SITE

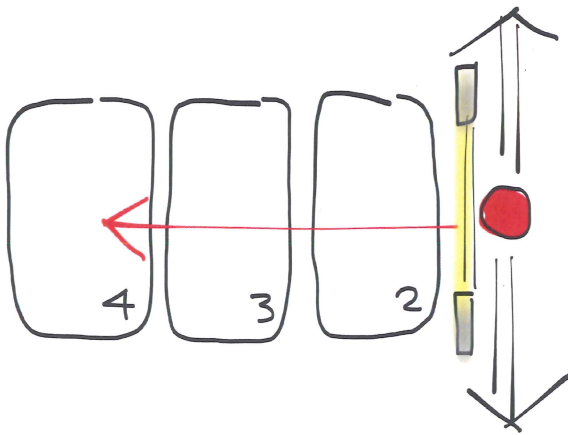

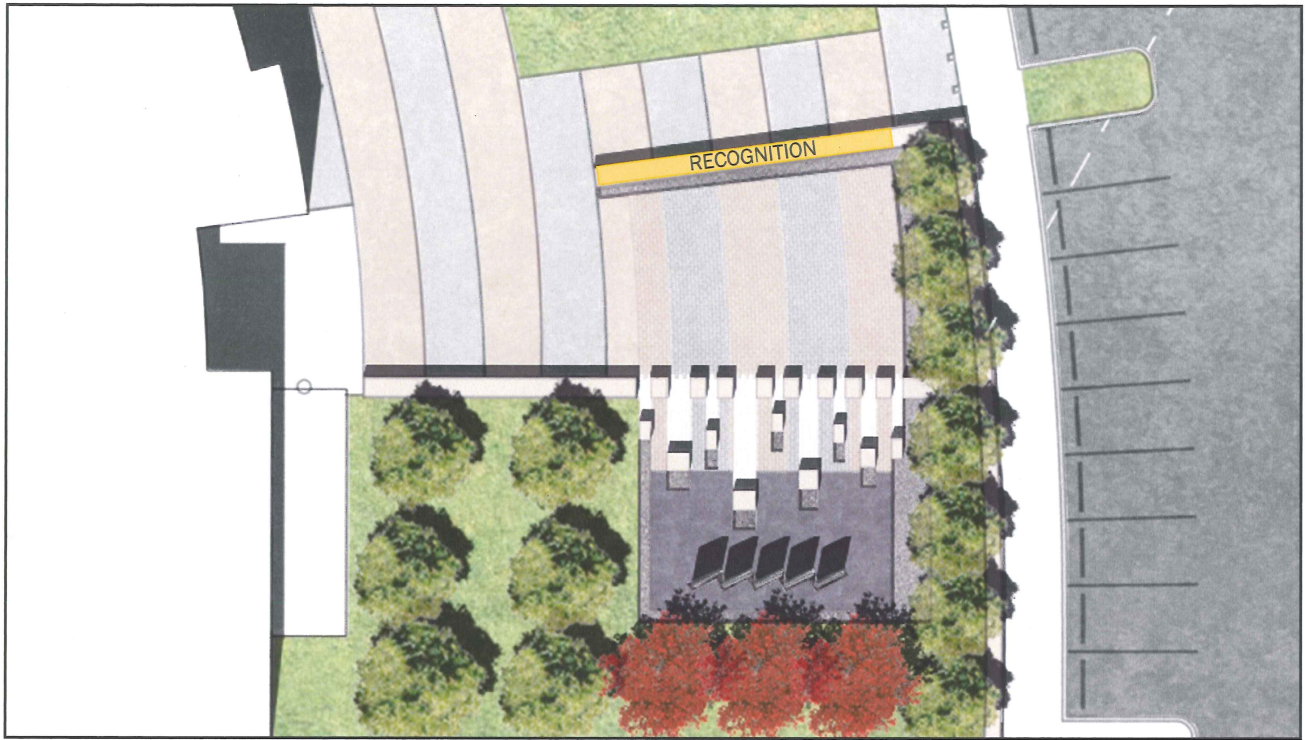

site location

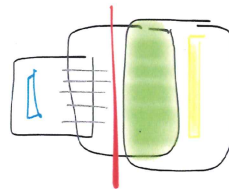

HDR

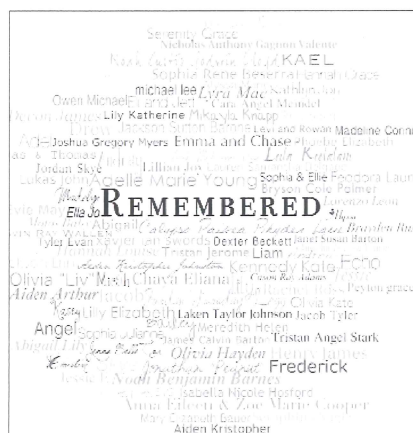

The RECOGNITION component is located along an active pedestrian circulation path and serves as the gateway for the Memorial experience.

An existing site wall will be utilized as a platform to introduce the Memorial, provide appreciation to generous donors, and acknowledge the stakeholders that have dedicated their time and energy toward the project.

