NATURE OF PROPOSED WORK: *Please check all that apply*

- NEW CONSTRUCTION
- EXTERIOR ALTERATION: *Please check all that apply.*
 - awning fence, gate or garden wall HVAC equipment shutters
 - doors windows siding shed
 - lighting pergola/trellis painting unpainted masonry
 - other deck, railings, basement stair reconfiguration
- ADDITION
- DEMOLITION/ENCAPSULATION
- SIGNAGE

DESCRIPTION OF PROPOSED WORK: *Please describe the proposed work in detail (Additional pages may be attached).*

Request for Certificate of Appropriateness for rear deck addition with associated alterations at 913 S Alfred St, a 1970s townhouse.

Scope of work includes:

New deck at main level — Approximately 4-5 feet above grade, constructed with TimberTech Advanced PVC decking and Trex

Select powder-coated black aluminum railings with vertical balusters. Wood stairs from deck to rear yard.

Window-to-door conversion — Removal of existing window and wall section below sill (less than 25 sq ft) to install a sliding patio door

with black exterior finish. Door provides access from interior to new deck.

Basement stair reconfiguration — Existing concrete stairs running parallel to rear elevation will be removed and replaced with new

concrete stairs oriented perpendicular to the house, extending straight into the rear yard. This accommodates the new deck.

SUBMITTAL REQUIREMENTS:

Check this box if there is a homeowner’s association for this property. If so, you must attach a copy of the letter approving the project.

Items listed below comprise the **minimum supporting materials** for BAR applications. Staff may request additional information during application review. Please refer to the relevant section of the *Design Guidelines* for further information on appropriate treatments.

Applicants must use the checklist below to ensure the application is complete. Include all information and material that are necessary to thoroughly describe the project. Incomplete applications will delay the docketing of the application for review. Pre-application meetings are required for all proposed additions. All applicants are encouraged to meet with staff prior to submission of a completed application.

Demolition/Encapsulation : *All applicants requesting 25 square feet or more of demolition/encapsulation must complete this section. Check N/A if an item in this section does not apply to your project.*

- Survey plat showing the extent of the proposed demolition/encapsulation.
- Existing elevation drawings clearly showing all elements proposed for demolition/encapsulation.
- Clear and labeled photographs of all elevations of the building if the entire structure is proposed to be demolished.
- Description of the reason for demolition/encapsulation.
- Description of the alternatives to demolition/encapsulation and why such alternatives are not considered feasible.

Additions & New Construction: Drawings must be to scale and should not exceed 11" x 17" unless approved by staff. Check N/A if an item in this section does not apply to your project.

- ^{N/A} Scaled survey plat showing dimensions of lot and location of existing building and other structures on the lot, location of proposed structure or addition, dimensions of existing structure(s), proposed addition or new construction, and all exterior, ground and roof mounted equipment.
- FAR & Open Space calculation form.
- Clear and labeled photographs of the site, surrounding properties and existing structures, if applicable.
- Existing elevations must be scaled and include dimensions.
- Proposed elevations must be scaled and include dimensions. Include the relationship to adjacent structures in plan and elevations.
- Materials and colors to be used must be specified and delineated on the drawings. Actual samples may be provided or required.
- Manufacturer's specifications for materials to include, but not limited to: roofing, siding, windows, doors, lighting, fencing, HVAC equipment and walls.
- For development site plan projects, a model showing mass relationships to adjacent properties and structures.

Signs & Awnings: One sign per building under one square foot does not require BAR approval unless illuminated. All other signs including window signs require BAR approval. Check N/A if an item in this section does not apply to your project.

- ^{N/A} Linear feet of building: Front: _____ Secondary front (if corner lot): _____.
- Square feet of existing signs to remain: _____.
- Photograph of building showing existing conditions.
- Dimensioned drawings of proposed sign identifying materials, color, lettering style and text.
- Location of sign (show exact location on building including the height above sidewalk).
- Means of attachment (drawing or manufacturer's cut sheet of bracket if applicable).
- Description of lighting (if applicable). Include manufacturer's cut sheet for any new lighting fixtures and information detailing how it will be attached to the building's facade.

Alterations: Check N/A if an item in this section does not apply to your project.

- ^{N/A} Clear and labeled photographs of the site, especially the area being impacted by the alterations, all sides of the building and any pertinent details.
- Manufacturer's specifications for materials to include, but not limited to: roofing, siding, windows, doors, lighting, fencing, HVAC equipment and walls.
- Drawings accurately representing the changes to the proposed structure, including materials and overall dimensions. Drawings must be to scale.
- An official survey plat showing the proposed locations of HVAC units, fences, and sheds.
- Historic elevations or photographs should accompany any request to return a structure to an earlier appearance.

