**Staff Recommendation:** APPROVAL subject to compliance with all applicable codes and ordinances and the recommended permit conditions found in Section III of this report.

**Staff Reviewers:** Catie McDonald, [catherine.mcdonald@alexandriava.gov](mailto:catherine.mcdonald@alexandriava.gov)  
 Sam Shelby, [sam.shelby@alexandriava.gov](mailto:sam.shelby@alexandriava.gov)

**PLANNING COMMISSION ACTION, DECEMBER 3, 2024:** On a motion by Commissioner Brown, seconded by Vice Chair McMahon, the Planning Commission moved to approve SUB #2024-00013. The motion carried on a vote of 7 to 0.

**Reason:** The Planning Commission agreed with staff analysis.

**Discussion:**  
 Commissioner Brown expressed hesitations with subdivisions that create lots that do not meet all lot requirements. He was concerned about the applicant or future owners seeking side yard variance approvals and justifying these requests based on the lot's narrowness. Commissioner Brown felt that it would be appropriate to include a condition precluding the applicant or future owners of the property from seeking such a variance.

**Speakers:**  
 Duncan Blair, attorney representing the applicant, answered questions from Commissioner Brown. He also referenced the staff report associated with Zoning Text Amendment #2009-0004, approved by City Council on January 23, 2010. Mr. Blair found that the staff report provided useful background information on the subdivision variation procedure.

**I. DISCUSSION**

The applicant, SW Development Company, requests approval for a subdivision with a variation to subdivide one existing lot into two lots.

SITE DESCRIPTION

The subject property, featured in Figure 1, below, contains one irregularly shaped lot of record located at 1210 Janney's Lane. It is an interior lot that measures 41,108 square feet in lot size and 168.57 feet in both lot width and frontage. Single-unit dwellings surround the subject property and Douglas MacArthur Elementary School is down the street. A single-unit dwelling currently occupies the subject property.

*Figure 1 – Subject property (outlined in blue)*

PROPERTY HISTORY

The subject property was created in 1936. The original subdivision area was created in 1934 (see Figure 2, below).

*Figure 2 – Original subdivision area in black, subject property in red*

PROPOSAL

The applicant proposes to re-subdivide the lots into two lots. Proposed Lots 600 and 601 would meet the minimum lot size (20,000 sq. ft.) and lot frontage (75 ft.) requirements of the R-20 zone

but neither would meet the minimum lot width (100 ft.) requirement of the R-20 zone. Because of this, the applicant must request a subdivision with variations for lot width for Proposed Lots 600 and 601. The existing subject property and the proposed lots are portrayed below in Figures 3 and 4, respectively.

