1 2	ORDINANCE			
2 3 4 5	AN ORDINANCE to repeal and reordain Chapter 11 (AQUATIC HEALTH ORDINANCE) of Title 11 of The Code of The City of Alexandria, Virginia, 1981, as amended.			
5 6 7	THE CITY COUNCIL OF ALEXANDRIA HEREBY ORDAINS:			
8 9 10	Section 1. That Chapter 11 of Title 11 of the Code of the City of Alexandria, Virginia, 1981, as amended, be, and the same is hereby, repealed and reordained to read as follows:			
11 12	ARTICLE A			
12				
14	General Provisions			
15				
16	Sec. 11-11-5 Definitions.			
17				
18	For the purposes of this Ordinance, the following words and terms shall have the			
19 20	following meaning, unless the context clearly indicates otherwise.			
20 21 22	Above-ground pool means any pool having the pool tank above ground level.			
22	Activity pool means a pool which features recreational water activities which may			
24 25	include, but is not limited to, one or more of the following: climbable bars, ropes, chutes, bubblers, fountains, anchored floating play components or other similar devices.			
26 27 28	ANSI means American National Standards Institute.			
28 29 30	<i>Aquatic facility</i> means a facility for water recreation or water therapy including, but not limited to, a public pool facility, spa pool facility, a waterpark facility, a limited access			
31 32	pool, or an interactive water feature facility.			
33 34	ASME means American Society of Mechanical Engineers.			
35 36	ASTM means American Society for Testing and Materials.			
37 38 39	<i>Attendant</i> means a person at a waterpark facility trained to operate an attraction and control the patrons in a safe and orderly manner.			
40 41	<i>Attraction or ride</i> means any of the specific types of features at waterpark facilities involving partial or total immersion of the patron.			
42				
43	Backwashing means the process of thoroughly cleaning the filter media or elements			
44 45	by reversing flow, dislodging the filter aid, and/or removing accumulated debris and discharging it to waste.			
46				

1	Bathhouse facility means the enclosed structure and related areas, used by patrons of		
2	an aquatic facility prior to entering the pool(s), which contain the dressing rooms, showers,		
3	toilets, lavatories, saunas, and steamrooms.		
4			
5	Bed and Breakfast is a transient lodging facility permitted by the Director as defined		
6	by the City of Alexandria Zoning Ordinance.		
7	- j j		
8	Breakpoint chlorination means the addition of a sufficient amount of chlorine to		
9	water to destroy the combined chlorine present. Breakpoint chlorination is approximated by		
10	the addition of chlorine sufficient to obtain a total chlorine residual ten times the original		
11	combined chlorine residual.		
12	comonica emornic residuai.		
12	<i>Center line</i> means the path defined by geometric midpoints of a component or		
	1 10 1		
14	structure, generally used for consideration of the slide path in flume rides and the separation		
15	of diving boards or platforms in a diving area.		
16			
17	Child care facility means any child care home, day care center, or nursery school, as		
18	defined by the City of Alexandria Zoning Ordinance.		
19			
20	Children's activity pool means an activity pool, designed primarily for the use of		
21	children, having a maximum depth of 24 inches.		
22			
23	Chute means a structure which contains and directs the path of travel and rate of		
24	descent of a patron. A chute may be tubular, trough-like, curved or flat-bottomed. A chute		
25	generally uses water only as a lubricant.		
26			
27	Combined residual disinfectant means the amount of halogen or other approved		
28	disinfectant which has chemically combined with organic nitrogen compounds (e.g.,		
29	combined chlorine).		
30			
31	<i>Competitive diving board</i> means any diving board recommended by the		
32	manufacturer for diving competition.		
33	o i i		
34	Control fence means a woven steel wire, chain link, picket, solid board type fence,		
35	wall or equivalent barrier capable of directing bathers through the appropriate entry onto the		
36	pool deck or to a specific location within the pool facility's perimeter fence.		
37	poor deek of to a specific focation within the poor facility's permitter fence.		
38	Cross-ventilation means the movement of air from an outside source into and out of		
39	a filter/chemical storage room, sufficient to prevent the accumulation of chemical vapors or		
40			
	dust. The cross-ventilation shall be provided by a mechanical exhaust fan.		
41	CT us has means the concentration in any of a disinfectant (C) multiplied by time in		
42	<u>CT value means the concentration in ppm of a disinfectant (C) multiplied by time in</u>		
43	minutes (T) needed for inactivation of a particular contaminant. The concentration and time		
44	are inversely proportional, therefore, the higher the concentration of a disinfectant, the		
45	shorter the contact time required for inactivation. The CT value can vary with pH or		
46	temperature change so these values must also be supplied.		