ALL APPLICATIONS: *Please read and check that you have read and understand the following items:*

- I understand that after reviewing the proposed alterations, BAR staff will invoice the appropriate filing fee in APEX. The application will not be processed until the fee is paid online.
- I understand the notice requirements and will return a copy of the three respective notice forms to BAR staff at least five days prior to the hearing. If I am unsure to whom I should send notice I will contact Planning and Zoning staff for assistance in identifying adjacent parcels.
- I, the applicant, or an authorized representative will be present at the public hearing.
- I understand that any revisions to this initial application submission (including applications deferred for restudy) must be accompanied by the BAR Supplemental form and revised materials.

The undersigned hereby attests that all of the information herein provided including the site plan, building elevations, prospective drawings of the project, and written descriptive information are true, correct and accurate. The undersigned further understands that, should such information be found incorrect, any action taken by the Board based on such information may be invalidated. The undersigned also hereby grants the City of Alexandria permission to post placard notice as required by Article XI, Division A, Section 11-301(B) of the 1992 Alexandria City Zoning Ordinance, on the property which is the subject of this application. The undersigned also hereby authorizes the City staff and members of the BAR to inspect this site as necessary in the course of research and evaluating the application. The applicant, if other than the property owner, also attests that he/she has obtained permission from the property owner to make this application.

OWNERSHIP AND DISCLOSURE STATEMENT

Use additional sheets if necessary

1. Applicant. State the name, address and percent of ownership of any person or entity owning an interest in the applicant, unless the entity is a corporation or partnership, in which case identify each owner of more than three percent. The term ownership interest shall include any legal or equitable interest held at the time of the application in the real property which is the subject of the application.

Name	Address	Percent of Ownership
1. Ronald L Southwick	[REDACTED]	50
2. Alison M Southwick	[REDACTED]	50
3.		

2. Property. State the name, address and percent of ownership of any person or entity owning an interest in the property located at 913 S Alfred Street _____ (address), unless the entity is a corporation or partnership, in which case identify each owner of more than three percent. The term ownership interest shall include any legal or equitable interest held at the time of the application in the real property which is the subject of the application.

Name	Address	Percent of Ownership
1. Ronald L Southwick	[REDACTED]	50
2. Alison M Southwick	[REDACTED]	50
3.		

3. Business or Financial Relationships. Each person or entity listed above (1 and 2), with an ownership interest in the applicant or in the subject property is required to disclose any business or financial relationship, as defined by Section 11-350 of the Zoning Ordinance, existing at the time of this application, or within the 12-month period prior to the submission of this application with any member of the Alexandria City Council, Planning Commission, Board of Zoning Appeals or either Boards of Architectural Review.

Name of person or entity	Relationship as defined by Section 11-350 of the Zoning Ordinance	Member of the Approving Body (i.e. City Council, Planning Commission, etc.)
1. Southwick	None	None
2. Southwick	None	None
3. Southwick	None	None

NOTE: Business or financial relationships of the type described in Sec. 11-350 that arise after the filing of this application and before each public hearing must be disclosed prior to the public hearings.

As the applicant or the applicant's authorized agent, I hereby attest to the best of my ability that the information provided above is true and correct.

Sliding Patio & French Doors

Product Features

Styles

Operating/Fixed (XO or OX), Operating/Fixed/Operating (XOX), Fixed/Operating/Operating/Fixed (OXXO), Sliding Patio and French Patio options. See your Authorized Loewen Dealer for the full range of configurations.

Standard Features

- Natural Douglas Fir interior (no visible finger joints)
- 4 9/16" (116 mm) and 6 9/16" (166 mm) jamb construction
- LowE insulated tempered glazing
- 2 1/4" (58 mm) thick sliding panels
- Interior/exterior signature handle in linen, bronze with thumb latch
- Extruded aluminum cladding in a variety of standard colors, primed wood or clear Fir exterior
- Extruded aluminum-frame insect screen with high transparency mesh option

Hardware

Multiple hardware type and finish choices are available. See the Hardware in section A for more information.

Glazing

LowE Double, LowE Triple and StormForce™. StormForce™ is not available on all products.

Simulated Divided Lites (SDL)

Ogee Profile — 3/4" (19 mm), 1 1/8" (30 mm), 2" (51 mm)

Putty Profile — 5/8" (16 mm), 7/8" (22 mm), 1 1/8" (30 mm), 2" (51 mm)

Square Profile (interior only) — 3/4" (19 mm), 7/8" (22 mm), 1 1/8" (30 mm), 2" (51 mm)

Casing

Wood: 2" (51 mm) Brickmould, 3 1/2" (89 mm) Flat, 5 1/2" (139 mm) Flat, Adams and Williamsburg.

