

ISSUE: Permit to Demolish/Capsulate (partial) and Certificate of Appropriateness for alterations

APPLICANT: Mathew R. McBrady

LOCATION: Old and Historic Alexandria District
411 Prince Street

ZONE: RM/Residential Townhouse Zone

STAFF RECOMMENDATION

Staff recommends approval of the Permit to Demolish/Capsulate (partial) and Certificate of Appropriateness for the removal and replacement of the garden wall as submitted.

GENERAL NOTES TO THE APPLICANT

1. **APPEAL OF DECISION:** In accordance with the Zoning Ordinance, if the Board of Architectural Review denies or approves an application in whole or in part, the applicant or opponent may appeal the Board's decision to City Council on or before 14 days after the decision of the Board.
2. **COMPLIANCE WITH BAR POLICIES:** All materials must comply with the BAR's adopted policies unless otherwise specifically approved.
3. **BUILDING PERMITS:** Most projects approved by the Board of Architectural Review require the issuance of one or more construction permits by Department of Code Administration (including signs). The applicant is responsible for obtaining all necessary construction permits after receiving Board of Architectural Review approval. Contact Code Administration, Room 4200, City Hall, 703-746-4200 for further information.
4. **ISSUANCE OF CERTIFICATES OF APPROPRIATENESS AND PERMITS TO DEMOLISH:** Applicants must obtain a copy of the Certificate of Appropriateness or Permit to Demolish PRIOR to applying for a building permit. Contact BAR Staff, Room 2100, City Hall, 703-746-3833, or preservation@alexandriava.gov for further information.
5. **EXPIRATION OF APPROVALS NOTE:** In accordance with Sections 10-106(B), 10-206(B) and 10-307 of the Zoning Ordinance, any Board of Architectural Review approval will expire 12 months from the date of issuance if the work is not commenced and diligently and substantially pursued by the end of that 12-month period.
6. **HISTORIC PROPERTY TAX CREDITS:** Applicants performing extensive, certified rehabilitations of historic properties may separately be eligible for state and/or federal tax credits. Consult with the Virginia Department of Historic Resources (VDHR) prior to initiating any work to determine whether the proposed project may qualify for such credits.

Update:

At the December 18, 2024 BAR hearing, the Board accepted a request from the applicant for a partial deferral of the application to include the removal and replacement of the garden wall at the east side of the property, adjacent to the sidewalk. At that time, the Board approved the work related to the infill of the window on the west side of the structure. The applicant returns to the Board at this time for approval of the Permit to Demolish and Certificate of Appropriateness for the removal and replacement of the garden wall.

I. APPLICANT'S PROPOSAL

The applicant requests a Permit to Demolish/Capsulate (partial) and Certificate of Appropriateness to replace a section of masonry fence adjacent to the sidewalk with a new wood fence to match the existing wood fence in a similar location but located at the property line (Figure 1).

Figure 1: Proposed brick wall to be replaced

Site context

The building is located on the north side of the 400 block of Prince Street. The subject wall separates the parking area at 411 Prince Street from the parking area at 409 Prince Street and is visible from Prince Street.

II. HISTORY

The structure at 411 Prince Street dates from the **middle of the 19th century** and is therefore considered to be an Early building. The structure appears on the 1877 Hopkins Map. Ethelyn Cox's *Historic Alexandria Virginia Street by Street*, lists the property as "brick, 3 stories, mid 19th century."

The wall proposed to be replaced is not original to the structure. As seen in the undated photograph of the building provided by the applicant (Figure 2), the original site configuration did not include the curb cuts and associated parking areas. Instead, there appears to be a wood fence separating the two yards with a pier of some material adjacent to the sidewalk. While this photograph is undated, it appears to date from prior to 1958. Permit #13908 from February 1958 includes work on the east side of the rear ell which transformed it from the screen porch shown in the photograph to the current configuration. While staff has been unable to assign an exact date to the subject wall it appears to have been constructed at some point **after 1958**.

Figure 2: Photograph showing site configuration prior to the construction of the subject brick wall

Previous BAR Approvals for the building

- Permit 13908 – February 1958 – Window modifications including installation of window on west elevation now being proposed to be infilled, and changes to side porch
- BLD97-00487 – Remove and install new roof (Note: no BAR approval located for this work)

III. ANALYSIS

Permit to Demolish/Capsulate

In considering a Permit to Demolish/Capsulate, the Board must consider the following criteria set forth in the Zoning Ordinance, §10-105(B), which relate only to the subject property and not to neighboring properties. The Board has purview of the proposed demolition/capsulation regardless of visibility.