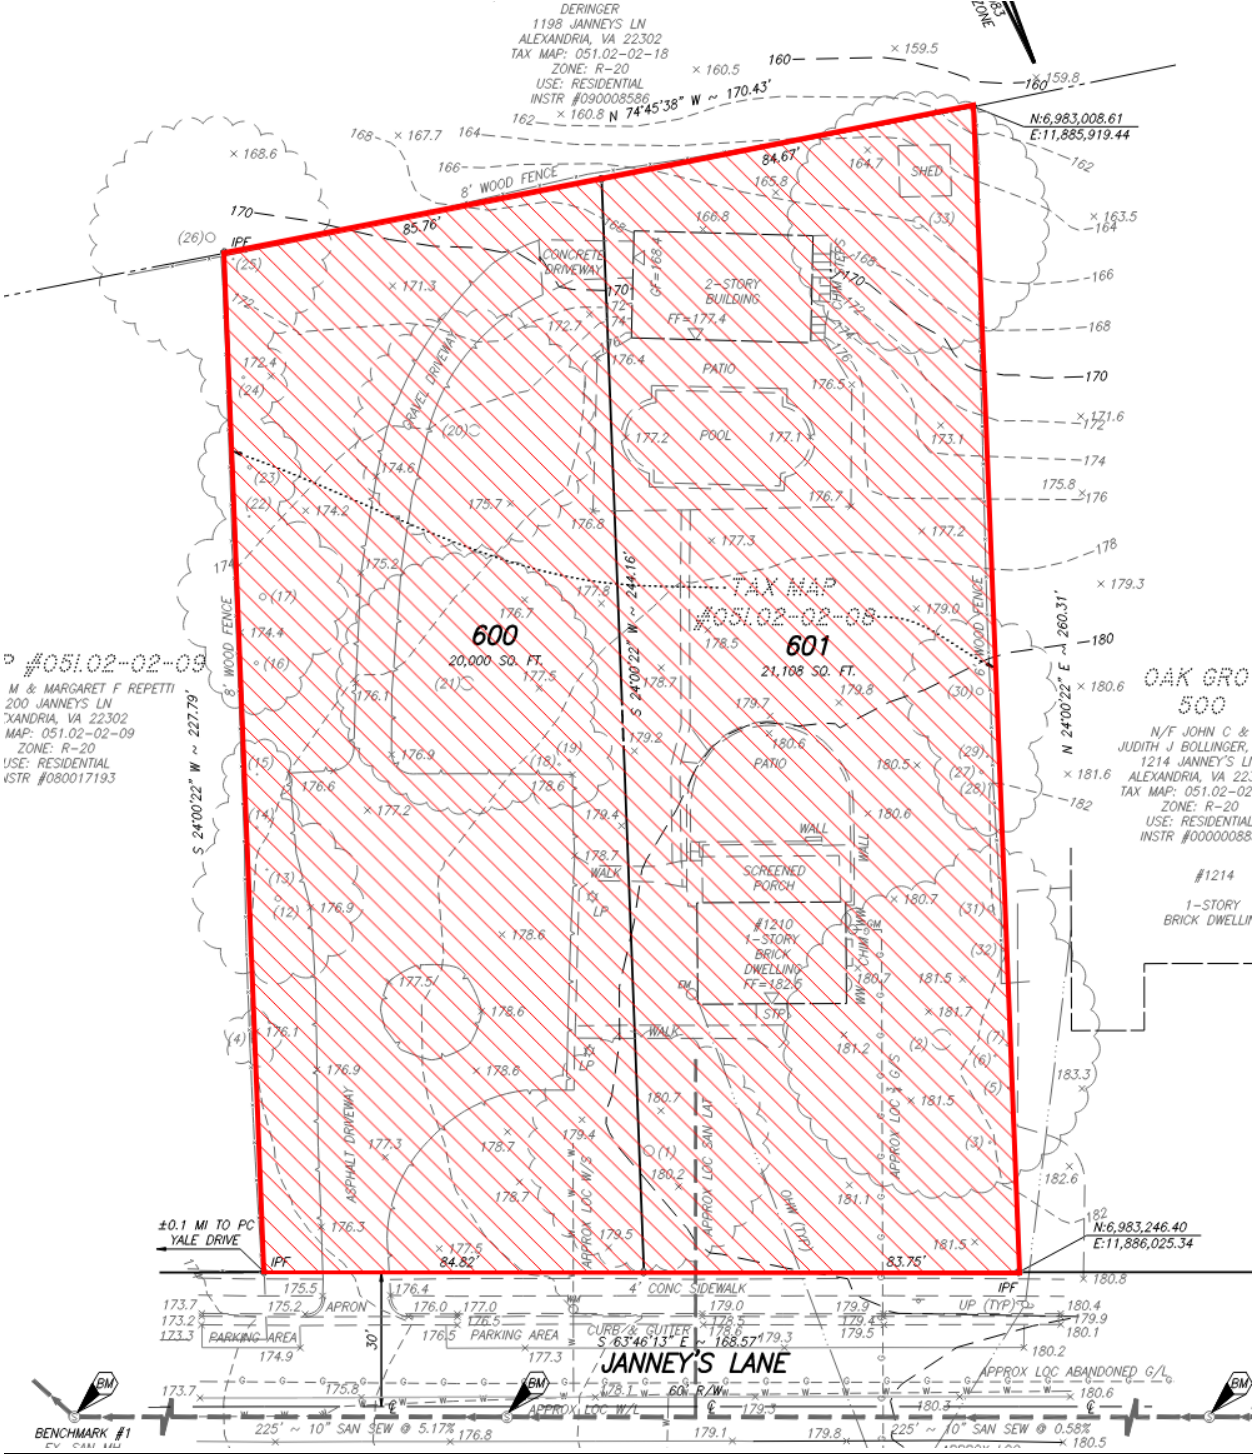

Figure 3 – Subject Property at 1210 Janney's Lane

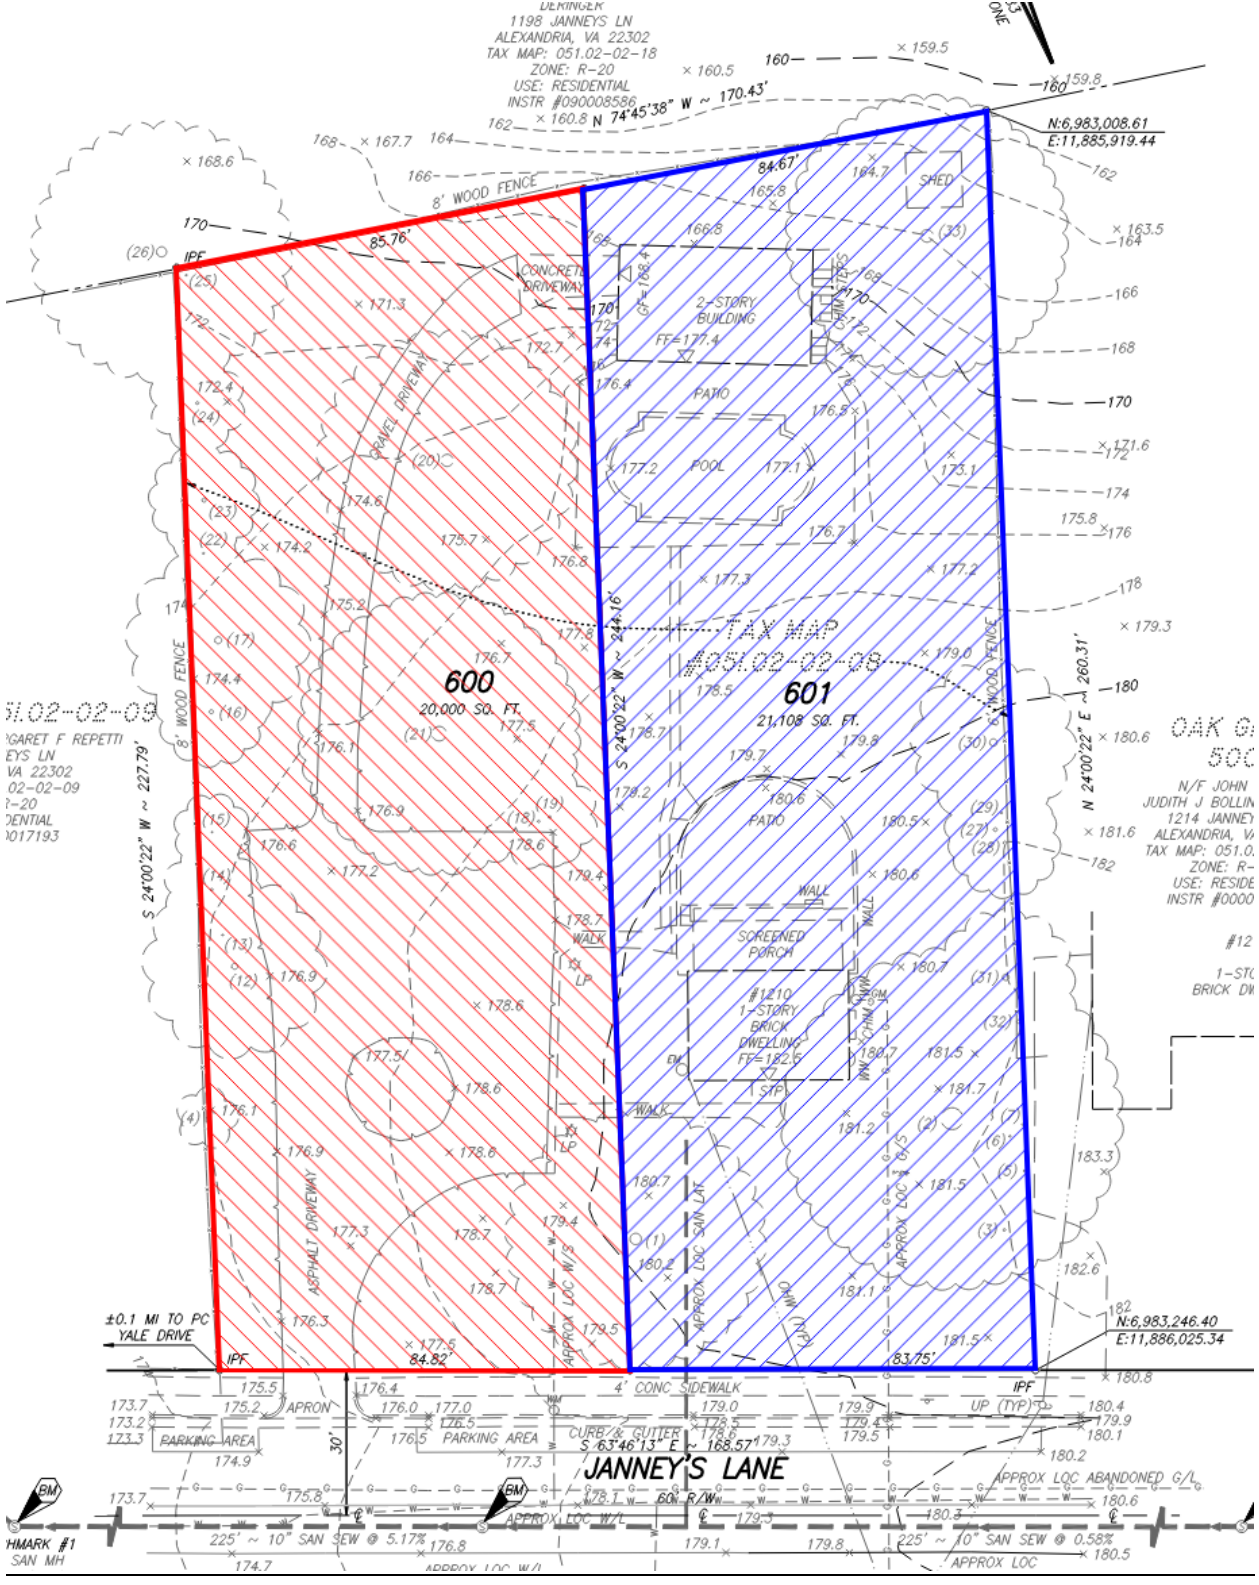

Figure 4 – Proposed Lots 600 and 601

ZONING/MASTER PLAN DESIGNATION

The subject property is zoned R-20 Residential. Proposed Lots 600 and 601 would not meet the R-20 zone's minimum lot width required for single-unit dwellings.

The Planning Commission may only approve a subdivision that would create lots with insufficient lot width if they also approve a variation from this requirement. Zoning Ordinance section 11-1713 establishes the variation procedure and criteria as follows:

- (A) The commission may, by vote of a majority of its members, authorize specific variations from the provisions of this section 11-1700, when the commission finds that
  - (i) strict adherence to such provisions would result in substantial injustice
  - (ii) the use and character of the resulting lots or parcels in such a subdivision would not be inconsistent with the use provisions of the zone in which the property is situated and with the existing development in the immediate area; and
  - (iii) one or more of the following special circumstances exists:
    - (1) Extremely rugged topography.
    - (2) Irregularity in shape of parcel preventing conformance with normal lot area or frontage requirements.
    - (3) Insufficient frontage on existing street where the interior of the tract can be served only by a street substandard in width when not serving more than five lots, provided the street is not less than 30 feet in width. If only a single lot is served, the width may be less than 30 feet. A turn around area may be required.
    - (4) Streets along border of the subdivision where the subdivision borders on unsubdivided land and the remaining street width will be provided from adjacent land.
    - (5) Resubdivision of lots in subdivisions of record as of January 1, 1952, where, because of existing structures or gross area of land involved, the subdivided lots would not conform to all of the requirements of the zone in which the subdivision is located.
- (B) As used in this section, "substantial injustice" means that the strict application of this ordinance would create an unreasonable burden on the development, use and enjoyment of the property which outweighs the land use or land development purposes served by the specific zoning provision or provisions of this ordinance at issue.
- (C) The applicant shall have the burden of establishing each element required for the grant of a variation.

