#### PLANNING COMMISSION ACTION, SEPTEMBER 6, 2022:

On a motion by Vice Chair McMahon, seconded by Commissioner Lyle, the Planning Commission voted to recommend approval of Special Use Permit #2022-00052. The motion carried on a vote of 7-0.

### PROJECT LOCATION MAP

#### I. REPORT SUMMARY

#### **REQUEST**

The applicant, the City of Alexandria Department of Recreation, Parks and Cultural Activities (RPCA), requests Special Use Permit approval to allow athletic safety netting and fencing up to 30 feet in height for three athletic fields as part of the renovation of Joseph Hensley Park, located at 4200 Eisenhower Avenue.

#### SITE DESCRIPTION

Joseph Hensley Park (Hensley Park) is a 14.76-acre public City park located in the Eisenhower Avenue corridor area. Hensley Park is different from the rest of Alexandria's citywide parks because it is remotely located, apart from residential neighborhoods. The park is bound by the Capital Beltway to the south, Eisenhower Avenue to the north, and WMATA Metrorail and CSX railroad tracks to the west. A City recycling drop-off center is located north across Eisenhower Avenue from the park. The park is partially located in the flood basin of Cameron Run, a tributary stream of the Potomac River which runs along the east side of the park.

The site is zoned POS/Public Open Space and Community Recreation zone and has been used as an active recreation site since the City's acquisition of the property in 1977. A Land and Water Conservation Fund grant was awarded to the City to assist in purchasing the property. Development on the site is restricted to recreation uses in perpetuity based on the terms of the grant.

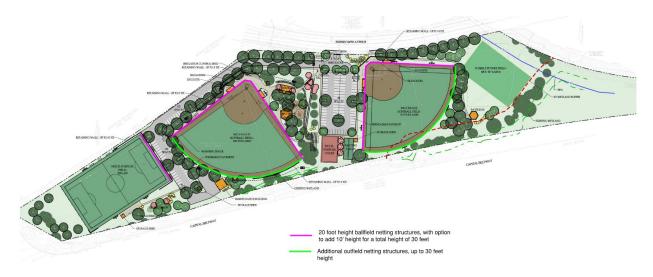

#### **BACKGROUND**

On March 2, 2021, the Planning Commission approved Development Site Plan #2020-00027, to renovate the park, with increases in parking spaces and amenity improvements at the City Park. All the proposed park renovations are consistent with the Citywide Parks Improvement Plan 2014 recommendations and were endorsed by the Parks and Recreation Commission on January 21, 2021. The renovations involve replacing three softball diamond fields with two regulations sized adult softball fields, and to replace the synthetic turf rectangular multi-purpose field. Since the approval, RPCA has clarified that the height needed for fencing and netting around the proposed new fields exceeds the maximum 15-foot height limit for structures in the POS zone and now requests approval for these additional structures. Due to Hensley Park's location near heavy vehicle traffic at its borders, special accommodations are needed to protect traffic from athletic balls that may leave the athletic fields. The proposed SUP application request and updates on the Park's renovation were shared at the July 21, 2022, Parks and Recreation Commission meeting, with no comments or issues raised.

#### **PROPOSAL**

The applicant proposes to install safety netting and fencing around the three athletic fields at Hensley Park in order to protect adjacent roadways from errant soccer balls, softballs and baseballs, and similar sporting projectiles that typically travel through the air during sports games and practices. The request involves two proposals. The first proposal is to install 20-foot tall netting on the east side of the multi-purpose field, 20-foot tall backstop fencing behind the two softball field home plates, and 20-foot netting along the first and third line for the two softball fields. These areas are indicated by pink lines in the graphic below. This proposed netting and fencing currently have funding to meet the initial anticipated safety needs of the athletic fields.

