DESCRIPTION OF PROPOSED WORK: *Please describe the proposed work in detail (Additional pages may be attached).*

SUBMITTAL REQUIREMENTS:

- ☐ Check this box if there is a homeowner's association for this property. If so, you must attach a copy of the letter approving the project.

Items listed below comprise the **minimum supporting materials** for BAR applications. Staff may request additional information during application review. Please refer to the relevant section of the *Design Guidelines* for further information on appropriate treatments.

Applicants must use the checklist below to ensure the application is complete. Include all information and material that are necessary to thoroughly describe the project. Incomplete applications will delay the docketing of the application for review. Pre-application meetings are required for all proposed additions. All applicants are encouraged to meet with staff prior to submission of a completed application.

Demolition/Encapsulation : *All applicants requesting 25 square feet or more of demolition/encapsulation must complete this section. Check N/A if an item in this section does not apply to your project.*

- N/A
- ☐ ☐ Survey plat showing the extent of the proposed demolition/encapsulation.
- ☐ ☐ Existing elevation drawings clearly showing all elements proposed for demolition/encapsulation.
- ☐ ☐ Clear and labeled photographs of all elevations of the building if the entire structure is proposed to be demolished.
- ☐ ☐ Description of the reason for demolition/encapsulation.
- ☐ ☐ Description of the alternatives to demolition/encapsulation and why such alternatives are not considered feasible.

BAR - Description of Proposed Work for 910 King Street Revised May 20, 2025

1. Roof Terrace

A new Roof Terrace is to be installed ~~on top of~~ above the existing roof. The third floor will have a new stair up to the new Roof Terrace. The Roof Terrace Vestibule will be located at the southwest corner of the roof. The existing brick knee wall located on the roof close to the north elevation is to ~~be demolished~~ and will support the new painted wrought iron railing roof feature. A simpler designed painted wrought iron deck railing will be held back 4'-0" from the front elevation and will surround the new deck on the east, south and west elevation. The deck is raised 2'-6" above the roof level at the north elevation to allow for maintenance to the existing roof. The roof slopes to the rear. The stair to the roof terrace is housed in a vestibule that is 8'-0" above the deck and is approximately 5'-6" above the rear roof level.

~~A proposed painted wrought iron roof feature will be visible on the front elevation and will be part of the painted wrought iron deck railing around the roof terrace on the east, south and west elevation.~~

2. Painting the existing exterior brick

The existing brick of the building has substantial signs of deterioration and will be repaired on all elevations of the building. The east, south and west brick facades have been painted in the past and will be repaired, re-pointed, and re-painted to prohibit further deterioration. *On the west elevation it has been determined that the removal of the existing areas containing concrete/parging/paint will irreparably the historic brick.* The front elevation has been painted and/or stained in the past and it is proposed to ~~also be painted~~ re-stained if necessary, post cleaning.

3. Entry Stoop

The front entry stoop will be repaired ~~and painted~~ in kind or replaced to match the existing stone as close to possible. New painted wrought iron railings will be installed on each side of the stoop.

4. New Front Door

A new ~~metal~~ painted full light wood front door with thin wrought iron element similar to the design as the stoop railing will be installed in the existing opening at the face of the front elevations.

5. Rear Door

The existing rear door and sidelights to remain will be repaired and painted.

6. Structural Tie Rods

New structural tie rods will be installed to stabilize the east and west brick walls. Tie rods with caps will be installed on the east and west faces of the building and will be visible on the west elevation. The six caps of the rods will be a painted decorative symbol.

7. Windows

Three windows on the west facade will be removed and the openings will be in-filled with brick. These windows on the first, second and third floor will be blocked on the interior with the installation of a new interior lift. *These windows are not original to the building and were added at some time after the demolition of the building that shared the west party wall.*

One window on the east elevation will be replaced with a glass block window or infilled with brick on the third floor in the location of a new bathroom shower.

8. Existing Wrought Iron Gate

The existing wrought iron gate into the alley to the east of the building will remain and will be cleaned, repaired, and painted.