All future development of the proposed lots would be required to comply with all other applicable provisions of the Zoning Ordinance. A summary of all applicable zoning requirements can be found in Table 1, below.

Table 1: R-20 Zoning Regulations

	Required/ Permitted	Existing	Proposed	
		Lot 26	Lot 600	Lot 601
Lot Size	20,000 Sq. Ft.	41,108 Sq. Ft.	20,000 Sq. Ft.	21,108 Sq. Ft.
Width	100 Ft.	168.57 Ft.	84.82 Ft.	83.75 Ft.
Frontage	75 Ft.	168.57 Ft.	84.82 Ft.	83.75 Ft.
Front Yard	0 – 10.5 Ft.	59.9 Ft.	All future development required to comply with R-20 bulk and open space requirements.	
Side Yard (East)	12 ft.; 1:2 ratio	100.4 Ft.		
Side Yard (West)	12 ft.; 1:2 ratio	35.5 Ft.		
Rear Yard	12 Ft.; 1:1 ratio	155.25 Ft.		
Floor Area	0.25	~0.18		

The proposed residential use would be consistent with the Taylor Run/Duke Street Small Area Plan which designates the area for medium-density residential development.

SUBDIVISION VARIATION STANDARDS

Proposed Lots 600 and 601 would not meet the minimum lot width required in the R-20 zone. As such, the request requires a variation for both proposed lots to comply with the R-20 zone standards. Zoning Ordinance Section 11-1713 provides standards for variation review. Section 11-1713 (B) defines "substantial injustice" when "...strict application of this ordinance would create an unreasonable burden on the development, use and enjoyment of the property which outweighs the land use or land development purposes served by the specific zoning provision or provisions of this ordinance at issue."

**II. STAFF ANALYSIS**

Staff recommends approval of the applicant’s request for a subdivision with a variation. The proposed re-subdivision of the lots would comply with all the subdivision requirements except [Sections 11-1710\(B\)\(3\) and 11-1710\(D\)](#). These provisions require new lots to comply with the R-20 zone’s minimum lot width requirement. The applicant requests a variation pursuant to section 11-1713 from these provisions. Staff found that the applicant’s request also meets the variation criteria. Analysis follows.

COMPLIANCE WITH SUBDIVISION REQUIREMENTS GENERALLY

Staff determined that the proposed re-subdivision would meet all subdivision requirements established by section 11-1710, except the provisions which require proposed lots to have complying lot widths. Both lots would be suitable for residential uses and structures permitted by the R-20 zone. The proposed lots would meet the minimum lot size and frontage requirements and could be developed with single-unit dwellings that comply with the zone’s bulk requirements.

COMPLIANCE WITH SUBDIVISION CHARACTER REQUIREMENTS

The original subdivision area, sans the lot that is now public open space, is used for the comparison. Additionally, staff chose to use other lots on this block face of Janney's Lane outside the original subdivision area pursuant to 11-1710(B)(2) because there are only three other lots in the original subdivision, which are generally more irregularly shaped, substandard, or have different orientations. The subject lot is more comparable in shape, size, and configuration to the other interior lots on this block of Janney's Lane than those in the original subdivision.

The proposed lots' characteristics are consistent with similarly situated lots in terms of lot sizes, widths, and frontages (see Figure 5, below). These similarly situated lots are comparable to the proposed lots as they are on the same block face of Janney's Lane, zoned R-20, and most are interior lots. They are discussed in additional detail under the Lot Analysis section.

*Figure 5 – Area of Comparison and Similarly Situated Lots, blue; Subject property in red*  
**LOT ANALYSIS**

The lot analysis for proposed lots 600 and 601 includes the 13 lots outlined in Figure 5 above. These lots were included because they are either in the original subdivision or are all interior lots on the same block of Janney's Lane and have similar lot sizes, widths, frontages, shapes, and orientations. Table 2 below shows how the proposed lots compare to the similarly situated lots within the area of comparison in terms of width, frontage, and area.

\*substandard width

\*\*substandard frontage

The proposed lots would be substantially compatible with established neighborhood character as required by 11-1710(B). The proposed lots, with the variation, would comply with the R-20 zone requirements for single-unit dwellings. The R-20 zone's minimum lot size and frontage requirements for single-unit dwellings ensure that properties within the zone are suitable for low-density residential uses as required by the Taylor Run/Duke Street Small Area Plan Chapter of the City's Master Plan.

Further, the proposed lot widths for Proposed Lots 600 and 601, 84.82 feet and 83.75 feet, respectively, are both closer to the R-20 zone requirement for lot width than the existing lot width provided. The proposed widths are also closer to the majority of lot widths provided by the

similarly situated lots. Therefore, the proposed lots with the variation would not only comply with the zone requirements but would also be much more compatible with the similarly situated lots.

### VARIATIONS

Proposed lots 600 and 601 would not meet the R-20 zone's minimum lot width, as required by sections 11-1713(B)(3) and 11-1713(D). 11-1713(B)(3) states the following:

No resubdivision shall be approved which results in the creation or the continuation of a lot, building or structure which does not comply with the provisions of this ordinance, unless the commission expressly authorizes a variation pursuant to section 11-1713 of this ordinance.

Section 11-1713(D) includes a similar regulation which reads as follows:

The subdivision shall conform to the requirements of the zone in which the subdivision is situated.

The applicant has requested a variation from these provisions, stating the following special circumstance exists on the subject property:

- (1) Resubdivision of lots in subdivisions of record as of January 1, 1952, where, because of existing structures or gross area of land involved, the subdivided lots would not conform to all of the requirements of the zone in which the subdivision is located.