Metal Clad: 2" (51 mm) Brickmould, 3 1/2" (89 mm) Flat, 2" clad frame extension, Nose & Cove, Adams, Williamsburg and Contemporary.

Metal Clad Color Spectrum

All Palette colors, including anodized finishes. Available in Cyprium Collection.

Specifications

Standards

Most units have been tested by an independent laboratory for air and water infiltration, structural performance and thermal performance.

Panel & Frame

Manufactured from Coastal Douglas Fir kiln-dried lumber with frame construction designed for 4 9/16" (116 mm) and 6 9/16" (166 mm) jamb. All wood exterior components are factory primed unless specified as clear exterior. Minor scratches or abrasions in the wood surface or primer are not considered defects.

Alternate Species

The entire Loewen product line is also available in optional Mahogany.

Preservative Treated

All wood parts are dipped in approved preservative.

Door Panels

Opening panel is equipped with two sets of adjustable ball bearing tandem rollers. Sash is 2 1/4" (57 mm) thick for extra strength and durability.

Glazing

With countless glazing configurations and LowE coating options, we ensure that you can choose the perfect blend of protection and comfort.

Insulating Glass

Double or triple insulating tempered glass configuration, with 1/2" (13 mm) airspace.

LowE Systems

LowE best describes the benefits of the product that incorporates glazing coatings and Argon gas. LowE systems help reduce heating and cooling costs, providing superior energy efficiency.

Simulated Divided Lites (SDL)

Standard SDL complete with airspace grilles. Grille bars are permanently applied to the interior and exterior.

Sidelites

Sidelites consist of a patio door panel and frame to match patio door. Supplied as a single unit with brickmould or nailing flange, or can be attached to patio door.

Metal Cladding

Heavy duty exterior metal cladding comprised of extruded aluminum is available in a variety of Palette colors, including anodized finishes. Interior of door can be natural wood, unfinished or primed. Metal clad units are supplied ready-to-install complete with integral metal nailing flange.

Sill Track

Extruded metal sill with stainless steel cap over operating track for ease of operation and long-lasting performance. A dual sill block system with double drainage holes keep water out of the interior trough.

Hardware

Anti-lift security feature is standard. Security foot lock is optional. Multi-point locking hardware, complete with brass handle set and escutcheon is available. The locking hardware is also available in several optional finishes. Stainless steel rollers are optional.

Weatherstrip

The combination of multiple weatherstrips ensure maximum protection against air and water infiltration.

Screen

Wood extruded units are available with extruded aluminum screen frame in bronze or white, with anti-glare fiberglass screen cloth. Screen frame color is matched to exterior color on metal clad units. Screen is equipped with adjustable rollers on top and bottom to assure ease of operation and accurate fitting. Stainless steel components available.

Section: 05 73 00 - Decorative Metal Railings

1 Innovative Product Evaluated¹

1.1 Trex Select Aluminum Rail

2 Product Description and Materials

2.1 The innovative product evaluated in this report is shown in **Figure 1** and is described in **Table 1**. Approved Posts for use with this innovative product are provided in **Table 2**.

Figure 1. Trex Select Aluminum Rail

Table 1. Approved Railing System

Product	Description	Maximum Allowable Dimensions	Railing Assembly Infill	Railing Assembly Total Dimensions		Application
				Heights	Lengths	
Trex Select Aluminum Rail	Aluminum Railing Assembly	42" Height and 96" Span Between Posts	0.75" x 0.75" x 0.040" Aluminum Balusters	36" and 42"	72" and 96"	Horizontal

SI: 1 in = 25.4 mm

Table 2. Approved Posts for use with the Trex Select Aluminum Rail System

Product	Approved Railing System	Maximum Railing Height	Post Cross-Section Dimensions	Base Plate Dimensions	Maximum Allowable Post Spacing
Trex® Select™ Aluminum Post	Trex Select Aluminum Rail	42" Height	2.5" x 2.5" x 0.085"	4.0" x 4.0" x 0.35"	96" Between Posts
Trex® Signature® Post		42" Height	2.5" x 2.5" x 0.13"	4.0" x 4.0" x 0.50"	96" Between Posts

SI: 1 in = 25.4 mm

- 2.1.1 Trex Select Aluminum Rail is a guardrail system consisting of extruded aluminum posts, rails, square balusters, and brackets.
- 2.1.2 Trex Select Aluminum Post and the pre-assembled rail/baluster panel are available in charcoal black and burnished bronze powder-coat.
 - 2.1.2.1 Trex Select Aluminum Post is attached to the Aluminum Base Plate with stainless fasteners.
 - 2.1.2.2 Trex Select Aluminum Posts are available in two options: with and without pre-installed brackets.
 - 2.1.2.3 Vertical balusters of the pre-assembled 6' panel are approximately 3.70" apart, and vertical balusters for the pre-assembled 8' panel are approximately 3.75" apart.