9. Brick wall and railing on the west

The existing low brick wall and railing attached to the front northwest corner of the building will remain and be cleaned and repainted.

10. Painting

The existing windows to remain will be repaired as needed and the wood sashes, sills, frames, and trim will be painted. The existing cornice and copings on the roof will be painted.

11. Signage

A new sign for the retail establishment will be installed on the existing sign bracket *for the Café.*

Two new building signs will be installed on the north elevation. *The sign on the roof will be attached to the face of the existing brick knee wall. The sign above the front door entablature will be installed on a track and not attached to the face brick.*

12. Lighting

Front Elevation: new wall mounted lights will be installed on either side of the existing front door. Small goose neck lights on the café sign. ~~Linear strip LED lighting will be installed above each window lintel and above two areas of the front door on the front elevation.~~ Ground level spotlights will be installed on the front elevation at the base of the bay brick piers and at the piers flanking the front door. *A new flood light will be installed on the brick ledge in the middle of the bay to light the bay.* At the base of the sign slightly in front of the existing knee wall at the roof 2 to 3 small flood lights will be installed to light the building sign and roof element. ~~roof deck under "THE KING" building signage and decorative roof railings will be 6 flood lights.~~ At the base of the west elevations there will be 5 to 6 flood lights to up light the wall.

Additions & New Construction: Drawings must be to scale and should not exceed 11" x 17" unless approved by staff. Check N/A if an item in this section does not apply to your project.

- ☐ ☐ ^{N/A} Scaled survey plat showing dimensions of lot and location of existing building and other structures on the lot, location of proposed structure or addition, dimensions of existing structure(s), proposed addition or new construction, and all exterior, ground and roof mounted equipment.
- ☐ ☐ FAR & Open Space calculation form.
- ☐ ☐ Clear and labeled photographs of the site, surrounding properties and existing structures, if applicable.
- ☐ ☐ Existing elevations must be scaled and include dimensions.
- ☐ ☐ Proposed elevations must be scaled and include dimensions. Include the relationship to adjacent structures in plan and elevations.
- ☐ ☐ Materials and colors to be used must be specified and delineated on the drawings. Actual samples may be provided or required.
- ☐ ☐ Manufacturer's specifications for materials to include, but not limited to: roofing, siding, windows, doors, lighting, fencing, HVAC equipment and walls.
- ☐ ☐ For development site plan projects, a model showing mass relationships to adjacent properties and structures.

Signs & Awnings: One sign per building under one square foot does not require BAR approval unless illuminated. All other signs including window signs require BAR approval. Check N/A if an item in this section does not apply to your project.

- ☐ ☐ ^{N/A} Linear feet of building: Front: _____ Secondary front (if corner lot): _____.
- ☐ ☐ Square feet of existing signs to remain: _____.
- ☐ ☐ Photograph of building showing existing conditions.
- ☐ ☐ Dimensioned drawings of proposed sign identifying materials, color, lettering style and text.
- ☐ ☐ Location of sign (show exact location on building including the height above sidewalk).
- ☐ ☐ Means of attachment (drawing or manufacturer's cut sheet of bracket if applicable).
- ☐ ☐ Description of lighting (if applicable). Include manufacturer's cut sheet for any new lighting fixtures and information detailing how it will be attached to the building's facade.

Alterations: Check N/A if an item in this section does not apply to your project.

- ☐ ☐ ^{N/A} Clear and labeled photographs of the site, especially the area being impacted by the alterations, all sides of the building and any pertinent details.
- ☐ ☐ Manufacturer's specifications for materials to include, but not limited to: roofing, siding, windows, doors, lighting, fencing, HVAC equipment and walls.
- ☐ ☐ Drawings accurately representing the changes to the proposed structure, including materials and overall dimensions. Drawings must be to scale.
- ☐ ☐ An official survey plat showing the proposed locations of HVAC units, fences, and sheds.
- ☐ ☐ Historic elevations or photographs should accompany any request to return a structure to an earlier appearance.