RECOGNITION: design vision

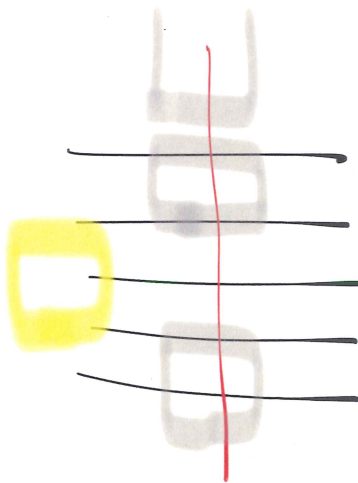

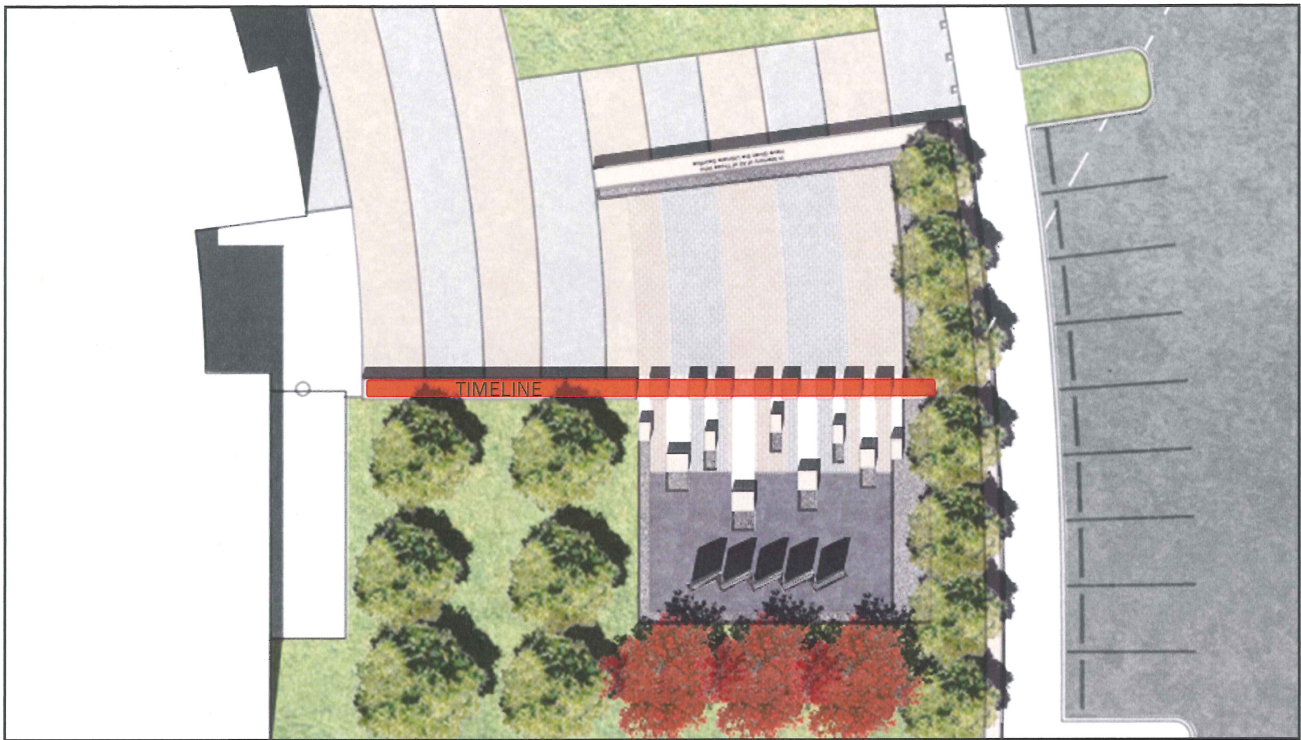

The CEREMONY component will be a multifunction space that is both path and place. It's primary purpose is to host police activities in a public, outdoor setting that can accommodate an assembled group.

The space will double as a passage for visitors who wish to continue their journey through the Memorial.

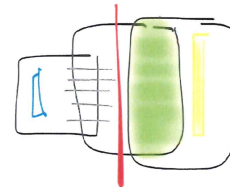

CEREMONY

HDR

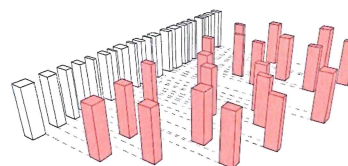

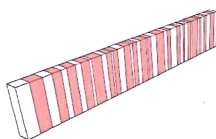

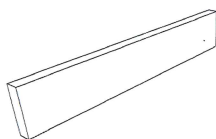

The TIMELINE component will incorporate specific dates in the 144-year history of the Alexandria Police Department.

End of Watch dates will be reflected as an interruption in time, and signified by a shift in alignment. These incidents allow visitors to move beyond the timeline and enter into a more intimate part of the Memorial.

The REFLECTION component is intended to evoke a more personal connection with those that are memorialized on this site.

Fallen officers bravely representing the APD will be formally recognized on vertical panels that stretch skyward. Symbols such as the police badge wrapped with a mourning band will accompany inscriptions of unity.