The applicant's justifications for the variation request are included with their application. They state that strict application would cause a substantial injustice as it precludes any re-subdivision of the subject property.

Staff agrees that the special circumstance, stated above, exists as the subject property was a lot of record before January 1, 1952 and, because of when the lot was created, the proposed lots comply with the lot area and frontage requirements of the zone, but not the width requirement, and therefore, would "...not conform to all of the requirements of the zone in which the subdivision is located."

The existing subject lot created in 1936. Prior to 1952, the applicable lot width and frontage requirement was 65 feet (Residential "A" Zone). After 1952, when the R-20 zone was created, the lot width requirement was increased to 100 feet and the lot frontage requirement increased to 75 feet, which created many noncomplying lots in the new R-20 zone, including two of the similarly situated lots. Strict application would create an unreasonable burden on the use of the subject property because it would prohibit a re-subdivision into two lots that would have met the zoning requirements at the time the subject lot was created.

Staff finds that the purpose of the minimum lot width requirement is upheld. The lot width requirement mainly exists to establish consistency in lot sizes and dimensions within any given zone. Additionally, strict application of this requirement would keep Proposed Lots 600 and 601

from being re-subdivided, leaving the subject property in its existing condition; a parcel with a lot size, width, and frontage that is larger and wider than most of the similarly situated lots. Proposed Lots 600 and 601 would be more uniform with this section of Janney's Lane than the existing lot and would therefore uphold the purpose of the lot width requirement.

Overall, staff agrees with the applicant's conclusions related to the variation standards. All required elements have been established so staff finds that the Planning Commission may authorize the requested variations.

### NEIGHBORHOOD OUTREACH AND COMMENTS

Staff notified the Seminary Hill Association on October 4, 2024, and November 7, 2024. As of November 14, 2024, the Seminary Hill Association has not provided comments.

### III. CONCLUSION

In summary, staff finds that Proposed Lots 600 and 601 would adhere to all subdivision requirements and to the R-20 standards with approval of the variation request. Further, the lots are of substantially similar character as other similarly situated lots on this section of Janney's Lane. Therefore, staff recommends approval of the request subject to the conditions contained in Section IV of this report.

### IV. RECOMMENDED CONDITIONS

Staff recommends **approval** subject to compliance with all applicable codes and ordinances and the following conditions:

1. The final subdivision plat shall comply with the Zoning Ordinance section 11-1700. (P&Z)
2. The applicant shall covenant that the existing two-story accessory structure and pool shall be demolished prior to: (a) City approval of any building permits to construct any new dwellings or structures on the subject property or (b) sale of the subdivided lots to individual owners. This covenant shall expire when the subdivided lots are consolidated, or the existing two-story accessory structure and pool are demolished. This covenant shall be included in the recorded deed of subdivision and the final subdivision plat. (P&Z)

### **1210 Janney's Lane**

#### **Supplement Information Request for Variation from the Lot Width regulation of Section 3-105(B) of the R-20 Zone Regulations.**

The applicant is requesting a variation pursuant to Section 11-1713 of the Alexandria Zoning Ordinance from the strict application of the 100 foot lot width regulations of the R-20 Zone Regulation from 100 feet to 75 feet which is the same width of the lot frontage requirements of the R-20 Zone Regulations.

The Variation is requested due to the fact that the existing lot was created as a rectangular lot when the lot was originally subdivided prior to January 1, 1952. When originally created the "gross area of land involved, the subdivided lots would not conform to all of the requirements of the zone in which the subdivision is located" which is the legal basis for the granting of the variation pursuant to Section 11-1713 (A) (5) of the Alexandria Zoning Ordinance.

The granting of the variation prevents a Substantial Injustice as defined in Section 11-1713 of the Alexandria Zoning Ordinance in that (i) a strict adherence to such provisions would result in substantial injustice (ii) the use and character of the resulting lots or parcels in such a subdivision would not be inconsistent with the use provisions of the zone in which the property is situated and with the existing development in the immediate area.

- Location of the property immediately adjoining the proposed subdivision and the names and addresses of all its owners
- Location and width of all proposed streets, alleys and public areas and their dimensions  
Points of connection with the city sewer system
- Location of all easements, reservations, and highway setbacks, as established by section 7-1006 of the zoning ordinance
- The width and name of adjacent existing streets, alleys, easements and public utilities, including without limitation, liens for water, gas, electric, telephone, storm and sanitary sewer, and railroads shown graphically
- Limits of floodplains and resource protection areas
- Location of any grave or object or structure marking a place of burial

