approval process.

Speakers:

Melissa Kuennen, Vice President of North Old Town Independent Citizens' Association, spoke in support of the conversion and the proposed architectural changes.

Ken Wire, attorney, acknowledged the complexity of the approval process for the project but thanked staff for working out a solution.

I. PROJECT SUMMARY

The applicant, 601 Wythe Street LLC, represented by Kenneth Wire attorney, requests:

- (A) a rezoning from CD-X/Commercial Downtown Zone (Old Town North)
 - to CRMU-X/Commercial Residential Mixed Use (Old Town North) Zone,
- (B) a special use permit (SUP) for a multi-unit dwelling use, and
- (C) an **encroachment** into the public right-of-way for proposed upper floor balconies and other street level structures: bollards, a permanent landscaping planter box, and low walls.

These approvals would allow an office-to-residential conversion of the existing building at 601 Wythe Street. The applicant proposes 18 dwelling units each with access to private and shared open space and off-street parking in the building's garage.

Staff **recommends approval** of all three requests as they generally meet all applicable criteria and are consistent with the City's planning goals and strategies for office to residential conversions as envisioned in the Old Town North Small Area Plan (SAP).

II. SITE DESCRIPTION AND CONTEXT

The subject property is a 9,748 square-foot lot at the northwest corner of the intersection of Wythe and North Saint Asaph Streets. A five-story office building, constructed in 1986, with a 70-space parking garage occupies the lot. The building has 34,160 square feet of floor area, which based on the lot size, results in a 3.5 Floor Area Ratio (FAR). As measured to the top of its rooftop decorative screening, the building is 64 feet tall. No additions or significant alterations have been made to the exterior of the building since construction in 1986. Previously, bollards, a brick landscaping planter box, a retaining wall, and a light pole were installed at various locations in the public right-of-way (ROW) immediately in front of the subject property along both streets.

The building occupies almost the entire site but provides space for a narrow strip of landscaping between the building and the sidewalk along both its frontages. Each frontage also provides access to the building's multi-level parking garage. Figures one through three, below show the front of the building as viewed at the intersection and from Wythe and North Saint Asaph Streets.

Figure 1 – Subject property as viewed from opposite corner of Wythe and North Saint Asaph Streets

Figure 2 – N. St. Asaph St. elevation showing garage access to below-grade parking levels

Figure 3 – Wythe St. elevation showing building's main entrance and garage acess to lobby-level parking

The subject property is surrounded by a wide mix of uses including a gas station, restaurant, residences, offices, and retail (see figure four, below). The adjacent building at 720 North Saint Asaph Street, immediately next to the subject property, is undergoing an office-to-residential conversion that was approved by City Council in December 2023. Due to its proximity to Washington Street, the subject property is within the Old and Historic Alexandria District (OHAD).

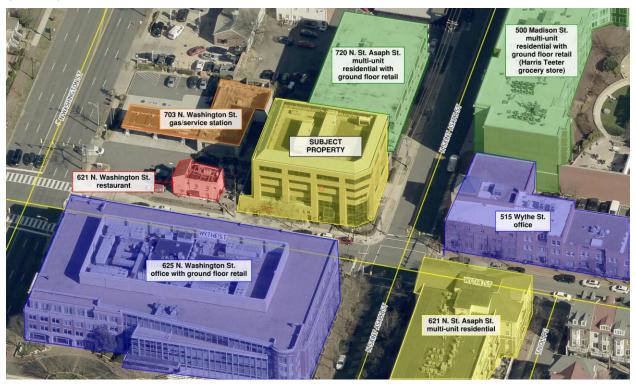

Figure 4 – Surrounding buildings/uses

III.BACKGROUND

EXISTING BUILDING

The subject property's five-story building was developed pursuant to Site Plans #1984-0003 and #1984-0004. The approvals allowed a building with a maximum height of 64 feet, a 2.97 FAR, and a floor area of 24,130 square feet. At the time of approval, the property was zoned C-2/Commercial which allowed a maximum FAR and height of 3.0 and 150 feet, respectively.

