PLANNING COMMISSION ACTION, OCTOBER 9, 2025: On a motion by Vice Chair Koenig, seconded by Commissioner Manor, the Planning Commission voted unanimously to approve Special Use Permit #2025-00044. The motion carried on a vote of 7-0 on the Consent Calendar.

I. DISCUSSION

The applicant, KAPS LLC, requests Special Use Permit approval for a floor area ratio (FAR) up to 2.5 for expansion of the auxiliary dwelling on the upper floors of an existing building located at 107 North Fairfax Street.

SITE DESCRIPTION

The subject property contains one lot of record with 28.2 feet of frontage along North Fairfax Street. Its lot size is 2,028 square feet. A mixed-use building occupies the subject property with restaurant/retail on the first floor and auxiliary dwellings on the upper floors. In total, the building contains approximately 3,542 square feet of net floor area. A mix of commercial and residential uses surround the property. Additionally, the subject property is within the Old and Historic Alexandria District. As such, any addition to the property would require approval from the Board of Architectural Review.

Figure 1 – Subject property

BACKGROUND

The subject property was originally constructed in the late eighteenth century as a single-unit dwelling. Sometime between 1841 and 1885, the building's primary use changed to become a bakery. Between 1885 and 1946, the building's use changed multiple times, including office and retail uses. By 1946, the building was being used as an antique shop on the ground floor with two apartments on the upper floors.

In 1967, a building permit was approved to construct a two-story addition, which resulted in the building's current condition. The ground floor of the building has been occupied by the Dolci Gelati Café since 2015, with auxiliary dwellings on the upper floors.

AUXILIARY DWELLINGS

Auxiliary dwellings are defined in Section 2-136.2 of the Zoning Ordinance as "a portion of a commercial building containing up to four dwelling units located on a ground floor or floors above or below retail or commercial uses." The CD zone categorizes auxiliary dwellings as nonresidential for the purpose of applying the zone's bulk and open space requirements. Given this, the building and proposal would be subject to the CD zone's nonresidential FAR requirements and would be exempt from providing open space or setbacks.

PROPOSAL

The applicant proposes to combine the existing auxiliary dwelling units on the upper floors into a single auxiliary dwelling unit and to construct an addition to the upper floors. There would be no change in the building's footprint. The applicant proposes renovations and additions to the upper floor. The work would include a fourth-floor front and rear dormer expansion with a rooftop deck and pergola connected to a third-floor rear balcony via metal stairs. The proposed addition would be 894 square feet, bringing the building to a total of 5,070 square feet of floor area (2.5 FAR). At the project's conclusion, one auxiliary dwelling unit would be provided and the first floor of the building would remain commercial. The applicant requests SUP approval to allow for a nonresidential floor area (FAR) of 2.5 for the proposed expansion. See proposed elevations in Figures 2 and 3, below.

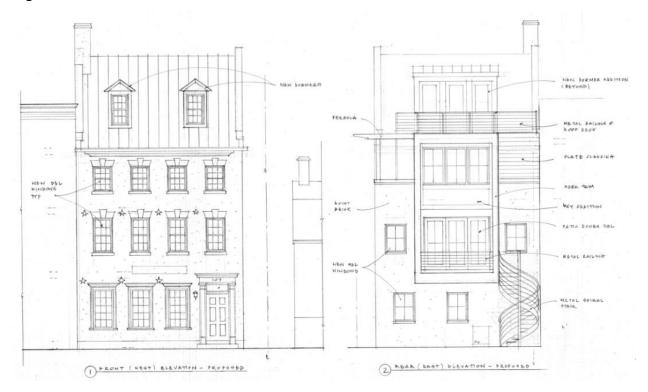

Figure 2 – Proposed front (west) and rear (east) elevations

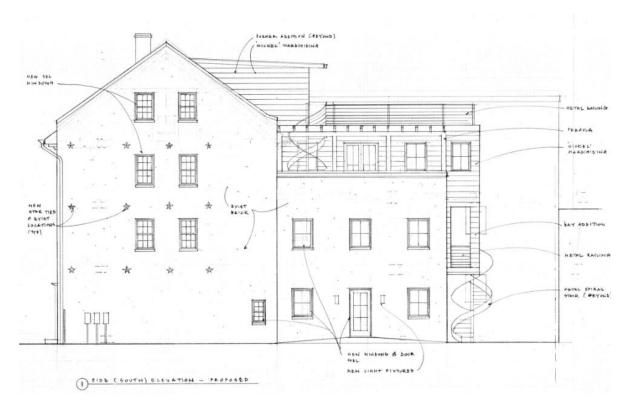

Figure 3 – Proposed side (south) elevation

PARKING

The subject property is located in the Enhanced Transit Area as well as the Central Business District. Per Section 8-300(B), within the central business district the "provisions of section 8-200(A) shall not apply to restaurants and outdoor dining." As such, there is no parking requirement for the ground floor restaurant use. In addition, auxiliary dwellings in the CD zone do not have a minimum parking requirement within the Enhanced Transit Area. Therefore, the subject property does not have a minimum parking requirement.

ZONING/MASTER PLAN DESIGNATION

The subject property is zoned CD/Commercial Downtown. The CD zone allows a maximum 1.5 FAR for nonresidential uses and allows up to 2.5 FAR with SUP approval.

The existing building provides 3,542 square feet of non-residential floor area, which, based on its lot size, results in a floor area ratio (FAR) of 1.75. When the building was last expanded in 1967, the subject property was zoned C-3/Commercial. The C-3 zone allowed a maximum FAR of 3.0. Along with the City's 1992 comprehensive Zoning Ordinance re-write, the subject property was rezoned to CD/Commercial Downtown. The CD zone permits a maximum FAR of 1.5 for non-residential uses. The existing building became noncomplying with regard to FAR with the 1992 rezoning.

