**Subject:** RE: Seminary Road Complete Streets: Emergency Apparatus Concerns

Hillary,

Thank you and your staff for working with AFD. AFD was a part of the complete street program and discussions surrounding the Seminary Road project. Internally, we have discussed our position on the Seminary Road Complete Streets after additional briefings provided by your staff. Therefore, the Fire Department could accept the elements of the proposal over the entire span of the project. For Optimal fire department operations and response efficiencies, it is AFD's position to consider Option 3.

Thank you

Corey
