3. **BUILDING PERMITS:** Most projects approved by the Board of Architectural Review require the issuance of one or more construction permits by Department of Code Administration (including signs). The applicant is responsible for obtaining all necessary construction permits after receiving Board of Architectural Review approval. Contact Code Administration, Room 4200, City Hall, 703-746-4200 for further information.
4. **ISSUANCE OF CERTIFICATES OF APPROPRIATENESS AND PERMITS TO DEMOLISH:** Applicants must obtain a copy of the Certificate of Appropriateness or Permit to Demolish PRIOR to applying for a building permit. I. APPLICANT'S PROPOSAL

The applicant requests a Certificate of Appropriateness to construct a fence with brick piers on the north property line, at 220 North Alfred St. The wood and brick portions of the fence are 6' in height and comply with the *Parker-Gray Residential Reference Guide* and could have been approved administratively. 16'-8" feet of the proposed fence will be an aluminum overhead garage type door. This portion of the fence will be 8'-5" in height and requires approval of a Waiver of Fence Height requirement.

The materials proposed for the fence comply with the Board's administrative policies regarding fence materials.

Site context

The alley to the north, beside the subject property, public. The proposed fence will be slightly visible from the right-of-way.

II. HISTORY

The two-bay, two-and-a-half story Federal revival-style house was constructed in **1983**. It consists of a masonry main block and a two-story masonry addition. The later Parker-Gray property will not be impacted by the proposed alterations.

Previous BAR Approvals
No Previous Approvals.

III. ANALYSIS

Staff has no objection to the proposed rear fence and supports the waiver of fence height requirement. The *Design Guidelines* state that fences are important visual feature of the historic district that define property lines and provide a sense of privacy and enclosure for property owners. The proposed fence is appropriate in materials, design, and scale for the structure it surrounds. The use of a modern material for the overhead doors differentiates it as a later alteration. Additionally, the proposed fence will be minimally visible from the public right-of-way.

Staff recommends approval of the project as submitted.

III. CITY DEPARTMENT COMMENTS

Legend: C- code requirement R- recommendation S- suggestion F- finding

Zoning

F-1 The proposed overhead garage door is considered to be a fence.

- F-2 The proposed brick piers and overhead garage door exceed 6 feet in height, which is the maximum height allowed for a side yard fence. However, per section 7-202(D), the fence height restrictions may be waived or modified by the Board of Architectural Review where the board finds that a proposed fence would be architecturally appropriate and consistent with the character of the district.
- F-2 The proposed fence that is 6.00 feet in height complies with zoning. If the BAR waives the restriction for fence heights, the brick piers and overhead garage door will also comply with zoning.

Code Administration

- C-1 Building permit is required.

Transportation and Environmental Services

- R-3 No permanent structure may be constructed over any existing private and/or public utility easements. It is the responsibility of the applicant to identify any and all existing easements on the plan. (T&ES)
- F-1 After review of the information provided, an approved grading plan is not required at this time. Please note that if any changes are made to the plan it is suggested that T&ES be included in the review. (T&ES)
- F-2 If the alley located at the adjacent of the parcel is to be used at any point of the construction process the following will be required:
For a Public Alley - The applicant shall contact T&ES, Construction Permitting & Inspections at (703) 746-4035 to discuss any permits and accommodation requirements that will be required.