With the proposed renovations, the building would provide 5,070 square feet of non-residential floor area or a non-residential FAR of 2.5. Because the FAR would exceed what would be permitted by-right, the proposed non-residential floor area requires SUP approval.

The proposal is not subject to yard or open space requirements because the CD zone exempts nonresidential uses from these requirements.

The Old Town Small Area Plan (SAP) and the King Street Retail Strategy envision active ground floor uses at the subject property and encourage full utilization of upper floors with uses that support an active and vibrant area. Both envision residential uses on upper floors of buildings within the SAP.

II. STAFF ANALYSIS

Staff recommends approval of the SUP request to allow up to 2.5 non-residential FAR to expand the existing building's upper floors. The applicant's proposal would be consistent with the King Street Retail Strategy which encourages redevelopments that "facilitate the addition of upper floor uses, such as retail, residential and office, that are appropriate to enhancing and energizing King Street." As such, the retention of the existing ground floor restaurant use and the expansion of the upper floors' auxiliary dwelling would maintain the site's consistency with the SAP and the King Street Retail Strategy.

BULK AND COMPATIBILITY

Staff recommends approval of the applicant's request for increased floor area. One of the key considerations for this type of request is whether the proposed FAR and resulting structures would be compatible with its surroundings. Technically, section 11-504 states that Council may consider whether the use "will be constructed, arranged and operated so as not to dominate the immediate vicinity or to interfere with the development and use of neighboring property." Staff supports the request because it will not dominate the surrounding uses given it would be consistent in design with neighboring buildings with regard to height, mass, and scale, and would be compatible with the character of the neighborhood.

While City Council may consider the request for general compatibility, the final design appropriateness would be determined by the Board of Architectural Review (BAR). City Council approval of the request would allow an FAR of up to 2.5 for the proposed addition. The BAR would determine the proposal's compatibility with the Old and Historic Alexandria District (OHAD) design guidelines.

The proposed FAR of the subject property would be within the range of those of the surrounding buildings in the CD zone, see Table 1, below. Additionally, the proposed height of 35.5 feet would be under the maximum height permitted for the zone and would be comparable to the surrounding properties.

ADDRESS	FAR	Floor Area
107 N. Fairfax St.	2.5	5,070 Sq. Ft.
109 N. Fairfax St.	2.71	3,996 Sq. Ft.
113 N. Fairfax St.	3.11	3,324 Sq. Ft.
115 N. Fairfax St.	1.25	3,935 Sq. Ft.
117 N. Fairfax St.	1.53	7,028 Sq. Ft.

Table 1: Surrounding Property's FARs

The subject property is also directly across the street from City Hall which has a floor area of approximately 100,000 square feet.

The proposed increase in FAR will not have any undue adverse effect upon adjacent and surrounding property or the character of the neighborhood as it maintains the vision of the King Street Retail Strategy for active ground floor uses with auxiliary residential dwellings on the upper floors. In terms of neighborhood compatibility, while the proposed rear addition would be somewhat visible from King Street, it would be fairly screened by existing trees and shrubbery. Except for the additional proposed dormer on the front, a majority of the proposed addition would not be visible from North Fairfax Street.

Overall, the requested increase in FAR would not impact the surrounding neighborhood because the proposed expansion would be within the size range of neighboring buildings and would be in character with this area of Old Town. All changes would continue to facilitate the active mixed uses envisioned by the King Street Retail Strategy.

OTHER CONSIDERATIONS

Staff notified the Old Town Civic Association on September 15, 2025. No comments or questions have been received as of the publication of this report.

Staff recommends approval of the Special Use Permit request.

STAFF: Tony LaColla, AICP, Division Chief, Department of Planning and Zoning Sam Shelby, Principal Planner, Department of Planning and Zoning Catherine McDonald, Urban Planner, Department of Planning and Zoning

<u>Staff Note:</u> In accordance with section 11-506(c) of the zoning ordinance, construction or operation shall be commenced and diligently and substantially pursued within 18 months of the date of granting of a special use permit by City Council or the special use permit shall become void.

If property owner or applicant is being represented by an authorized agent such as an attorney, realtor, or of which there is some form of compensation, does this agent or the business in which the agent is employed business license to operate in the City of Alexandria, Virginia?	
[v] Yes. Provide proof of current City business license	
[] No. The agent shall obtain a business license prior to filing application, if required by the City Code.	
NARRATIVE DESCRIPTION	
3. The applicant shall describe below the nature of the request in detail so that the Planning Common Council can understand the nature of the operation and the use. The description should fully discuss the activity. (Attach additional sheets if necessary.)	
We are requesting and increase in FAR from 1.5 to 2.5 to allow for an expansion of the building. The first floor will remain unchanged as retail, and the upper two apartments will remain as residential but will be renovated and expanded. The owners intend to make the upper floor of the building their full time residence. Currently the building does not comply with the FAR, so the proposed increase will bring the property into compliance and allow for the expansion. The existing building is	
smaller than the surrounding properties and the proposed increase is relatively small compared to the density of its neighbors. Their are no significant changes to the front elevation, other than proposed new	
dormers on the 4th floor, and the Small Area Plan 'Active Streetscape' will be maintained. The majority of the expansion will occur at the rear of the property with an expansion of the Third Floor and moving the existing roof deck from the Third Floor to the Fourth floor as to not loose usable outdoor space. This will be obliquely visible from	
King Street behind the Ramsay House garden. With the propsed rear staircase from the Second floor to the rear yard, the existing outdoor space becomes better connected to the building. The addition is set back from the South elevatrion to	
maintain the historical story line of the property.	

USE CHARACTERISTICS

Pleas	se describe the capacity of the p	roposed use:
