2. Background
3. Additional Context
4. Key Takeaways
5. Outreach
6. Discussion and Recommendation

Summary

Request

- Approval of text amendments to revise Sections of Article XIII to align with State-mandated Chesapeake Bay Preservation Act resiliency provisions.

Council Action

- Approve proposed amendments to Article XIII to incorporate these requirements.

Key Elements of the Discussion

- Brings local zoning ordinance into compliance with 2020–2021 State law changes.
- Integrates analysis of 30-year storm surge, flooding, and sea level rise modeling into Resource Protection Area (RPA) review.
- Adds definitions, resiliency assessment requirements, and clarifies adaptation measure requirements, if applicable.

Background Information

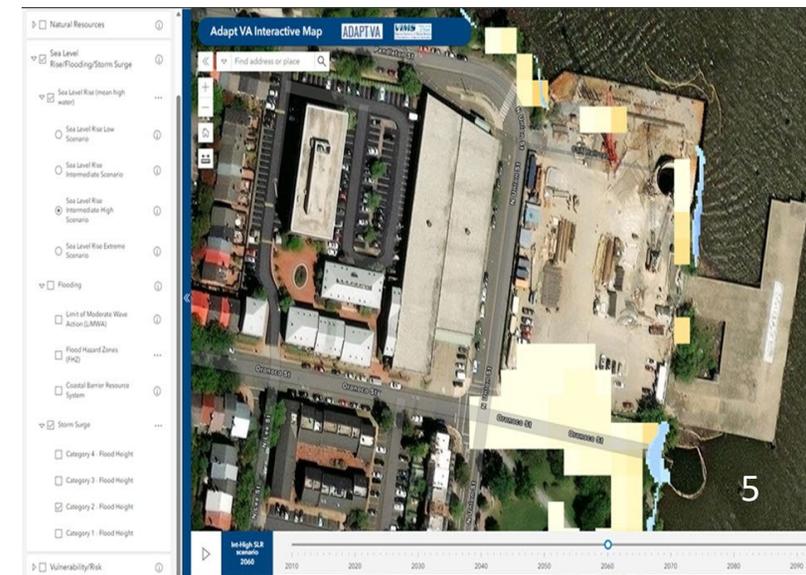

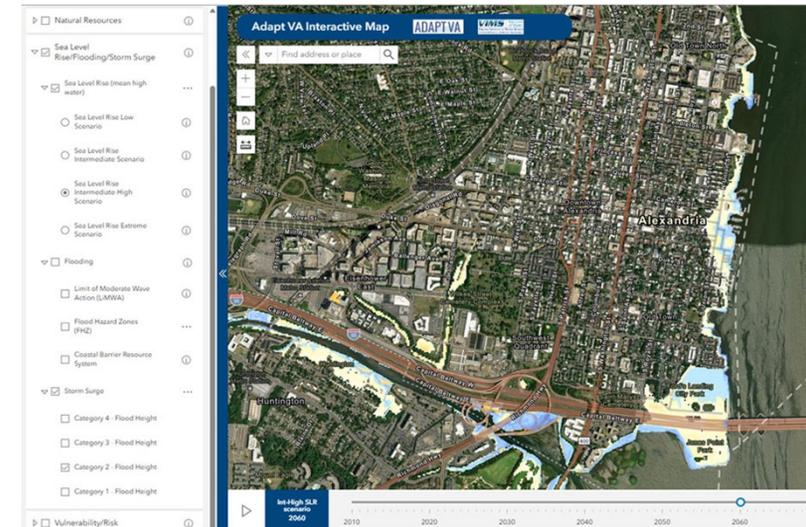

- **State law now requires changes to address climate adaptation for development and redevelopment in an RPA.**
- **Developer must use state-approved models for sea level rise and storm surges to assess vulnerability of future risk on a 30-year time horizon.**
- **If assessed as vulnerable, adaptation measures may be required in the RPA.**

Additional Context

- **Sec. 13-103 Definitions.** Adaptation Measures, Mature Trees, Nature-based solution, Storm Surge.
- **Sec. 13-107 Development, redevelop, and uses permitted in RPA.** New section with adaptation measures now allowed in the RPA.
- **Sec. 13-117 Water quality impact assessment.** Must include resiliency assessment and adaptation measures, if applicable, in the Water Quality Impact Assessment (WQIA).
