- King St Closure
- # Intersection of Interest
- 72-hour volume count location

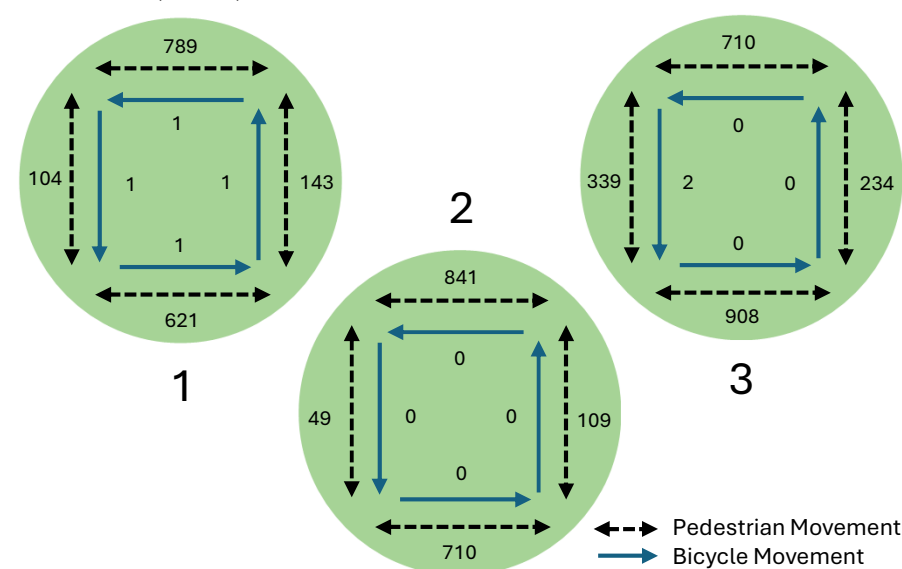

Vehicular Traffic Volume Summary

Highest Network Peak Hour: June 13, 2025, 7:15-8:15 PM

Bicycle and Pedestrian Traffic Volume Summary

June 13, 2025, 7:15-8:15 PM

The studies found that pedestrian volumes overwhelmingly outnumbered vehicular volumes—from five to twelve times as many—at each of the three studied intersections before and during the pilot, demonstrating how dedicating more space for people walking, relative to vehicles along these three blocks of King Street, is an equitable allocation of public right-of-way.
