A document that is prepared in accordance with section 13-113 of this article and good engineering practices and that identifies potential sources of pollutants that may reasonably be expected to affect the quality of stormwater discharges from the construction site, and otherwise meet the requirements of this article. In addition the document shall identify and require the implementation of control measures, and shall include, but not be limited to the inclusion of, or the incorporation by reference of, an approved erosion and sediment control plan, and a pollution prevention plan.

(XX) *Storm surge*. The resulting temporary rise in sea level due to the action of wind stress on the water surface and low atmospheric pressure created during storms which can cause coastal flooding. Surge is the difference from expected tide level. Storm tide is the total water level.

~~(UU)~~(YY) *Subdivision*. Means the same as defined in section 2-197.2 of the Alexandria Zoning Ordinance.

~~(VV)~~(ZZ) *Substantial alteration*. Expansion or modification of a building or development that would result in land disturbance exceeding an area of 2,500 square feet in the resource management area only.

~~(WWW)~~(AAA) *Tidal shore*. Land contiguous to a tidal body of water between the mean low water level and the mean high water level.

~~(XX)~~(BBB) *Tidal wetlands*. Vegetated and nonvegetated wetlands as defined in Section 28.2-1300 of the Code of Virginia.

~~(YY)~~(CCC) *Top of Bank*. To the extent applicable, top of bank shall be determined on prevailing professional standards and the best professional judgment of the director.

~~(ZZ)~~(DDD) *Total maximum daily load (TMDL)*. The sum of the individual wasteload allocations for point sources, load allocations for nonpoint sources, natural background loading, and a margin of safety. TMDLs can be expressed in terms of either mass per time, toxicity, or other appropriate measure. The TMDL process provides for point versus nonpoint source trade-offs.

~~(AAA)~~(EEE) *Use*. Any activity on the land other than development, including, but not limited to agriculture, horticulture, and silviculture.

~~(BBB)~~(FFF) *Virginia Erosion and Stormwater Management Act* (§ 62.1-44.15:24 et seq.) of Chapter 3.1 of Title 62.1 of the Code of Virginia.

~~(GGG)~~(GGG) *Virginia Stormwater BMP Clearinghouse website*. A website that contains detailed design standards and specifications for control measures that may be used in Virginia to comply with the requirements of the Virginia Erosion and Stormwater Management Act and regulations.

~~(DDD)~~(HHH) *Virginia Erosion and Stormwater Management Program (VESMP)*. A program approved by the Virginia State Water Control Board that has been established by a VESMP authority for the effective control of soil erosion and sediment deposition and the management of the quality and quantity of runoff resulting from land-disturbing activities to prevent the unreasonable degradation of properties, stream channels, waters, and other natural resources. The program shall include such items as local ordinances, rules, requirements for permits and land-disturbance approvals, policies and guidelines, technical materials, and requirements for plan review, inspection, and enforcement consistent with the requirements of the Virginia Erosion and Stormwater Management Act.

~~(EEE)~~(III) *VESMP authority*. An authority approved by the Virginia State Water Control Board to operate a VESMP. For the purposes of this article, the city is the VESMP authority.

~~(FFF)~~(JJJ) *VESMP authority permit*. An approval to conduct a land-disturbing activity issued by the city for the initiation of a land-disturbing activity after evidence

of general permit coverage has been provided where applicable. In the City of Alexandria a VESMP authority permit is not a separate permit. Rather, the issuance of a building, land use, or other land development permit is contingent on a proposed land-disturbing activity meeting all VESMP authority permit requirements in 9VAC25-875 and the requirements of this article.

~~(GGG)~~(KKK) *Water body with perennial flow.* A body of water that flows in a natural or engineered channel year-round during a year of normal precipitation. This includes, but is not limited to streams, estuaries, and tidal embayments and may include drainage ditches or channels constructed in wetlands or from former natural drainage ways that convey perennial flow. Lakes and ponds, through which a perennial stream flows, are a part of the perennial stream. Generally, the water table is located above the streambed for most of the year and groundwater is the primary source for stream flow. The width of the perennial stream extends from top-of-bank to top-of-bank of the channel or to the limits of the normal water level for a pond or lake when there is no definable top-of-bank. Acceptable methodologies for establishing the presence of a water body with perennial flow will be provided by the director of T&ES pursuant to subsection 13-104(C).

~~(HHH)~~(LLL) *Water-dependent facility.* A development of land that cannot exist outside of the resource protection area and must be located on the shoreline by reason of the intrinsic nature of its operation. These facilities include, but are not limited to:

- (i) Ports;
 - (ii) The intake and outfall structures of power plants, water treatment plants, sewage treatment plants, and storm sewers;
 - (iii) Marinas and other boat docking facilities;
 - (iv) Beaches and other public water-oriented recreation areas;
- and
- (v) Fisheries or other marine resources facilities.

~~(HH)~~(MMM) *Watershed.* The total drainage area contributing runoff to a single point.

~~(JJJ)~~ (NNN) *Wetlands.* Tidal and nontidal wetlands.

13-107 – Development, redevelopment, and uses permitted in RPAs.

The following criteria shall apply in RPAs unless the development, redevelopment, use, or land disturbing activity is exempted under section 13-123 or granted an exception pursuant to section 13-119. All development, redevelopment, and uses within the RPA must comply with the performance criteria provided in section 13-109.