2.1.3 Trex Select Aluminum Rail is available in two heights, 36" and 42", and two length configurations:

2.1.3.1 6' configuration (**Figure 2**)

2.1.3.2 8' configuration (**Figure 3**)

Figure 2. 6' Trex Select Aluminum Rail

Figure 3. 8' Trex Select Aluminum Rail

2.1.4 Trex Select Aluminum Rail component profiles are shown in **Figure 4** and **Figure 5**, and are described in **Table 3**.

2.1.4.1 *Note:* The dimensions shown are in inches and the drawings are not to scale.

Figure 4. Trex Select Aluminum Railing Components

Figure 5. Trex Select Aluminum Railing Horizontal Panel

2.1.5 Details regarding the components of Trex Select Aluminum Rail are provided in **Table 3**.

Table 3. Component Details of Trex Select Aluminum Rail

Component	Overall Dimensions	Individual Component	Component Dimensions	Description	Material
Horizontal Panel					
Horizontal Panel	33" x 0.75" x 71" 33" x 0.75" x 95" 39" x 0.75" x 71" 39" x 0.75" x 95"	Top Rail	1.5" X 1.4" x 0.085"	Pre-assembled Top and Bottom Rails with Balusters	Powder Coated Aluminum 6063-T6
		Bottom Rail	1.3" X 1.4" x 0.085"	71" Panel has 15 Square Balusters Positioned 3.70" Maximum Clearance Between Them	
		Square Baluster	0.75" x 0.75" x 0.040" (32" or 38" Length)	95" Panel has 20 Square Balusters Positioned 3.75" Maximum Clearance Between Them	
Trex Select Aluminum Post with Base Plate					
Trex Select Aluminum 2.5" Post with Base Plate	4" x 4" x 37½" 4" x 4" x 43½"	2.5" Post (Corner); 2.5" Post (Line); 2.5" Post (End); 2.5" Post (No Brackets)	2.5" x 2.5" x 0.085"	Post is Pre-assembled to Base Plate with Four 0.370" Diameter Holes with Centers Located Approximately 1" from Each Edge and Approximately 2" Apart On-Center	Powder Coated Aluminum 6063-T6
		2.5" Stainless Screw	2.5" x 5/16" #12	Four Screws are Used to Assemble Post to Base Plate	300 Series Stainless Steel

Table 3. Component Details of Trex Select Aluminum Rail

Component	Overall Dimensions	Individual Component	Component Dimensions	Description	Material
Trex Select Aluminum 2.5" Post with Base Plate Continued	4" x 4" x 37 1/2" 4" x 4" x 43 1/2" Continued	4" Base Plate	4.0" x 4.0" x 0.35"	Aluminum Base Plate has Four 0.406" Diameter Mounting Bolt Holes Located Approximately 0.75" from Edge and 3.25" Apart On-Center	Powder Coated Aluminum 6061-T5
		2.5" Post Cap	2.8" x 2.8" x 0.5"	Cap is Installed on Top of Post	Powder Coated Zamak 3 or Aluminum A380/A383/ADC12
		2.5" Post Skirt	4.8" x 4.8" x 1"	Skirt is Installed Around Base Plate	Powder Coated Zamak 3
Trex Signature Post with Base Plate					
Trex Signature Post with Base Plate	4" x 4" x 37" 4" x 4" x 43"	2.5" Post	2.5" x 2.5" x 0.13"	Post is Welded to Base Plate	Powder Coated Aluminum 6063-T6
		4" Base Plate	4.0" x 4.0" x 0.5"	Aluminum Base Plate Has Four 0.406" Diameter Holes with Centers Located Approximately 0.375" from Each Edge and Approximately 3.25" Apart On-Center	
		2.5" Post Cap	2.8" x 2.8" x 0.5"	Cap is Installed on Top of Post	Powder Coated Zamak 3 or Aluminum A380/A383/ADC12
		2.5" Post Skirt	4.8" x 4.8" x 1"	Skirt is Installed Around Base Plate	Powder Coated Zamak 3

2.2 As needed, review material properties for design in **Section 6** and the regulatory evaluation in **Section 8**.

3 Definitions²

3.1 New Materials³ are defined as building materials, equipment, appliances, systems, or methods of construction, not provided for by prescriptive and/or legislatively adopted regulations, known as alternative materials.⁴ The design strength and permissible stresses shall be established by tests⁵ and/or engineering analysis.⁶

3.2 Duly authenticated reports⁷ and research reports⁸ are test reports and related engineering evaluations that are written by an approved agency⁹ and/or an approved source.¹⁰

3.2.1 These reports utilize intellectual property and/or trade secrets to create public domain material properties for commercial end-use.