ALL APPLICATIONS: *Please read and check that you have read and understand the following items:*

- ☒ I understand that after reviewing the proposed alterations, BAR staff will invoice the appropriate filing fee in APEX. The application will not be processed until the fee is paid online.
- ☒ I understand the notice requirements and will return a copy of the three respective notice forms to BAR staff at least five days prior to the hearing. If I am unsure to whom I should send notice I will contact Planning and Zoning staff for assistance in identifying adjacent parcels.
- ☒ I, the applicant, or an authorized representative will be present at the public hearing.
- ☒ I understand that any revisions to this initial application submission (including applications deferred for restudy) must be accompanied by the BAR Supplemental form and revised materials.

The undersigned hereby attests that all of the information herein provided including the site plan, building elevations, prospective drawings of the project, and written descriptive information are true, correct and accurate. The undersigned further understands that, should such information be found incorrect, any action taken by the Board based on such information may be invalidated. The undersigned also hereby grants the City of Alexandria permission to post placard notice as required by Article XI, Division A, Section 11-301(B) of the 1992 Alexandria City Zoning Ordinance, on the property which is the subject of this application. The undersigned also hereby authorizes the City staff and members of the BAR to inspect this site as necessary in the course of research and evaluating the application. The applicant, if other than the property owner, also attests that he/she has obtained permission from the property owner to make this application.

APPLICANT OR AUTHORIZED AGENT:

- About this item**
- **[Smart Bluetooth flood lights outdoor/indoor]** Led flood light with APP control: 30W, Warm White (2700K), CRI>85, 3000LM; 16 million multicolor static colors and 23 dynamic modes, include "DIY Flash" mode, and "DIY fade" mode, group control, single control, timing function, strobe, DIY scenes. Suitable for daily, mood and decorative lighting. Such as you can use it as landscape lighting, stage lights, spotlight, strobe lights, accent lighting, background lights, security lights, wash lights, floor light. No registration nor internet required.
 - **[New Tech]** Equipped with Bluetooth 5.0 chip, Mesh function enabled. Practical user interface allows free control to any number of floodlights as desired. An excellent solution to multi-light operation, which overcomes the shortcomings of remote control lights and WIFI lights. The connection is simpler and more stable. More control quantity, more control distance. When it rains or snows, you can easily control all flood lights outdoor at home.
 - **[Timing Function and Synchronization]** Built-in newly developed timing chip allows you to set your favorite color or mode to automatically turn on and off on time every day. And when we use the (strobe, smooth, flash) modes, the rhythm of the color change of the floodlight can be kept consistent.
 - **[DIY Scenes]** You can set the color or mode for each lamp individually, then match it to your favorite scenes (such as party, BBQ, garden, garage, tree lights, up lighting for wedding, Halloween outdoor lights, Christmas lights, Valentine's Day decoration and other festival decoration, etc), save it and activate it with one click at any time.
 - **[Aftersales Service]** 2-years-warranty, 90-days-money-back guarantee. High quality standard and friendly customer service. For any issues relating to the product, please do not hesitate to contact us.

About this item

- Multiple Colors and Music Sync: The LED strip has multiple RGB colors and can be adjusted for brightness. There are 29 dynamic modes that can be synchronized with your music and change with the rhythm to bring you rave enjoyment.
- Easy Installation: Using fixing clips with screws, it can be firmly fixed on the surface of the house. The installation is very easy and can be used in outdoor scenes such as courtyards, roofs, and pool surfaces.
- Intelligent APP Timing: Download the 'Lotus Lantern' application to preset the RGB LED to turn on and off at specific times and set the color at the same time. The LED strip also has an upgraded 44-key IR remote control and a three-button switch for several control options.
- Quality Guarantee and Quick Customer Service: If you encounter any problems during the installation process, please contact us and we will solve the problem within 24 hours. If the product has quality problems, within 30 days we can give full refund.
- Large LED Strip with DIY Design: With 100 feet of length, the LED strip can cover most areas of your home. The cuttable DIY design allows you to adjust the length of each section to decorate your living room, kitchen, bar, bedroom, garage and other places.
