Subject: Storm water legislation

At last night's Council meeting, I reported on a bill (SB 468), which would have exempted railroad beds covered with rails and ballast from having to pay storm water management service charges. I said that local governments were working to have this exemption removed from the bill. Today in a House subcommittee we were successful. This change still must still be approved by the full committee, the House, and the Senate--but we have made progress.
