

Docket Item # 1
BAR CASE # 2015-0142

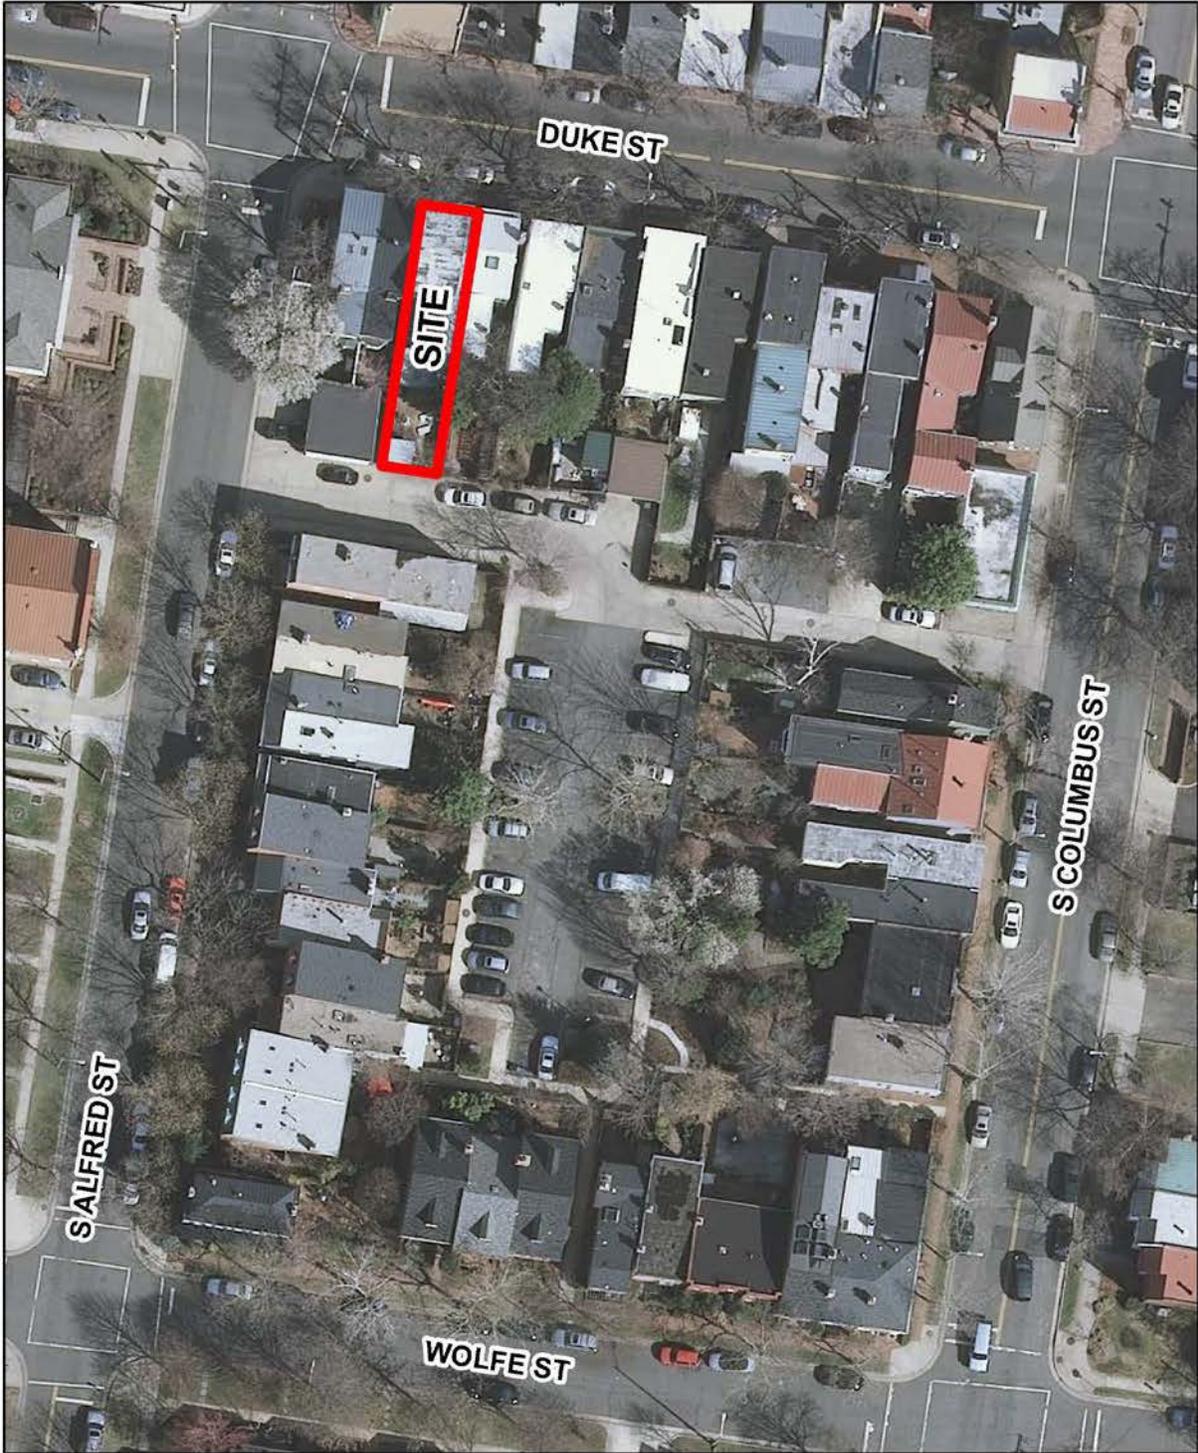

BAR Meeting
June 17, 2015

ISSUE: Alterations
APPLICANT: Joseph Johnson
LOCATION: 822 Duke Street
ZONE: RM/Residential

STAFF RECOMMENDATION: Approval of the application, as submitted.

GENERAL NOTES TO THE APPLICANT

1. **ISSUANCE OF CERTIFICATES OF APPROPRIATENESS AND PERMITS TO DEMOLISH:** Applicants must obtain a stamped copy of the Certificate of Appropriateness or Permit to Demolish PRIOR to applying for a building permit. Contact BAR Staff, Room 2100, City Hall, 703-746-3833, or preservation@alexandriava.gov for further information.
2. **APPEAL OF DECISION:** In accordance with the Zoning Ordinance, if the Board of Architectural Review denies or approves an application in whole or in part, the applicant or opponent may appeal the Board's decision to City Council on or before 14 days after the decision of the Board.
3. **COMPLIANCE WITH BAR POLICIES:** All materials must comply with the BAR's adopted policies unless otherwise specifically approved.
4. **BUILDING PERMIT NOTE:** Most projects approved by the Board of Architectural Review require the issuance of one or more construction permits by Building and Fire Code Administration (including signs). The applicant is responsible for obtaining all necessary construction permits after receiving Board of Architectural Review approval. Contact Code Administration, Room 4200, City Hall, 703-838-4360 for further information.
5. **EXPIRATION OF APPROVALS NOTE:** In accordance with Sections 10-106(B) and 10-206(B) of the Zoning Ordinance, any official Board of Architectural Review approval will expire 12 months from the date of issuance if the work is not commenced and diligently and substantially pursued by the end of that 12-month period.
6. **HISTORIC PROPERTY TAX CREDITS:** Applicants performing extensive, certified rehabilitations of historic properties may separately be eligible for state and/or federal tax credits. Consult with the Virginia Department of Historic Resources (VDHR) prior to initiating any work to determine whether the proposed project may qualify for such credits.