- (F) The following adaptation measures are allowed within the RPA if approved by the director of T&ES and provided that a water quality impact assessment is performed and accepted by the director of T&ES as complete in accordance with section 13-117:
- (1) Be a nature-based solution adaptation measure that uses environmental processes, natural systems, or natural features, is appropriate for site conditions, and is:
 - (a) A Best Management Practice approved by the Chesapeake Bay Program Partnership;
 - (b) An approved Virginia Stormwater Best Management Practice listed in the Virginia Stormwater Best Management Practice Clearinghouse;
 - (c) An approved Shoreline Protection Strategy in accordance with the Tidal Wetlands Guidelines as determined by the Virginia Marine Resource Commission; or
 - (d) A project that is an eligible activity for funding by the Virginia Community Flood Preparedness Fund as determined by the Virginia Department of Conservation and Recreation.
 - (2) Be designed, installed, and maintained in accordance with the applicable adaptation measure specifications in accordance with the type of the adaptation measure identified in subsection (F)(1) above.
 - (3) Allow for the use of fill only under the following conditions:
 - (a) The grading and slope created by the use of fill shall be no greater than necessary based upon the project specifications and implemented in a manner that minimizes the impact of run-off;
 - (b) The fill must have the necessary biogeochemical characteristics, including sufficient organic content, to support the growth of vegetation and adequate permeability to allow infiltration consistent with the project specifications;
 - (c) The use of fill shall not enhance stormwater runoff from the RPA, and any lateral flow onto adjacent properties shall be controlled;
 - (d) Any impacts on the management of stormwater upland of the RPA created by the use of fill shall be mitigated as necessary; and
 - (e) The use of fill shall be consistent with any applicable federal or state law, including floodplain management requirements in 44 CFR Part 60 and section 6 - 300.
 - (4) Maximize preservation of existing natural vegetation, including mature trees, and minimize land disturbance consistent with the adaptation measure specifications.
 - (5) Comply with all federal, state, and local laws and requirements including any required permits and conditions.

13-117 - Water quality impact assessment.

(A) The purpose of the water quality impact assessment is to:

(5) Determine if proposed development or redevelopment within the RPA is vulnerable to sea level rise, storm surge, or flooding per subsection (C)(6) below.

(C) A water quality minor impact assessment is required for development or redevelopment within RPAs or under an exception which involves 5,000 or less square feet of land disturbance; or for any development or redevelopment within the RMA that involves 5,000 or less square feet of land disturbance adjacent to an RPA, if required by the director of T&ES due to the presence or proximity of wetlands, potential for harmful discharge of contaminants from the property, or slopes greater than 15 percent which are proposed to be disturbed. A minor assessment must demonstrate that the undisturbed buffer area, enhanced vegetative plantings, and any required BMPs will result in the removal of no less than 75 percent of sediments and 40 percent of nutrients from post-development stormwater runoff and that will retard runoff, prevent erosion, and filter nonpoint source pollution the equivalent of the full undisturbed buffer area and must include a resiliency assessment and adaptation measures if applicable. Such an assessment shall include a site plan that shows the following:

(6) For any development or redevelopment within the RPA, the water quality impact assessment shall include a resiliency assessment. The resiliency assessment shall:

(a) Be based upon a potential impact range of 30 years or the lifespan of the project if less than 30 years;

(b) Utilize a model or forecast developed by or on behalf of the Commonwealth of Virginia;

(c) Identify potential impacts:

(i) From projected sea-level rise using the 2017 National Oceanographic and Atmospheric Administration (NOAA) Intermediate-High scenario projection curve or any subsequently updated version thereof, on the project site;

(ii) From storm surge based upon the most updated NOAA hydrodynamic Sea, Lake, and Overland Surges from Hurricanes model on the project site; and

(iii) From flooding based upon the most updated Special Flood Hazard Area and the Limit of Moderate Wave Action on the project site. Such assessment of flooding should be in conjunction with the requirements and application of floodplain management requirements and programs.

(d) Based upon the assessment, the director of T&ES, as necessary and appropriate, shall require conditions, alterations, or the installation of adaptation measures as part of the proposed land development consistent with the requirements of section 13-107 (F).

Section 2. That the director of planning and zoning be, and hereby is, directed to record the foregoing text amendment.

Section 3. That Article XII, as amended pursuant to Section 1 of this ordinance, be, and the same hereby is, reordained as part of the City of Alexandria Zoning Ordinance.

Section 4. That this ordinance shall become effective on the date and at the time of its final passage, and shall apply to all applications for land use, land development or subdivision approval provided for under the City of Alexandria Zoning Ordinance which may be filed after such date, and shall apply to all other facts and circumstances subject to the provisions of the City of Alexandria Zoning Ordinance, except as may be provided in Article XII of the Zoning Ordinance.

11. City Council adopted an ordinance to amend and reordain Section 5-6-229.10 (PENALTIES) of Division 4 (FATS, OILS, AND GREASE [FOG], FOG MANAGEMENT), Article B (SEWAGE DISPOSAL AND DRAINS) of Title 5 (TRANSPORTATION AND ENVIRONMENTAL SERVICES) of the Code of the City of Alexandria, Virginia, 1981, as amended.