3.2.1.1 This report protects confidential Intellectual Property and trade secrets under the regulation, 18.U.S.Code.90, also known as Defend Trade Secrets Act of 2016 (DTSA).¹¹

3.3 An approved agency is "approved" when it is ANAB ISO/IEC 17065 accredited. DrJ Engineering, LLC (DrJ) is accredited and listed in the ANAB directory.

- 3.4 An approved source is “*approved*” when a professional engineer (i.e., Registered Design Professional, hereinafter RDP) is properly licensed to transact engineering commerce. The regulatory authority governing approved sources is the state legislature via its professional engineering regulations.¹²
- 3.5 Testing and/or inspections conducted for this duly authenticated report were performed by an ISO/IEC 17025 accredited testing laboratory, an ISO/IEC 17020 accredited inspection body, and/or a licensed RDP.
- 3.5.1 The Center for Building Innovation (CBI) is ANAB¹³ ISO/IEC 17025 and ISO/IEC 17020 accredited.
- 3.6 The regulatory authority shall enforce¹⁴ the specific provisions of each legislatively adopted regulation. If there is a non-conformance, the specific regulatory section and language of the non-conformance shall be provided in writing¹⁵ stating the nonconformance and the path to its cure.
- 3.7 The regulatory authority shall accept duly authenticated reports from an approved agency and/or an approved source with respect to the quality and manner of use of new materials or assemblies as provided for in regulations regarding the use of alternative materials, designs, or methods of construction.¹⁶
- 3.8 ANAB is an International Accreditation Forum (IAF) Multilateral Recognition Arrangement (MLA) signatory. Therefore, recognition of certificates and validation statements issued by conformity assessment bodies accredited by all other signatories of the IAF MLA with the appropriate scope shall be approved.¹⁷ Thus, all ANAB ISO/IEC 17065 duly authenticated reports are approval equivalent,¹⁸ and can be used in any country that is an MLA signatory found at this link: <https://iaf.nu/en/recognised-abs/>
- 3.9 Approval equity is a fundamental commercial and legal principle.¹⁹

4 Applicable Local, State, and Federal Approvals; Standards; Regulations²⁰

4.1 *Local, State, and Federal*

- 4.1.1 Approved in all local jurisdictions pursuant to ISO/IEC 17065 duly authenticated report use, which includes, but is not limited to, the following featured local jurisdictions: Austin, Baltimore, Broward County, Chicago, Clark County, Dade County, Dallas, Detroit, Denver, DuPage County, Fort Worth, Houston, Kansas City, King County, Knoxville, Las Vegas, Los Angeles City, Los Angeles County, Miami, Nashville, New York City, Omaha, Philadelphia, Phoenix, Portland, San Antonio, San Diego, San Jose, San Francisco, Seattle, Sioux Falls, South Holland, Texas Department of Insurance, and Wichita.²¹
- 4.1.2 Approved in all state jurisdictions pursuant to ISO/IEC 17065 duly authenticated report use, which includes, but is not limited to, the following featured states: California, Florida, New Jersey, Oregon, New York, Texas, Washington, and Wisconsin.²²
- 4.1.3 Approved by the Code of Federal Regulations Manufactured Home Construction: Pursuant to Title 24, Subtitle B, Chapter XX, Part 3282.14²³ and Part 3280²⁴ pursuant to the use of ISO/IEC 17065 duly authenticated reports.
- 4.1.4 Approved means complying with the requirements of local, state, or federal legislation.

4.2 *Standards*

- 4.2.1 *ASCE/SEI 7: Minimum Design Loads and Associated Criteria for Buildings and Other Structures*
- 4.2.2 *ASTM E935: Standard Test Methods for Performance of Permanent Metal Railing Systems and Rails for Buildings*
- 4.2.3 *ASTM E985: Standard Specification for Permanent Metal Railing Systems and Rails for Buildings*

4.3 *Regulations*

- 4.3.1 *IBC – 18, 21, 24: International Building Code®*
- 4.3.2 *IRC – 18, 21, 24: International Residential Code®*

5 Listed²⁵

- 5.1 Equipment, materials, products, or services included in a List published by a nationally recognized testing laboratory (i.e., CBI), an approved agency (i.e., CBI and DrJ), and/or an approved source (i.e., DrJ), or other organization(s) concerned with product evaluation (i.e., DrJ), that maintains periodic inspection (i.e., CBI) of production of listed equipment or materials, and whose listing states either that the equipment or material meets nationally recognized standards or has been tested and found suitable for use in a specified manner.

