The City’s initial analysis assumes that at least fifty percent of the cost of planned infrastructure would be provided through developer contributions. The actual developer contribution rates will be determined during a subsequent and more detailed study. That study will recognize that this plan’s goal is to calibrate developer contributions so as to build and sustain redevelopment momentum created by the TSA Headquarters announcement and this plan as well as to fund infrastructure. The Infrastructure and Funding Plan will determine how contributions should be phased in over time and will look at varying contributions by neighborhood and land use such as to encourage office.”