ZONING HISTORY

In 1992, the subject property was rezoned to CD-X/Commercial Downtown Zone (Old Town North) as part of a comprehensive City-wide zoning update, and the C-2/Commercial zone was deleted from the Zoning Ordinance. The new CD-X zone allowed a maximum 1.5 FAR for nonresidential uses. Given that the existing building provided a 2.97 FAR, it became a noncomplying structure with the 1992 rezoning. Noncomplying structures may remain indefinitely subject to Zoning Ordinance section 12-100.

Between 1992 and now, City Council has approved several Zoning Ordinance amendments that change how floor area is calculated. Prior to these amendments, portions of the existing building with a ceiling height of less than 7.5 feet could be excluded from floor area. These areas are no

longer eligible for exclusion. As a result of these amendments, the subject property's FAR increased from 2.97 to 3.5.

The building is still classified as a legal noncomplying structure and can remain indefinitely.

NONCOMPLYING STRUCTURE LIMITATIONS

Generally, any permitted use (or use that receives SUP approval) can occupy a noncomplying structure provided that it meets all applicable requirements. As an example, in the CD-X zone, residential buildings must provide side setbacks while nonresidential buildings are exempt from setback requirements. Given that the existing nonresidential building provides no setbacks, and the change in use would trigger the CD-X zone's residential requirements, a residential use would not be permitted without approved modifications from setback requirements.

Further, the CD-X zone permits a lower maximum FAR for residential uses (1.25) than it does nonresidential uses (1.5). As a residential building, the subject property would be more out of compliance with maximum permitted FAR and would therefore not be permitted.

IV. SMALL AREA PLAN

The subject property is located within Subarea Four (Mixed Use Core) of the Old Town North Small Area Plan (SAP) chapter of the City's Master Plan. Subarea Four, as the name suggests, strongly encourages a robust mix of uses (residential, retail, and office) within its boundaries. North Saint Asaph Street, from Wythe to Montgomery is designated as one of the SAP's required retail or arts and cultural uses corridors. Along these corridors, new buildings must provide ground floor retail or arts and cultural uses. The applicant's proposal would be exempt from this requirement because only redevelopment sites must provide ground floor retail or arts and cultural uses.

The SAP does not identify the subject property as a potential redevelopment site nor does it provide specific rezoning recommendations. It acknowledges that office-to-residential conversions could occur in Old Town North given nationwide office-to-residential trends, current market conditions., and its inventory of aging office buildings. The SAP states that sites like the subject property would likely be conversion candidates given the age of the existing building and its smaller footprint.

V. PROJECT DESCRIPTION AND REQUIREMENTS

The applicant proposes to convert the subject property's existing office building to a residential use with 18 dwelling units. There would be no changes to the building's footprint, height, or overall floor area. The applicant proposes minor exterior improvements including façade refinements, balconies, and rooftop access via stair penthouses. Open space for residents would be provided on the roof and an existing west-facing balcony. Many units would also have individual balconies. To accomplish the conversion, the applicant has requested a rezoning from CD-X to CRMU-X, an SUP for a multi-unit dwelling use, and an encroachment for the upper-level balconies and other street level structures: bollards, a brick landscaping planter box, and a retaining wall.

ZONING CONSTRAINTS

As established in Section II, the existing CD-X zone would not permit residential use of the subject property due to two primary constraints: 1) 32-foot west and north side setbacks would be required

and the building provides no setbacks on these sides, and 2) the FAR limit for residential uses (being lower than that permitted for nonresidential uses) would increase the building's FAR noncompliance.

PROPOSED ZONING

The applicant requests a rezoning to CRMU-X. This zone does not require setbacks for residential uses. It also allows a higher FAR for residential uses than it does nonresidential. The CRMU-X zone is one of very few which requires SUP approval for multi-unit dwellings. Because the proposed zone would not require side yards for the proposed residential use nor would it increase the building's FAR noncompliance, the proposal would free the subject property from the zoning constraints established by the CD-X zone (and discussed in the previous section). Therefore, the proposal would be permitted with rezoning and SUP approval.