6 Tabulated Properties Generated from Nationally Recognized Standards

6.1 General

- 6.1.1 Trex Select Aluminum Railings are used as guardrail systems where a guardrail height of 36" or 42" is required in accordance with IBC Section 1015.2, IBC Section 1015.3 and IRC Section R321.1.²⁶

6.2 Structural Performance

- 6.2.1 Trex Select Aluminum Rails were tested and met the structural requirements of IRC Section R301.5 and IBC Section 1607.9 for use in one and two-family dwellings. See **Table 4** for assessment of Trex Select Aluminum Rail.

- 6.2.1.1 Design loads are applicable when using Trex Select Aluminum Post or Trex Signature Post with the Trex Select Aluminum Rail system.

Table 4. Allowable Design Loads for Trex Select Aluminum Railing

Load Type	Regulatory Source	Design Service-Level Live Load
Infill Load	<u>IBC Section 1607.9.1.2</u> <u>IRC Table R301.5</u>	50 lb ¹
Concentrate Load (Vertical and Horizontal)	<u>IBC Section 1607.9.1.1</u> <u>IRC Table R301.5</u>	200 lb

SI: 1 lbf = 4.448 N, 1 plf = 14.6 N/m

1. Load applied over square area of one (1) square foot in accordance with ASTM E935 Section 10.4 and ASCE 7 Section 4.5.1.2, as specified in IBC Section 1607.9.1.2 and IRC Table R301.5.

- 6.3 Where the application falls outside of the performance evaluation, conditions of use, and/or installation requirements set forth herein, alternative techniques shall be permitted in accordance with accepted engineering practice and experience. This includes but is not limited to the following areas of engineering: mechanics or materials, structural, building science, and fire science.

7 Certified Performance²⁷

- 7.1 All construction methods shall conform to accepted engineering practices to ensure durable, livable, and safe construction and shall demonstrate acceptable workmanship reflecting journeyman quality of work of the various trades.²⁸
- 7.2 The strength and rigidity of the component parts and/or the integrated structure shall be determined by engineering analysis or by suitable load tests to simulate the actual loads and conditions of application that occur.²⁹

8 Regulatory Evaluation and Accepted Engineering Practice

- 8.1 Trex Select Aluminum Rail complies with the following legislatively adopted regulations and/or accepted engineering practice for the following reasons:
- 8.1.1 Structural performance in accordance with IRC Section R301.5 and IBC Section 1607.9 for one and two-family dwellings.
- 8.2 Any building code, regulation and/or accepted engineering evaluations (i.e., research reports, duly authenticated reports, etc.) that are conducted for this Listing were performed by DrJ, which is an ISO/IEC 17065 accredited certification body and a professional engineering company operated by RDP or approved sources. DrJ is qualified³⁰ to practice product and regulatory compliance services within its scope of accreditation and engineering expertise,³¹ respectively.
- 8.3 Engineering evaluations are conducted with DrJ's ANAB accredited ICS code scope of expertise, which is also its areas of professional engineering competence.
- 8.4 Any regulation specific issues not addressed in this section are outside the scope of this report.

9 Installation

- 9.1 Installation shall comply with the approved construction documents, the manufacturer installation instructions, this report, and the applicable building code.
- 9.2 In the event of a conflict between the manufacturer installation instructions and this report, contact the manufacturer for counsel on the proper installation method.
- 9.3 *Installation Procedure*
- 9.3.1 Trex Select Aluminum Post or Trex Signature Post shall be installed in accordance with **Figure 6** or **Figure 7**.
- 9.3.1.1 Material shall be nominal 2 x 8 Pressure-Preservative-Treated (PPT) Southern Pine (SP) with a specific gravity of 0.55.
- 9.3.1.2 Fasteners shall be #10 x 3" PPT compatible wood screws (36 screws per post location).