Standard	Description of Standard	Standard Met?
(1)	Is the building or structure of such architectural or historical interest that its moving, removing, capsulating or razing would be to the detriment of the public interest?	No
(2)	Is the building or structure of such interest that it could be made into a historic shrine?	No
(3)	Is the building or structure of such old and unusual or uncommon design, texture and material that it could not be reproduced or be reproduced only with great difficulty?	No
(4)	Would retention of the building or structure help preserve the memorial character of the George Washington Memorial Parkway?	N/A
(5)	Would retention of the building or structure help preserve and protect an historic place or area of historic interest in the city?	No
(6)	Would retention of the building or structure promote the general welfare by maintaining and increasing real estate values, generating business, creating new positions, attracting tourists, students, writers, historians, artists and artisans, attracting new residents, encouraging study and interest in American history, stimulating interest and study in architecture and design, educating citizens in American culture and heritage, and making the city a more attractive and desirable place in which to live?	No

The analysis of the standards indicated above relate only to the portions of the wall areas proposed for demolition/capsulation. In the opinion of staff, none of the criteria for demolition and capsulation are met and the Permit to Demolish/Capsulate should be granted. As noted above, the wall being proposed for demolition likely dates from the middle of the twentieth century. When this wall was built, the original site configuration was altered and parking areas were introduced to the neighboring properties. The removal of this wall does not constitute the loss of historic materials or the reconfiguration of the original site condition. The areas proposed for demolition/capsulation are not of unusual or uncommon design and can easily be replicated. As such, staff recommends the approval of the requested Permit to Demolish/Capsulate.

Certificate of Appropriateness

The applicant is proposing to replace the existing painted brick wall with a wood fence to match the adjacent fence separating the side yard from the neighbor's property. The existing 7" wide fence was constructed 6" from the property line at the southeast corner of the lot (Figure 3). This has resulted in approximately 13" of usable area being removed from this portion of the property.

Figure 3: Photograph showing existing fence relative to the property line marker

The new fence separating the two parking areas will be constructed of vertical wood planks and a square open trellis and will be a total height of 6'-0" (Figure 4). While the proposed fence is adjacent to the sidewalk, it is considered to be in the side yard because it does not extend past the front wall of the house. Because of this, the fence complies with the relevant zoning restrictions and does not require a waiver from the BAR for the proposed height.

Figure 4: Illustration of proposed fence design (note that the installed fence will be painted black to match the existing adjacent wood fence)

The *Design Guidelines* state that “Fences, garden walls, and gates should be appropriate in materials, design, and scale to the period and character of the structure they surround.” The proposed design for the fence is simple and is consistent with the design of the existing adjacent fence. The simple design does not detract from the historic structure and the open trellis at the upper portion of the fence allows for greater visibility of the buildings on either side of the parking area. Staff finds the design to be consistent with the requirements of the *Design Guidelines* and recommends approval of the Certificate of Appropriateness for the replacement of the masonry wall.

STAFF

Bill Conkey, AIA, Historic Preservation Architect, Planning & Zoning
Tony LaColla, AICP, Land Use Services Division Chief, Planning & Zoning

VI. CITY DEPARTMENT COMMENTS

Legend: C- code requirement R- recommendation S- suggestion F- finding

Zoning

C-1 Proposed fence will comply with zoning.

F-1 Fence height in OHAD can be waived by the Board of Architectural Review

Code Administration

C-1 No permit is required for fence per VCC Section 108.2

Transportation and Environmental Services

R-1 Applicant shall be responsible for repairs to the adjacent city right-of-way if damaged during construction activity. (T&ES)

R-2 No permanent structure may be constructed over any existing private and/or public utility easements. It is the responsibility of the applicant to identify any and all existing easements on the plan. (T&ES)

F-1 After review of the information provided, an approved grading plan is not required at this time. Please note that if any changes are made to the plan it is suggested that T&ES be included in the review. (T&ES)

C-1 The applicant shall comply with the City of Alexandria’s Solid Waste Control, Title 5, Chapter 1, which sets forth the requirements for the recycling of materials (Sec. 5-1-99). (T&ES)

C-2 The applicant shall comply with the City of Alexandria's Noise Control Code, Title 11, Chapter 5, which sets the maximum permissible noise level as measured at the property line. (T&ES)