PARKING

The Zoning Ordinance would require a total of 24 off-street parking spaces for the proposed residential use. Up to 18 spaces (75 percent of the total requirement) of these spaces may be compact. The existing garage provides 15 standard and 55 compact spaces. The applicant proposes setting aside at least 24 spaces (six standard, 18 compact) for the proposed residential use. The remainder of the spaces above the minimum required for the proposed residential use may remain without SUP approval pursuant to Zoning Ordinance section 8-200(F)(6). The applicant would make these additional spaces generally available to visitors to the neighborhood.

HISTORIC PRESERVATION

As stated in Section I, the subject property is located within the Old and Historic Alexandria District. Nearly all exterior alterations to the building will require review and approval by the Board of Architectural Review (BAR).

ENCROACHMENTS

Bollards, a brick landscaping planter box, a retaining wall, and a light pole are currently located in the public right-of-way adjacent to the property. See figure 5, below. There is no record of these having received encroachment approval. The applicant requests after-the-fact approval for all of the existing encroachments except the light pole. The light pole would be removed or a future encroachment approval would be sought prior to issuance of the Certificate of Occupancy.

Rezoning #2025-0005, Special Use Permit #2025-0049, & Encroachment #2025-0006 601 Wythe Street

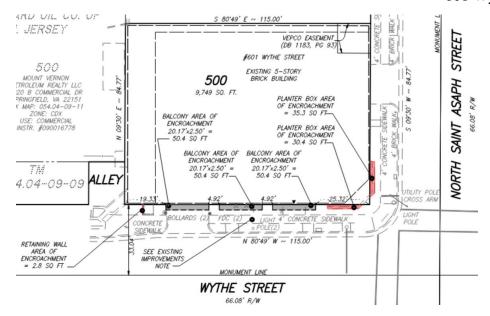

Figure 5 – Existing encroachments

ZONING TABLE

The table below summarizes all zoning regulations applicable to the request.

	Existing	Permitted/Required (CD-X)	Permitted/Required (CRMU-X)	Proposed
FAR	3.5 (34,160 sq. ft.)	Nonresidential: 1.5 (14,624 sq. ft.) Residential: 1.25 (12,186 sq. ft.)	Nonresidential: 1.5 (14,624 sq. ft.) Residential: 2.5 (24,373 sq. ft.)	No change

Side Yard (North)	0 Ft.	Nonresidential: None Residential: 32 Ft.	
Parking	70 spaces (55 standard, 15 compact)	Nonresidential: 9 spaces (minimum) 103 spaces (maximum) Residential: 24 spaces (up to 6 compact)	

VI. STAFF ANALYSIS

Staff recommends approval of the applicant's requests. The proposed adaptive reuse proposal merits approval because it advances SAP goals for office-to-residential conversions while reducing the building's FAR noncompliance. The project would likely have lower impacts than the existing office use and would maintain neighborhood character through preservation of the existing building envelope. Further analysis follows.

REZONING CONSIDERATIONS

Staff recommends approval of the applicant's rezoning request as it would be consistent with SAP.

Appropriateness of CRMU-X zone

The proposed CRMU-X zone would uphold the SAP's land use goals for Subarea 4. This subarea, Old Town North's "mixed-use core," already contains numerous properties zoned CRMU-X including property immediately adjacent to the subject site. The SAP establishes cohesive land use goals for the subarea despite mixed zoning designation. Both the existing CD-X zone and CRMU-X zone exist within the subarea which indicates that both zones would be suitable for achieving and maintaining the desired mixed-use character envisioned by the SAP.

Noncomplying Status

As previously stated, unlike the CD-X zone, the CRMU-X zone doesn't require setbacks for residential uses. Given this, the zone would be appropriate for the subject property given that the existing building doesn't provide setbacks. Under the existing CD-X zone, modifications would be required from setback requirements to allow a residential use.

No zones in the existing Zoning Ordinance would both: (1) be consistent with the SAP and (2) make the proposal comply with FAR requirements even with all available density bonus pathways. The proposed CRMU-X zone would reduce the existing FAR noncompliance from 2.0 to 1.0 or from 19,536 to 9,787 square feet. As such, the proposed rezoning would significantly reduce FAR noncompliance.

The building would remain a noncomplying structure and would continue to be subject to 12-100.