Figure 6. Corner Post Blocking – Post - Wood Installation

Figure 7. In-line Post Blocking – Post - Wood Installation

9.3.2 The fastening schedule per component is presented in **Table 5**.

Table 5. Fastening Schedule for Trex Select Aluminum Rail

Component	Connection	Details
Trex Select Aluminum Post	Post to Substructure	Wood: Four 3/8" x 6" Stainless Steel Hex-Cap Bolts, Stainless Steel Washers, with Stainless Steel T-nuts Installed into Bottom of Wood Blocking
Trex Signature Post Rail Brackets	Upper Bracket	Attach to Aluminum Posts Using Four #10 x 3/4" Self-Drilling Screws
	Lower Bracket	Attach to Aluminum Posts Using Two #10 x 3/4" Self-Drilling Screws
Horizontal Panel	Panel to Brackets	Attach to Upper Brackets Using Three #10 x 3/4" Self-Drilling Screws
Foot Block Insert	Foot Block Insert to Panel	Attach to Center of Bottom Rail Using One #10 x 3/4" Screw

9.3.3 *Installation of Trex Select Aluminum Rail Horizontal Panel:*

- 9.3.3.1 Installation of Trex Select Aluminum Rail shall be installed on Trex Signature®, Transcend Lineage®, Transcend®, Select®, Enhance® decking, or decking with equivalent properties.
- 9.3.3.2 Trex Select Aluminum Rails shall be installed according to Trex Installation Instructions (See manufacturing installation guide for details).

10 Substantiating Data

- 10.1 Testing has been performed under the supervision of a professional engineer and/or under the requirements of ISO/IEC 17025 as follows:
 - 10.1.1 ASTM E935 test reports from approved sources:
 - 10.1.1.1 Infill load tests
 - 10.1.1.2 Concentrated load tests
- 10.2 Information contained herein may include the result of testing and/or data analysis by sources that are approved agencies, approved sources, and/or an RDP. Accuracy of external test data and resulting analysis is relied upon.
- 10.3 Where applicable, testing and/or engineering analysis are based upon provisions that have been codified into law through state or local adoption of regulations and standards. The developers of these regulations and standards are responsible for the reliability of published content. Dr.J's engineering practice may use a regulation-adopted provision as the control. A regulation-endorsed control versus a simulation of the conditions of application to occur establishes a new material as being equivalent to the regulatory provision in terms of quality, strength, effectiveness, fire resistance, durability, and safety.
- 10.4 The accuracy of the provisions provided herein may be reliant upon the published properties of raw materials, which are defined by the grade mark, grade stamp, mill certificate, or duly authenticated reports from approved agencies and/or approved sources provided by the supplier. These are presumed to be minimum properties and relied upon to be accurate. The reliability of Dr.J's engineering practice, as contained in this duly authenticated report, may be dependent upon published design properties by others.
- 10.5 *Testing and Engineering Analysis*
 - 10.5.1 The strength, rigidity, and/or general performance of component parts and/or the integrated structure are determined by suitable tests that simulate the actual conditions of application that occur and/or by accepted engineering practice and experience.³²
- 10.6 Where additional condition of use and/or regulatory compliance information is required, please search for Trex Select Aluminum Rail on the DrJ Certification website.

11 Findings

- 11.1 As outlined in **Section 6**, Trex Select Aluminum Rail has performance characteristics that were tested and/or meet applicable regulations. In addition, they are suitable for use pursuant to its specified purpose.
- 11.2 When used and installed in accordance with this duly authenticated report and the manufacturer installation instructions, Trex Select Aluminum Rail system, supported by either the Trex Select Aluminum Post or the Trex Signature Post, shall be approved for the following applications:
- 11.2.1 Use as a guardrail system where a guardrail height of 36" or 42" is allowed in accordance with IBC Section 1015.2, IBC Section 1015.3, and IRC Section R321.³³
- 11.3 Unless exempt by state statute, when the Trex Select Aluminum Rail system is to be used as a structural and/or building envelope component in the design of a specific building, the design shall be performed by an RDP.
- 11.4 Any application specific issues not addressed herein can be engineered by an RDP. Assistance with engineering is available from Trex Company, Inc.
- 11.5 IBC Section 104.2.3³⁴ (IRC Section R104.2.2³⁵ and IFC Section 104.2.3³⁶ are similar) in pertinent part state:
- 104.2.3 Alternative Materials, Design and Methods of Construction and Equipment.** The provisions of this code are not intended to prevent the installation of any material or to prohibit any design or method of construction not specifically prescribed by this code, provided that any such alternative is not specifically prohibited by this code and has been approved.
- 11.6 **Approved:**³⁷ Building regulations require that the building official shall accept duly authenticated reports.³⁸
- 11.6.1 An approved agency is "approved" when it is ANAB ISO/IEC 17065 accredited.
- 11.6.2 An approved source is "approved" when an RDP is properly licensed to transact engineering commerce.
- 11.6.3 Federal law, Title 18 US Code Section 242, requires that, where the alternative product, material, service, design, assembly, and/or method of construction is not approved, the building official shall respond in writing, stating the reasons why the alternative was not approved. Denial without written reason deprives a protected right to free and fair competition in the marketplace.
- 11.7 DrJ is a licensed engineering company, employs licensed RDPs and is an ANAB Accredited Product Certification Body – Accreditation #1131.
- 11.8 Through the IAF Multilateral Arrangement (MLA), this duly authenticated report can be used to obtain product approval in any jurisdiction or country because all ANAB ISO/IEC 17065 duly authenticated reports are equivalent.³⁹