The second half of the request involves allowing the proposed netting and fencing to be extended an additional 10 feet in height, up to 30 feet, if after installation it is found that the initial fencing height is not providing enough protection. Additionally, RPCA is requesting that netting structures measuring up to 30 feet in height be approved along the two outfields of the softball fields in case balls leaving the field are causing disturbance to the Capital Beltway to the south. This additional netting, indicated by green lines in the graphic below, would only be built if needed and are not currently part of the funding for the park renovations.

#### ZONING/MASTER PLAN DESIGNATION

The subject property is zoned POS/Public Open Space. Section 6-106(A) of the Zoning Ordinance allows structures greater than 15 feet in height, up to a maximum of 30 feet, with Special Use Permit approval. The proposed use is consistent with the Eisenhower West Small Area Plan chapter of the Master Plan which designates the property for public recreation uses.

#### II. STAFF ANALYSIS

Staff supports the request to install new safety netting and fencing at the Hensley Recreational Fields, which requires SUP approval given that its height would exceed 15 feet. The proposal includes common recreational accessories found around recreational fields that will reduce the likelihood for damage to adjacent roadways and parking areas due to athletic projectiles. Visual impacts from the netting are expected to be minimal given that the netting material is quite thin and fairly transparent. Additionally, staff supports the request for future netting height and coverage and is recommending that this approval be extended up to five (5) years in order to

provide RPCA staff, through a Director determination, the necessary approval to obtain permits for additional netting and fencing up to 30 feet to address public safety and welfare needs as quickly as possible.

Overall, staff views the proposal as a sensible and reasonable improvements to the renovated athletic fields for a highly used City park. Subject to the conditions contained in Section III of this report, staff recommends approval of the request.

#### III. RECOMMENDED CONDITIONS

Staff recommends **approval** subject to compliance with all applicable codes and ordinances and the following conditions:

- 1. This approval is for five (5) years and must be consistent with the approved site plan. This will allow for the proposed netting and fencing to be installed with the park renovations to address issues of public safety and welfare once the athletic fields are in full operational use.
- 2. Additional fencing and netting, up to a maximum of 30 feet in height, shall be permitted around all athletic fields, if found necessary for public safety and welfare by the Director of Recreation, Parks and Cultural Activities.
- 3. Coordinate site improvements in a manner that ensures adequate maintenance access for athletic fields. (RP&CA)
- 4. Perimeter safety fence for rectangular and diamond fields shall be designed and located to the satisfaction of the Director of Recreation, Parks and Cultural Activities. All fencing material, not including safety netting, shall be dark green vinyl-coated. (RP&CA)(P&Z)

#### IV. CITY DEPARTMENT COMMENTS

which there is some form of compensation, does this agent or the business in which the agent is employed business license to operate in the City of Alexandria, Virginia?	•
[ ] <b>Yes.</b> Provide proof of current City business license	
[ ] <b>No.</b> The agent shall obtain a business license prior to filing application, if required by the City Code.	
NARRATIVE DESCRIPTION	
<b>3.</b> The applicant shall describe below the nature of the request <b>in detail</b> so that the Planning Commouncil can understand the nature of the operation and the use. The description should fully discuss the activity. (Attach additional sheets if necessary.)	
The Department of Recreation, Parks and Cultural Activities (RPCA) requests a total of three structures of twenty (20) foot tall athletic field netting and fencing, with two netting and fencing backstop structures along first and third baselines of the two diamond ballfields, and one netting structure along the eastern side of the rectangle field. The netting provides additional safety to pedestrians, park users, vehicles, and the adjacent roads including I-495 from aerial projecting balls associated with the normal use of athletic fields.	
Additionally, RPCA is requesting the following additional height if needed in the future:10 feet of height be granted for all 20 foot height netting structures, allowing the structures to be built up to 30 feet in height	
Additional outfield netting for the two diamond ballfields, up to 30 feet in height	
This request for additional height is being made if it's found that the 20 foot structures do not adequately keep projectiles from leaving the playing areas. If after the 20 foot fencing is constructed, RPCA will determine if the additional height is needed for public safety and welfare.	

#### **USE CHARACTERISTICS**