BAR2015-00142

I. ISSUE

The applicant requests approval of a Certificate of Appropriateness to stucco the south and west elevations of the concrete block rear additions at 822 Duke Street. In addition, the second floor brick wall on the south elevation will also be stuccoed. The applicant initially requested BAR approval of a replacement front door and a replacement fence, but has since obtained administrative approval for these features (BAR Case #2015-0177).

II. HISTORY

The subject property is a three-story, three-bay brick townhouse likely dating to the **mid-to-late 19th century** (the house is shown on the 1877 Hopkins map). Though originally two stories in height, sometime between 1896 and 1902 a half story was added, followed by a full third story by 1907. While the original two-story rear ell remains, one-, two- and three-story rear additions have been constructed around it beginning in the 1920s. Staff could find no record of any BAR approvals for any of the additions, although they may pre-date the establishment of the historic district in 1946.

In 2014, the applicant obtained BAR administrative approval for a number of alterations, including: front window repair, repointing and repainting, replacement windows in the rear and a replacement slate roof (BAR CASE #2014-0227 & 0341).

ANALYSIS

Staff has no objection to the application of a stucco finish on the exterior walls of the masonry rear additions at 822 Duke Street. These later additions were constructed of a painted concrete block, or CMU, which is now peeling and in need of repair. The second floor south elevation of the original brick ell, visible above the one-story rear addition, will also be clad with stucco because it too has been painted and repointed/repared over the years and is in poor condition. When it comes to exterior finishes, the *Design Guidelines* recommend that: “Existing historic masonry siding and walls, including brick, stone and stucco should be repaired rather than replaced.” While it would be feasible to repair and repaint the relatively small brick area, Staff supports the application of stucco in this area to help unify the rear elevations of this historic house, which the applicant is in the process of renovating.

Staff recommends approval of the application as submitted.

SUBMITTAL REQUIREMENTS:

Items listed below comprise the **minimum supporting materials** for BAR applications. Staff may request additional information during application review. Please refer to the relevant section of the *Design Guidelines* for further information on appropriate treatments.

Applicants must use the checklist below to ensure the application is complete. Include all information and material that are necessary to thoroughly describe the project. Incomplete applications will delay the docketing of the application for review. Pre-application meetings are required for all proposed additions. All applicants are encouraged to meet with staff prior to submission of a completed application.

Electronic copies of submission materials should be submitted whenever possible.

Demolition/Encapsulation : *All applicants requesting 25 square feet or more of demolition/encapsulation must complete this section. Check N/A if an item in this section does not apply to your project.*

- N/A
- Survey plat showing the extent of the proposed demolition/encapsulation.
- Existing elevation drawings clearly showing all elements proposed for demolition/encapsulation.
- Clear and labeled photographs of all elevations of the building if the entire structure is proposed to be demolished.
- Description of the reason for demolition/encapsulation.
- Description of the alternatives to demolition/encapsulation and why such alternatives are not considered feasible.

Additions & New Construction: Drawings must be to scale and should not exceed 11" x 17" unless approved by staff. All plans must be folded and collated into 3 complete 8 1/2" x 11" sets. Additional copies may be requested by staff for large-scale development projects or projects fronting Washington Street. Check N/A if an item in this section does not apply to your project.

- N/A Scaled survey plat showing dimensions of lot and location of existing building and other structures on the lot, location of proposed structure or addition, dimensions of existing structure(s), proposed addition or new construction, and all exterior, ground and roof mounted equipment.
- FAR & Open Space calculation form.
- Clear and labeled photographs of the site, surrounding properties and existing structures, if applicable.
- Existing elevations must be scaled and include dimensions.
- Proposed elevations must be scaled and include dimensions. Include the relationship to adjacent structures in plan and elevations.
- Materials and colors to be used must be specified and delineated on the drawings. Actual samples may be provided or required.
- Manufacturer's specifications for materials to include, but not limited to: roofing, siding, windows, doors, lighting, fencing, HVAC equipment and walls.