Mix of Uses

The subject property is located between two grocery stores (Harris Teeter and Trader Joe's) and is surrounded by a mix of residences, offices, and retail. The SAP states that "...to provide a balance of residents and employees, approximately two to three times more residential than office square footage is necessary." Given the large amount of office square footage in the buildings adjacent to the subject property, the proposal would add residential square footage that would achieve a mix of office and residential uses closer to the ratio envisioned by the SAP.

Office-to-Residential Conversions

As stated in Section I, the SAP predicts several office-to-residential conversions within Old Town North. The existing building has characteristics that the SAP envisions would make it an appropriate conversion candidate. The SAP encourages "...innovative housing solutions such as... building conversions." Given that the office-to-residential conversion of the subject property would not disrupt the mix of uses in the area, it has characteristics that make it an appropriate conversion candidate, and that such conversions are encouraged to increase housing supply, the proposed conversion would advance the SAP's goals.

SUP CONSIDERATIONS

Use Intensity and Anticipated Impacts

Staff recommends approval of the SUP request for a multi-unit dwelling use because all required criteria would be met. The proposed multi-unit use would represent a reduction in use intensity as compared to the existing office use. As a frame of reference, the existing office building can accommodate up to approximately 260 employees. The proposed residential use, based on the proposed total number of bedrooms (32) could accommodate approximately 60 residents. Given that the residential use would likely result in a fewer number of building occupants than the existing office use, staff expects little impact to the surrounding neighborhood. The anticipated lower occupancy would likely translate to fewer peak-hour vehicular trips than the existing office use. The building also provides parking spaces in excess of the minimum required for residential use so staff anticipates little impact to traffic or surrounding on-street parking availability.

Future residents would be present on nights and weekends when offices are typically closed but this would be an asset to the neighborhood and would increase consistency with the SAP as it would increase pedestrian activity levels in the SAP's "mixed-use core."

Building Size and Function

The proposal would be compatible with neighborhood character as the existing building would be preserved at its current size, height, and masing. The applicant proposes façade refinements that would make the building design more compatible with the newer and newly-renovated buildings that surround it. The proposed rooftop improvements would likely be minimally visible from the street level and therefore would not impact visual compatibility.

The building would provide rooftop open space and balconies for residents' use. These areas would serve as functional and usable outdoor space, ensuring that residents would have access to fresh air and sunlight. The large balcony on the west side of the building would provide shared outdoor recreational space.

Staff has also included Condition #2, which would ensure that the applicant reduces impacts from the noise of the surrounding neighborhood on future residents.

ENCROACHMENT CONSIDERATIONS

Staff recommends approval of the encroachment requests for both the proposed and existing elements as they provide community benefits without impeding public ROW function. The request would bring the existing street-level elements into compliance with the City Code. The proposed upper-level balconies would provide essential outdoor space for residents and are positioned well above street level, ensuring no interference with existing sidewalk usability or building access. The existing street-level improvements have operated without issue for decades and provide important functions. The landscaping planters enhance street-level aesthetics, while the bollards adjacent to the garage entrance on Wythe Street protect both the building and ground-level landscaping from vehicle damage. The applicant intends to remove the light pole in the ROW or seek separate encroachment approval at a later date. None of these encroachments impact the ability for pedestrians or vehicles to utilize the right-of-way as intended. Staff has included standard encroachment conditions to ensure ongoing compliance with City Code requirements while preserving the City's flexibility for future right-of-way improvements if needed.

VII. VOLUNTARY HOUSING CONTRIBUTION

Staff found that the <u>2020/21 Housing Contributions Policy Update's</u> commercial to residential conversion guidance as the appropriate approach to determining the voluntary affordable housing contribution for this project. Based on the 2025 commercial to residential conversion rate of \$1.83 per net square foot, staff estimate a voluntary monetary contribution of \$49,620. The applicant has volunteered an additional \$45,380 contribution for a total voluntary contribution of \$95,000.

