DESCRIPTION OF PROPOSED WORK: *Please describe the proposed work in detail (Additional pages may be attached).*

New two story addition at rear of existing house. Half of South wall of existing "L" to be encapsulated and preserved; half to remain as exterior wall with existing openings. New roof framing and new roof over existing "L". East wall of "L" to be removed. The East wall of the "L" has had many alterations and exhibits very little original material. Therefore, demolition of this wall seems reasonable. Preserving the South wall but encapsulating it allows the use of the lot that is otherwise very limited by open space. The roof framing over the "L" must be replaced in order to achieve reasonable head height in this portion of the house. The low point is currently under six feet.

SUBMITTAL REQUIREMENTS:

Items listed below comprise the **minimum supporting materials** for BAR applications. Staff may request additional information during application review. Please refer to the relevant section of the *Design Guidelines* for further information on appropriate treatments.

Applicants must use the checklist below to ensure the application is complete. Include all information and material that are necessary to thoroughly describe the project. Incomplete applications will delay the docketing of the application for review. Pre-application meetings are required for all proposed additions. All applicants are encouraged to meet with staff prior to submission of a completed application.

Electronic copies of submission materials should be submitted whenever possible.

Demolition/Encapsulation : *All applicants requesting 25 square feet or more of demolition/encapsulation must complete this section. Check N/A if an item in this section does not apply to your project.*

- ☐ N/A
☐ ☒ Survey plat showing the extent of the proposed demolition/encapsulation.
☐ ☒ Existing elevation drawings clearly showing all elements proposed for demolition/encapsulation.
☐ ☒ Clear and labeled photographs of all elevations of the building if the entire structure is proposed to be demolished.
☐ ☒ Description of the reason for demolition/encapsulation.
 * ☐ ☒ Description of the alternatives to demolition/encapsulation and why such alternatives are not considered feasible.

* Note: We were involved in the renovation and addition of the sister house to this property and the brick at the existing rear addition is in poor shape (salmon brick). There are no spread footings beneath this rear portion of the house requiring reinforcement for an addition. The joists sit on grade and there is much deterioration to the existing rear addition. Therefore, there are no alternatives to demolition. However, by creating the interior terrace, we are encapsulating less of the intact front portion of the house and preserving the existing brick and fenestration of the main front block.

Additions & New Construction: Drawings must be to scale and should not exceed 11" x 17" unless approved by staff. All plans must be folded and collated into 12 complete 8 1/2" x 11" sets. Additional copies may be requested by staff for large-scale development projects or projects fronting Washington Street. Check N/A if an item in this section does not apply to your project.