- C-3 Any work within the right-of-way requires a separate permit from T&ES. (Sec. 5-2) (T&ES)
- C-4 All improvements to the city right-of-way such as curbing, sidewalk, driveway aprons, etc. must be city standard design. (Sec. 5-2-1) (T&ES)

Alexandria Archaeology

- F-1 According to Ethelyn Cox's *Historic Alexandria, Street by Street, A Survey of Existing Early Buildings*, the dwelling on this lot was built in the mid-nineteenth century, and perhaps earlier. Given the early date of construction, the property could contain significant archaeological remains that pertain to the development of Old Town Alexandria.
- R-1 Call Alexandria Archaeology immediately (703-746-4399) if any buried structural remains (wall foundations, wells, privies, cisterns, etc.) or concentrations of artifacts are discovered during development. Work must cease temporarily in the area of the discovery until a City archaeologist comes to the site and records the finds. The language noted above shall be included on all final site plan sheets involving any ground disturbing activities.
- R-2 The applicant shall not allow any metal detection and/or artifact collection to be conducted on the property, unless authorized by Alexandria Archaeology. Failure to comply shall result in project delays. The language noted above shall be included on all final site plan sheets involving any ground disturbing activities.
- C-1 All required archaeological preservation measures shall be completed in compliance with Section 11-411 of the Zoning Ordinance.

NATURE OF PROPOSED WORK: *Please check all that apply*

- NEW CONSTRUCTION
- EXTERIOR ALTERATION: *Please check all that apply.*
 - awning
 - doors
 - lighting
 - other _____
 - fence, gate or garden wall
 - windows
 - pergola/trellis
 - HVAC equipment
 - siding
 - painting unpainted masonry
 - shutters
 - shed
- ADDITION
- DEMOLITION/ENCAPSULATION
- SIGNAGE

DESCRIPTION OF PROPOSED WORK: *Please describe the proposed work in detail (Additional pages may be attached).*

Demolish existing wall that separates my driveway and neighboring property on the east side of the home.

Construct a new wall right on the edge of the current property line.

This would effectively move this wall about 6-8 inches to the east and increase the width of the driveway making it more usable.

Alternatives are not feasible because they will not increase usable space on the driveway.

Wood fencing will better integrate with the remaining fence on the property and neighboring property but will still maintain old town look and feel.

SUBMITTAL REQUIREMENTS:

Check this box if there is a homeowner's association for this property. If so, you must attach a copy of the letter approving the project.

Items listed below comprise the **minimum supporting materials** for BAR applications. Staff may request additional information during application review. Please refer to the relevant section of the *Design Guidelines* for further information on appropriate treatments.

Applicants must use the checklist below to ensure the application is complete. Include all information and material that are necessary to thoroughly describe the project. Incomplete applications will delay the docketing of the application for review. Pre-application meetings are required for all proposed additions. All applicants are encouraged to meet with staff prior to submission of a completed application.

Demolition/Encapsulation : *All applicants requesting 25 square feet or more of demolition/encapsulation must complete this section. Check N/A if an item in this section does not apply to your project.*

- N/A
- Survey plat showing the extent of the proposed demolition/encapsulation.
 - Existing elevation drawings clearly showing all elements proposed for demolition/encapsulation.
 - Clear and labeled photographs of all elevations of the building if the entire structure is proposed to be demolished.
 - Description of the reason for demolition/encapsulation.
 - Description of the alternatives to demolition/encapsulation and why such alternatives are not considered feasible.

Additions & New Construction: Drawings must be to scale and should not exceed 11" x 17" unless approved by staff. Check N/A if an item in this section does not apply to your project.

- ^{N/A} Scaled survey plat showing dimensions of lot and location of existing building and other structures on the lot, location of proposed structure or addition, dimensions of existing structure(s), proposed addition or new construction, and all exterior, ground and roof mounted equipment.
- FAR & Open Space calculation form.
- Clear and labeled photographs of the site, surrounding properties and existing structures, if applicable.
- Existing elevations must be scaled and include dimensions.
- Proposed elevations must be scaled and include dimensions. Include the relationship to adjacent structures in plan and elevations.
- Materials and colors to be used must be specified and delineated on the drawings. Actual samples may be provided or required.
- Manufacturer's specifications for materials to include, but not limited to: roofing, siding, windows, doors, lighting, fencing, HVAC equipment and walls.
- For development site plan projects, a model showing mass relationships to adjacent properties and structures.

Signs & Awnings: One sign per building under one square foot does not require BAR approval unless illuminated. All other signs including window signs require BAR approval. Check N/A if an item in this section does not apply to your project.