To achieve zoning compliance, secure on-site units, and estimate a voluntary monetary contribution, staff analyzed several policy approaches including 1) applying the 2020/21 Commercial to Residential Conversion voluntary monetary contribution policy (the recommended approach); 2) applying the 2020/21 Rezoning Housing Contribution Policy Update; and 3) applying Section 7-700. The Rezoning policy only applies for cases where the SAP envisions a lower FAR than what's proposed. Given that the Old Town North SAP doesn't establish specific FAR nor identify the subject property as redevelopment site, the Rezoning policy would not be appropriate. Section 7-700 would also not achieve FAR compliance. Given this and the scale of the project, staff does not recommend this approach either.

The subject property proposes converting 27,115 square feet of commercial floor area, as defined by Section 2-145(B), to residential uses and retaining 7,045 square feet of existing parking floor area, totaling 34,160 square feet. Applying the 2020/21 Policy Update's commercial to residential conversion rate, which considers only floor area that is converted from commercial to residential, staff multiplied 27,115 square feet by a factor of \$1.83/ square foot (2025 commercial to residential rate) to estimate a voluntary monetary contribution of \$49,620 to the City's Housing Trust Fund. Including the applicant's additional contribution, the total voluntary contribution would be \$95,000. Staff has included Condition #3 which recommends that the voluntary contribution be made prior to City issuance of the certificate of occupancy.

VIII. RECOMMENDED CONDITIONS

Staff recommends **approval** subject to compliance with all applicable codes and ordinances and the following conditions:

- 1. The applicant shall install STC 28, or better, rated windows and doors in all locations associated with residential units for noise mitigation. (T&ES)
- 2. Prior to the issuance of the Certificate of Occupancy, contribute \$95,000 to the City's Housing Trust Fund. Make out all payments to the City of Alexandria and submit them to the Office of Housing with a cover letter to include the project name, case number, and explanation of the contribution amount, if phased. (P&Z)
- 3. The owner shall obtain and maintain an encroachment permit and policy of general liability insurance in compliance with the permit requirements in § 5-2-29(a)(3). (T&ES)
- 4. Neither the City nor any private utility company will be held responsible for damage to the approved encroachments arising from the repair, maintenance, or replacement of any utilities that may exist within the area of the approved encroachments. (T&ES)
- 5. If the City in the future needs the encroachment area, then the applicant shall remove any structure that encroached into the public right-of-way within 60 days upon written notification. If a longer period of time for removal is required, written permission of the City must be obtained. (T&ES)
- 6. The applicant is responsible for replacement and repairs to adjacent public right-of-way including damages due to construction or maintenance of the encroaching elements. (T&ES)
- 7. Within the encroachment areas identified in the metes and bounds exhibit, the applicant may not erect any additional equipment or structures or enlarge or intensify any existing equipment or structures shall without prior approval of the Directors of P&Z and T&ES. No administrative changes may be made after approval of the encroachment ordinance. (P&Z)

JUSTIFICATION FOR AMENDMENT (attach separate sheets if needed)

- surrounding properties, in character with the applicable Small Area Plan and consistent with City policies:

 The proposal is desirable and beneficial, consistent with City policies and in character with the Old Town North Small Area Plan because it creates homes for new residents, reduces obsolete office space, supports cultural and retail activity and brings new investment into the neighborhood in an environmentally sustainable way that also substantially increases the City's tax base.
- **2.** Explain how and why the proposed amendment to the Zoning Map(s) is consistent with the proposed amendment to the Master Plan, or, if no amendment to the Master Plan is being requested, how the proposed zoning map amendment is consistent with the existing Master Plan:
 - The property is in "Mixed Use Core" area of the Old Town North Small Area Plan. Changing the zoning from the commercial CDX to mixed-use CRMU-X advanced the Old Town North Small Area Plan's goals by increasing new housing, reducing outdated office inventory, and increasing the mix of uses in the neighborhood.
- **3.** Explain how the property proposed for reclassification will be served adequately by essential public facilities and services such as highways, streets, parking spaces, police and fire, drainage structures, refuse disposal, water and sewers, and schools.
 - The project does not expand the building and would reuse existing utilities and public infrastructure, subject to city review. It also frees up existing parking spaces in the building making them available for public parking.
- 4. If this application is for conditional zoning approval pursuant to Section 11-804 of the Zoning Ordinance, identify all proffered conditions that are to be considered part of this application (see Zoning Ordinance Section 11-804 for restrictions on conditional zoning):
 - See attached SUP application for residential use.