12 Conditions of Use

- 12.1 Material properties shall not fall outside the boundaries defined in **Section 6**.
- 12.2 As defined in **Section 6**, where material and/or engineering mechanics properties are created for load resisting design purposes, the resistance to the applied load shall not exceed the ability of the defined properties to resist those loads using the principles of accepted engineering practice.
- 12.3 Trex Select Aluminum Railings have only been evaluated for live loads for use as guards. Other loadings are outside of the scope of this report.
- 12.4 Attachment of Trex Select Aluminum Rails or Trex Signature Posts to decking other than Trex Signature, Trex Transcend Lineage, Trex Transcend, Trex Select, or Trex Enhance decking is outside of the scope of this report.
- 12.4.1 *Exception:* Decking with equivalent compressive strength is permitted.

- 12.5 Application compliant for IRC and one and two-family dwellings per the IBC.
- 12.6 The compatibility of the fasteners and all other metallic parts listed in this report with the supporting structure is outside of the scope of this report.
- 12.7 This report does not cover the compatibility of fasteners and metallic components with the support structure.
- 12.7.1 This includes treated wood products.
- 12.8 Shims are not required to prevent direct contact between the post base plate and supporting structure. Shims are permitted between the post base plate and supporting structure where necessary to plumb the posts.
- 12.9 When required by adopted legislation and enforced by the building official, also known as the Authority Having Jurisdiction (AHJ) in which the project is to be constructed:
- 12.9.1 Any calculations incorporated into the construction documents shall conform to accepted engineering practice and, when prepared by an approved source, shall be approved when signed and sealed.
- 12.9.2 This report and the installation instructions shall be submitted at the time of permit application.
- 12.9.3 This innovative product has an internal quality control program and a third-party quality assurance program.
- 12.9.4 At a minimum, this innovative product shall be installed per **Section 9**.
- 12.9.5 The review of this report by the AHJ shall comply with IBC Section 104.2.3.2 and IBC Section 105.3.1.
- 12.9.6 This innovative product has an internal quality control program and a third party quality assurance program in accordance with IBC Section 104.7.2, IBC Section 110.4, IBC Section 1703, IRC Section R104.7.2, and IRC Section R109.2.
- 12.9.7 The application of this innovative product in the context of this report is dependent upon the accuracy of the construction documents, implementation of installation instructions, inspection as required by IBC Section 110.3, IRC Section R109.2, and any other regulatory requirements that may apply.
- 12.10 The approval of this report by the AHJ shall comply with IBC Section 1707.1, where legislation states in part, *"the building official shall make, or cause to be made, the necessary tests and investigations; or the building official shall accept duly authenticated reports from approved agencies in respect to the quality and manner of use of new materials or assemblies as provided for in Section 104.2.3", all of IBC Section 104, and IBC Section 105.3.*
- 12.11 Design loads shall be determined in accordance with the regulations adopted by the jurisdiction in which the project is to be constructed and/or by the building designer (i.e., owner or RDP).
- 12.12 The actual design, suitability, and use of this report for any particular building, is the responsibility of the owner or the authorized agent of the owner.

13 Identification

- 13.1 Trex Select Aluminum Rail, as listed in **Section 1.1**, is identified by a label on the board or packaging material bearing the manufacturer name, product name, this report number, and other information to confirm code compliance.
- 13.2 Additional technical information can be found at www.trex.com.

14 Review Schedule

- 14.1 This report is subject to periodic review and revision. For the latest version, visit www.drjcertification.org.
- 14.2 For information on the status of this report, please contact DrJ Certification.

Notes

- 1 For more information, visit drjcertification.org or call us at 608-310-6748.
- 2 Capitalized terms and responsibilities are defined pursuant to the applicable building code, applicable reference standards, the latest edition of TPI 1, the [NDS](#), [AISI S202](#), [US professional engineering law](#), [Canadian building code](#), [Canada professional engineering law](#), [Qualim External Appendix A: Definitions/Commentary](#), [Qualim External Appendix B: Project/Deliverables](#), [Qualim External Appendix C: Intellectual Property and Trade Secrets](#), definitions created within Design Drawings and/or definitions within Reference Sheets. Beyond this, terms not defined shall have ordinarily accepted meanings as the context implies. Words used in the present tense include the future; words stated in the masculine gender include the feminine and neuter; the singular number includes the plural and the plural, the singular.