- ^{N/A} Linear feet of building: Front: _____ Secondary front (if corner lot): _____.
- Square feet of existing signs to remain: _____.
- Photograph of building showing existing conditions.
- Dimensioned drawings of proposed sign identifying materials, color, lettering style and text.
- Location of sign (show exact location on building including the height above sidewalk).
- Means of attachment (drawing or manufacturer's cut sheet of bracket if applicable).
- Description of lighting (if applicable). Include manufacturer's cut sheet for any new lighting fixtures and information detailing how it will be attached to the building's facade.

Alterations: Check N/A if an item in this section does not apply to your project.

- ^{N/A} Clear and labeled photographs of the site, especially the area being impacted by the alterations, all sides of the building and any pertinent details.
- Manufacturer's specifications for materials to include, but not limited to: roofing, siding, windows, doors, lighting, fencing, HVAC equipment and walls.
- Drawings accurately representing the changes to the proposed structure, including materials and overall dimensions. Drawings must be to scale.
- An official survey plat showing the proposed locations of HVAC units, fences, and sheds.
- Historic elevations or photographs should accompany any request to return a structure to an earlier appearance.

ALL APPLICATIONS: *Please read and check that you have read and understand the following items:*

- I understand that after reviewing the proposed alterations, BAR staff will invoice the appropriate filing fee in APEX. The application will not be processed until the fee is paid online.
- I understand the notice requirements and will return a copy of the three respective notice forms to BAR staff at least five days prior to the hearing. If I am unsure to whom I should send notice I will contact Planning and Zoning staff for assistance in identifying adjacent parcels.
- I, the applicant, or an authorized representative will be present at the public hearing.
- I understand that any revisions to this initial application submission (including applications deferred for restudy) must be accompanied by the BAR Supplemental form and revised materials.

The undersigned hereby attests that all of the information herein provided including the site plan, building elevations, prospective drawings of the project, and written descriptive information are true, correct and accurate. The undersigned further understands that, should such information be found incorrect, any action taken by the Board based on such information may be invalidated. The undersigned also hereby grants the City of Alexandria permission to post placard notice as required by Article XI, Division A, Section 11-301(B) of the 1992 Alexandria City Zoning Ordinance, on the property which is the subject of this application. The undersigned also hereby authorizes the City staff and members of the BAR to inspect this site as necessary in the course of research and evaluating the application. The applicant, if other than the property owner, also attests that he/she has obtained permission from the property owner to make this application.

The fence that we want to move is circled below:

If you look at the front of this fence

Toy will see this pipe that marks the actual property line.

The width of the wall is 7 inches and distance between wall and pipe is 6 inches.

We want to demolish this wall, extend the driveway to the east and construct a new wood wall right next to the pipe.

The new fence wall will be the same wood fence installed through the remainder of the property so the greens can continue to grow over it. It will also be painted black.

On the survey plat this would look as follows:

Product Details

About This Product

The 6 ft. x 5-1/2 in. x 5/8 in. Pine Dog-Ear Picket is made from pine for durable, long-lasting performance. This all-wood picket is 6 ft. long. It has a classic dog-ear pattern that can add charm to almost any outdoor space. It is paintable and stainable to match with your exterior decor. You can use it for outdoor applications including picket fences and gardens.

Highlights

- Traditional dog-ear design adds a beautiful appearance
- Pressure-treated to protect against rot and decay
- Can be painted or stained to suit your preference
- For use in above ground applications
- Ideal for any fence repair
- Can be used in a variety of commercial or residential applications
- Note: product may vary by store

STEPS TO BUILD A FENCE

1 DO YOUR HOMEWORK

- Check local ordinances
- Contact utility companies
- Communicate with neighbors

2 BUY MATERIALS

- Fence components and fasteners
- Cement and gravel
- Tools

3 LAY OUT YOUR FENCE

- Mark hole locations with stakes
- Run string line

4 DIG POST HOLES

- 2' or deeper depending on post height
- Backfill hole with gravel

5 SET POSTS

- Place post in hole
- Set with ready-mix concrete

6 ATTACH BACKER RAILS OR PANELS TO POSTS

- Use 18d to 20d nails or 3-1/2" to 4" screws

7 ATTACH PICKETS TO BACKER RAILS

- Use 8d to 10d nails or 1-1/4" to 1-3/4" screws

8 FINISH THE FENCE

- Apply protective finish

This is designed to be a project overview. Refer to the fence manufacturer's instructions for complete installation details.