**SUBDIVISION APPLICATION MATERIALS CHECKLIST (cont'd)**

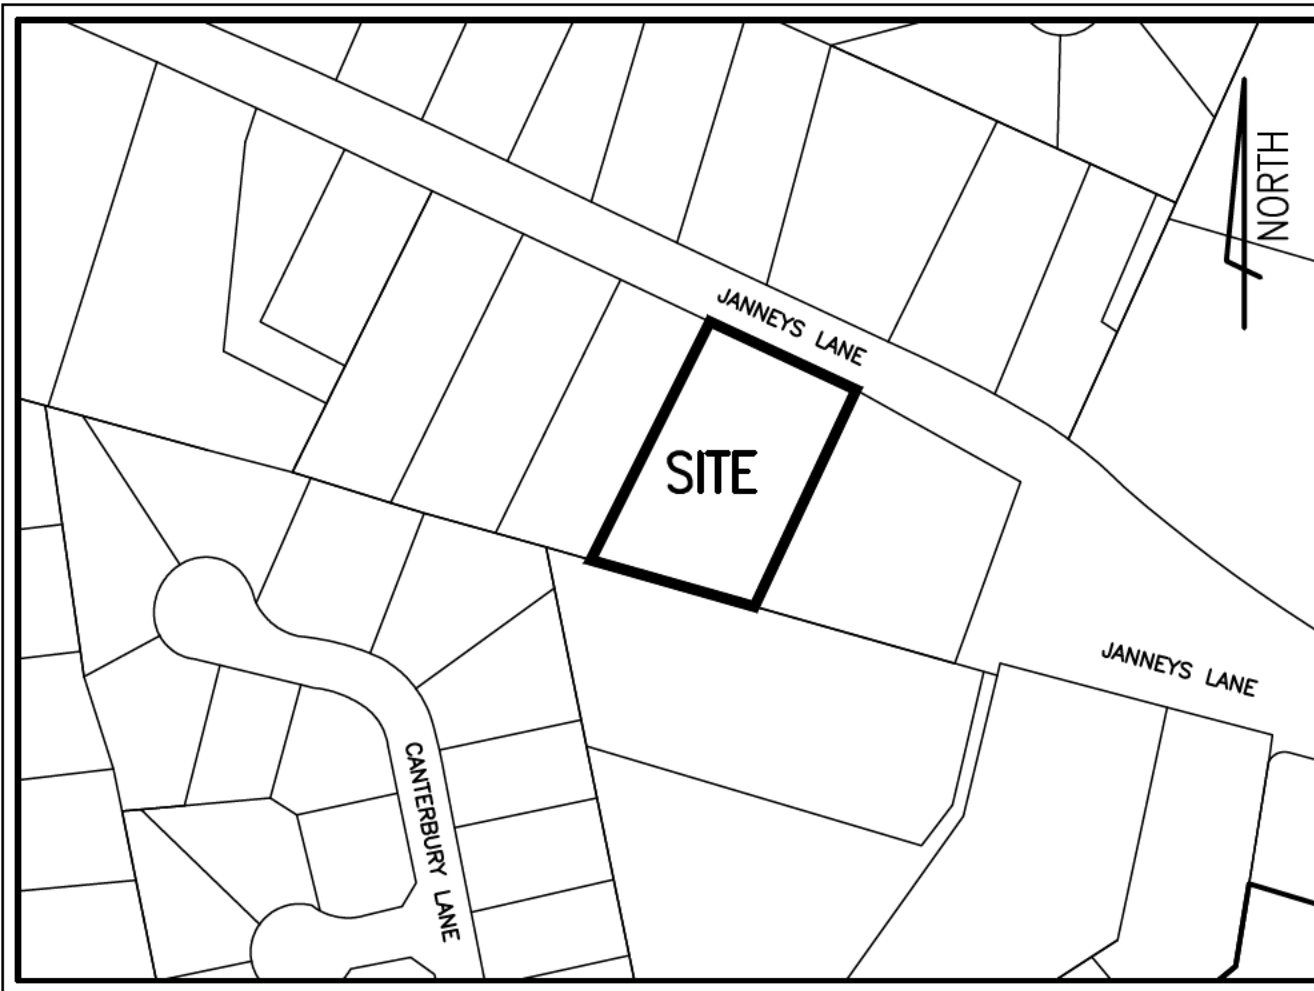

- In the following cases the preliminary plat shall be superimposed on a topographic map, at a scale of not greater than 100 feet to the inch, showing contours at intervals not greater than two feet or greater intervals when permitted by the director, and correlated to the U.S. Coast and Geodetic Survey datum, for the purpose of showing the character and drainage of the land:
  - a. Whenever any land within the parcel subdivided is to be dedicated to public use; or
  - b. For all subdivisions containing lots or parcels of less than one-half acre.
- Proposed street grade data and the method of storm water disposal
- General location, dimension, size, height, and species of major trees and shrubs
- Existing buildings with dimensions from the buildings to the nearest lot lines When known, areas that can reasonably be expected to or which do contain soils or materials contaminated with, but not limited to heavy metals, petroleum products, PCB's, pesticides, flyash, or other toxic or hazardous materials
- When known, underground storage tanks
- When known, areas located within 1,000 feet of a former sanitary landfill, dump, or disposal area
- When known, areas with the potential of generating combustible gases

**FINAL PLAT (Mylar)**

**Required contents:**

- All of the information required of a preliminary plat under Section 11-1706(D), except for items 16-24
- The location of all metals monuments of not less than one inch in diameter and 24 inches in length shown this: O, and located in the ground at each intersection of streets and alleys with plat boundary lines, and at all points on a street, alley and boundary lines where there is a corner, change in direction, or curvature
- A surveyor's or engineer's seal and certificate of survey in the following form, which may be modified to accommodate title information (see Section 11-1709 B(3) for language)
- A curve table containing the following for all curvilinear boundaries and street centerlines; delta, radius, arc, tangent, chord and chord bearing. All distances shall be shown to the nearest one-hundredth of a foot; angles or bearings to the nearest ten seconds.