9 October 2025

Members of the Alexandria Planning Commission,

As the Alexandria leadership team for YIMBYs of Northern Virginia, we are excited to see three significant housing developments on today's docket, and we ask you to vote yes on all of them. Together, these developments will add **473** desperately needed new homes to Alexandria.

Docket item 2, the Braddock West development, will add 180 new homes across the street from the Metro station, including 14 committed affordable homes. In addition to adding much-needed homes and retail space near transit, the development will benefit its neighbors by significantly improving stormwater management and adding a new mid-block crossing to the station.

Docket item 5, West End Block D, will add 275 new homes amid the jobs and opportunities coming to the former Landmark Mall site. This development will help meet the growing demand for housing and ensure that middle-income Alexandrians have the opportunity to live and thrive in our city's newest neighborhood

Docket item 6, 601 Wythe Street, will convert an aging office building to 18 new homes in Old Town North. It's exciting to see Alexandria continuing to lead in office-to-residential conversion, and this development will turn more of our underutilized 1980s office building stock into opportunities to live in our city. It's worth noting that a Special Use Permit is required to build a residential building in the CRMU-X zone. A residential building in a residential zone should not be considered a special use. We hope you will consider removing this requirement, and more broadly, simplifying our zones so that housing is legal everywhere in Alexandria.

We also would like to note that two of the developments on today's docket require a Special Use Permit for a parking reduction – including the one that is across the street from a Metro station. In fact, of the 34 apartment and condo developments approved from 2022 to now, 18 of them (more than half) required a SUP for a parking reduction. We hope you will consider legalizing parking flexibility by eliminating the current mandates, so that property owners can assess the unique conditions of each location to determine how many parking spaces are actually needed to rent or sell homes.

We hope Alexandria will continue to welcome new homes of all types, all price points, and in all parts of our city to address our regional housing crisis and make our city better for everyone.

Phoebe Coy, Alex Goyette, Peter Sutherland, Stephanie Elms and Yasir Nagi YIMBYs of Northern Virginia Alexandria leads

[EXTERNAL]Comments on upcoming docket Oct 9

From Ian Smith <gm.smithir@gmail.com>

Date Tue 10/7/2025 11:45 PM

To PlanComm < PlanComm@alexandriava.gov>

You don't often get email from gm.smithir@gmail.com. Learn why this is important

Hello,

My name is Ian Smith and I am a resident of Alexandria in the Rosemont neighborhood.

I am writing in support of three docket items in the upcoming planning commission vote this week.

Docket item 2, The Braddock West development: This is a no-brainer development which is right next to a metro station on an empty field, and involves upgrades to reduce flooding.

Docket item 5, West End Block D: This is a great project in the context of the upcoming Landmark redevelopment and will help address shortages citywide and provide designated affordable units to those who need it.

Docket item 6, 601 N Wythe St: I am excited by the prospect of more office-to-housing conversions especially with the high office vacancy rates citywide!

Thank you!

[EXTERNAL] Writing in Support of Docket items 2, 5, and 6

From Todd Perry <toddperry99@gmail.com>Date Wed 10/8/2025 1:39 PMTo PlanComm <PlanComm@alexandriava.gov>

You don't often get email from toddperry99@gmail.com. <u>Learn why this is important</u>

Good afternoon,

My name is Todd Perry, and I am a young renter in Alexandria who lives next to the Braddock Road metro station. I am writing this email to express my support for docket items 2, 5, and 6 for the planning commission's October 9 meeting. In my neighborhood, even a studio apartment regularly rents for \$2,000 or more. While I love living here, I am not sure if I can afford the rent in the long term. Because of this, I am strongly in favor of these projects which will add much needed additional market rate and affordable housing for people who want to live in our wonderful community. In particular, I strongly support the Braddock West Development (which will be across the street from where I live) as it will provide more housing options for me and other residents and put downward pressure on rents! In conclusion, I support these docket items because I want Alexandria to be a place where people of all income levels can live comfortably!

Regards,

Todd Perry
