Subject: Letters of Support for the Goodwin House Project
Attachments: Letters from Goodwin House Residents.pdf

Please find a scanned batch of letter that were submitted by residents living at Goodwin House Alexandria. I was asked to submit them together so they would be received as a collective group.

Although there are some individuals on the Resident's Council and the Health and Wellness Committee of the Resident's Council who are out of town, there was almost unanimous support of the project.

There are additionally letters of support from individual residents, many who have either lived in the current health care center, or have or had a loved one living in the health care center. The new health care center project is a response to years of residents sharing their concern for the lack of dignity and privacy that the mostly semi-private room situation causes when residents are in their most vulnerable conditions.

Please let me know if you have questions.

Colleen Ryan Mallon
Vice President of Marketing and Mission Expansion

December 29, 2014

Mayor William Euille;
Members of the Alexandria City Council;
Chairman Eric Wagner; and
Members of the Alexandria Planning Commission

Dear Mr. Mayor, Chairman Wagner, Ladies & Gentlemen:

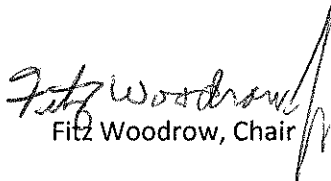

Thank you for the opportunity to write to you to express our support for the Goodwin House Alexandria project. As members of Goodwin House Alexandria's Resident Council, elected by residents to represent the best interests of our fellow residents, we are writing to express our support for the new health care center.

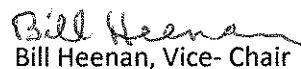

Goodwin House will be dramatically improving the way that it provides 24-hour nursing care for residents in Alexandria by moving their current Medicare and Medicaid Certified 80-bed nursing program from mostly double-occupied rooms (several that even have three beds in one room) to a newly constructed building providing all private rooms in eight small ten-room households, known as "small houses."

Small houses are becoming a national trend due to research-supported improved clinical outcomes that many of the existing small house programs have demonstrated. If this project is approved, this would be the first small house project in Alexandria, or all of Northern Virginia, and would be the second in the state of Virginia.

As residents of Goodwin House Alexandria, we urge you to support this project so that we, along with residents in the future, will have the highest possible care in an attractive and supportive environment when we need care the most.

Sincerely,

Fitz Woodrow, Chair

Mayor William Euille;
Members of the Alexandria City Council;
Chairman Eric Wagner; and
Members of the Alexandria Planning Commission

Dear Mr. Mayor, Chairman Wagner, Ladies & Gentlemen:

As members of the Health Services Committee of the Residents Council for our GH Alexandria community, we are writing to express our enthusiastic support for the proposed Goodwin House Alexandria Project.

Our proposed new health care center will dramatically improve the way Goodwin House will be able to serve persons in need of 24-hour skilled nursing care. The new health care center will enable Goodwin House to replace the Medicare and Medicaid Certified, 80-bed nursing program from mostly double-occupied rooms (and some with three beds in one room) to a newly constructed building providing all private rooms in eight small ten-room households, known as "small houses."

Small houses are becoming a national trend due to research-supported improved clinical outcomes, as well as highly rated resident satisfaction and quality of life improvements demonstrated by existing small house programs around the country. . If this project is approved, new GHA health care center will be the first small house project in Alexandria and in Northern Virginia, and would be only the second in the Commonwealth of Virginia.

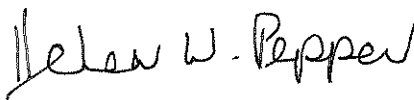

We urge you to support this project so that we, along with residents and community members of the future who need skilled nursing care will have the highest possible quality of care in an attractive and supportive environment – affirming of our dignity and quality of life when we need care the most.

Sincerely,

Sarah Brady, Chair

Goodwin House will be dramatically improving the way that it provides 24-hour nursing care for residents in Alexandria by moving their current Medicare and Medicaid Certified 80-bed nursing program from mostly double-occupied rooms (several that even have three beds in one room) to a newly constructed building providing private rooms in eight small ten-room households, known as "small houses."

Small houses are becoming a national trend due to research-supported improved clinical outcomes that many of the existing small house programs have demonstrated. If this project is approved, this would be the first small house project in Alexandria, or all of Northern Virginia, and would be the second in the state of Virginia.

I urge you to support this project so that we, along with residents and community members in the future, will have the highest possible care in an attractive and supportive environment when we need care the most.

Sincerely,

Teresa C. Carroll