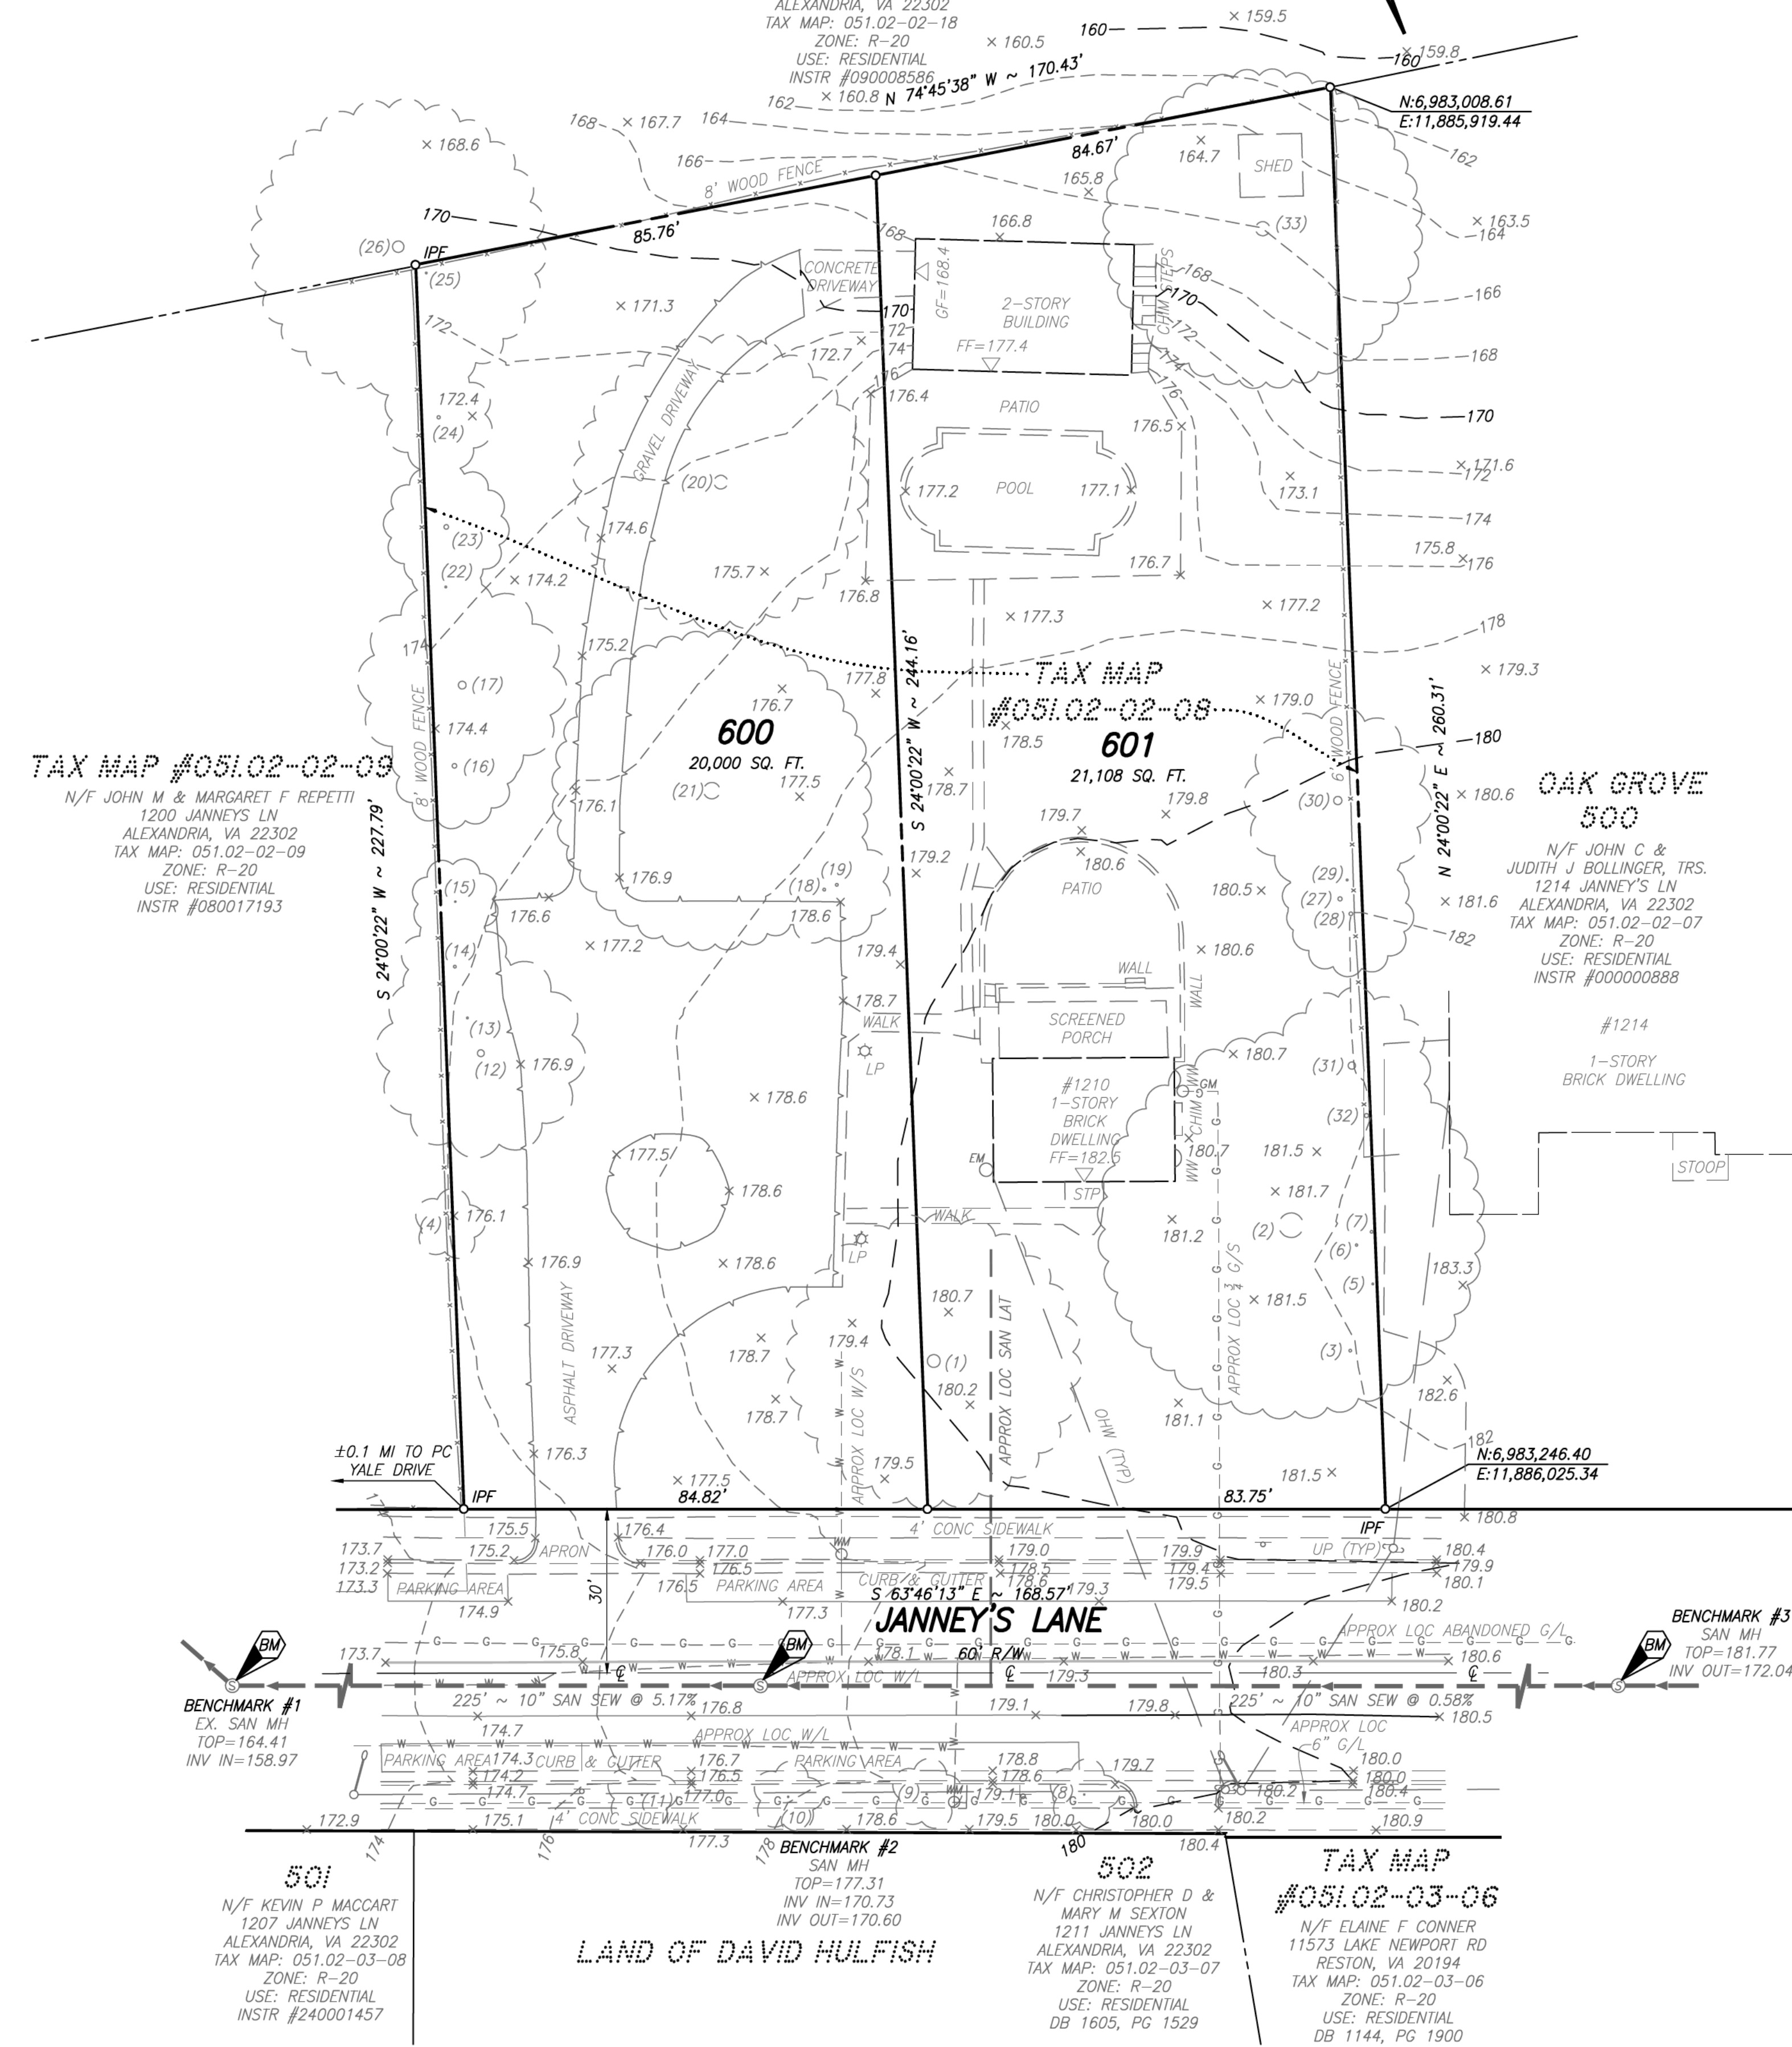

**See Section 11-1700 of the Alexandria Zoning Ordinance for additional information**