1				
2	Deck means the smooth, impervious, non-slip walking surface located within the			
3	perimeter enclosure and around the aquatic facility.			
4	permieter enclosure una arouna die aquate raenty.			
5	Diaper changing station means an easily cleanable unit that meets the requirements			
6	of the Consumer Safety Performance Specifications for Diaper Changing Tables for			
7	Commercial use including Americans with Disabilities Act (ADA) Standards and Product			
8	Safety Signs and Labels.			
9				
10	Director means the Health Director of the Alexandria Health Department or his/her			
11	designee.			
12				
12	Disinfectant means an agent that disinfects by destroying, neutralizing, or inhibiting			
13	the growth of harmful organisms.			
15	the growth of harmful organisms.			
16	Diving area means the minimum dimensions of an area within the pool necessary to			
17	provide safe entry from a diving board or platform.			
18	provide sale entry from a drving board of platform.			
19	Diving board means the mechanism used for entering a swimming pool, consisting			
20	of a semi-rigid board, that derives its elasticity through the use of a fulcrum mounted below			
20 21	the board, and the stand that supports the semi-rigid board.			
21	the board, and the stand that supports the senii-rigid board.			
22	Diving platform means the raised rigid stage used for diving.			
23 24	Diving pluijorm means the raised right stage used for diving.			
24 25	Drop slide means a sloped chute or flume exiting the user above the pool operating			
23 26	water level into a receiving pool.			
20 27	water level into a receiving pool.			
28	Fence means a closed-type vertical barrier which completely encloses and secures			
20 29	the pool area and prevents unauthorized entry.			
30	the poor area and prevents and difficult end y.			
31	<i>Filter</i> means a device that separates solid particles from water by circulating water			
32	through a porous substance, the filter media or element.			
33	unough a porous substance, the meet meeta of clement.			
33 34	FINA means the Federation Internationale de Natation Amateur.			
35	That means the rederation merhationale de rotation Amateur.			
36	Flume means a trough-like or tubular structure which uses a significant volume of			
30 37	water to transport the user.			
38	water to transport the user.			
38 39	Free available residual disinfectant means the amount of disinfectant which is			
40	available to inactivate microorganisms and oxidize organic matter (e.g. free chlorine), and			
40 41	which has not reacted with organic nitrogen compounds or any other material in pool water.			
42	when has not reacted with organic introgen compounds of any other material in poor water.			
42 43	<i>Foothold</i> means areas that are greater than one and three-quarter inches wide as			
43 44	measured horizontally that expose horizontal surfaces whose top planes are separated by a			
44 45	vertical distance that is less than 45 inches.			
45 46				
10				

1 2	GFCI means Ground Fault Circuit Interrupter.				
3	Handhold means the same as foothold.				
4 5	Hard-wired telephone means a telephone that has a direct wire handset and				
6 7	connection to the main telephone system.				
8	Hydrojet Hydrotherapy Jet means a fitting which blends air and water creating a				
9 10	high velocity, turbulent stream of air enriched water.				
11	Hydrostatic pressure relief valve means any valve which, when properly installed,				
12	will relieve underground water pressure caused by high water tables under and/or around th				
13	pool shell.				
14					
15	Industry standards mean the American National Standards Institute (ANSI), or				
16	similar national standards, as approved by the Director.				
17	7 7 7 7 7 7 7 7 7 7				
18	<i>In-ground pool</i> means any pool constructed with the pool tank below ground level.				
19 20	Live or illuser was not make the written record of all facts recording any death				
20 21	<i>Injury or illness report</i> means the written record of all facts regarding any death, near drowning, injury or illness associated with any regulated aquatic facility.				
21 22	near drowning, injury or inness associated with any regulated aquatic facility.				
22	Inner tube ride means an attraction where users ride inner tube like floatation				
23 24	<i>Inner-tube</i> ride means an attraction where users ride inner tube-like floatation devices through a series of chutes, channels, flumes, and/or pools.				
25	devices unough a series of challes, challers, numes, and/or pools.				
26	Interactive Water Feature Facility (IWFF) means a structure or area designed to				
27	allow contact with water, but having standing water less than or equal to one inch, including				
28	but not limited to water sprays, dancing water jets, waterfalls, and dumping buckets. <u>An</u>				
29	IWFF is not an aquatic facility provided there is both:				
30	(i) A visible barrier, at least 15 inches in height, surrounding the entire feature, and				
31	(ii) Signage facing approaches to the IWFF, with letters at least 1 inch in height,				
32	stating "Do Not Enter – Untreated Water"				
33					
34	Internal communication system means any combination of devices permitting the				
35	immediate passage or exchange of messages between the personnel within the aquatic				
36	facility.				
37					
38	Lazy River means a circuitous stream of pool water, moved by booster pumps or				
39	other means, providing a continuous current in which patrons are transported by flotation				
40	devices or other means.				
41					
42	<i>Lifeguard</i> means an individual, fifteen years of age or older, who is trained and				
43	certified in lifeguarding, first aid, and cardio-pulmonary resuscitation (CPR).				
44 45	Lifequard stand means an alousted lifequard station which complies with OSUA				
	<i>Lifeguard stand</i> means an elevated lifeguard station, which complies with OSHA standards for algusted platforms, and includes a seat and platform. An umbralle				
46	standards for elevated platforms, and includes a seat and platform. An umbrella				

1	emplacement sleeve or alternative shade producing structure is required for outdoor stands.				
2	The stand may be portable, and shall be located to allow full visual coverage of the				
3	lifeguard's assigned area of responsibility.				
4					
5	Lifeguard station means a lifeguard stand or other designated work station of a				
6	lifeguard.				
7					
8	Light color means any color which has a Munsell Value (V) notation of 6.5 or				
9	greater and a Munsell Chroma (C) notation of 7.0 or less.				
10	g				
11	<i>Limited access pool</i> means a pool that does not serve an apartment complex and (i)				
12	serves 65 or fewer members of a homeowners association or condominium association, (ii)				
13	only allows access to their facility to association members, their guests, families and/or				
14	owners' lessees, (iii) does not allow access by the general public, and (iv) determines				
15	annually, by majority of voting members of the association, to be designated as a limited				
16	access pool for that year.				
17					
18	MSDS means Material Safety Data Sheets.				
19	11525 Incuns Material Safety Data Sheets.				
20	Make-up water means potable water which is added to a pool to bring the water level				
21	up to the waterline.				
22					
23	Maximum facility load means the maximum number of patrons permitted in any				
24	aquatic facility at any one time. The maximum facility load is limited by the sum total of				
25	the maximum individual swimming pool and individual spa pool bather loads, bathhouse				
26	plumbing fixture restrictions, or other restrictions imposed by the Director.				
27					
28	Maximum individual swimming pool bather load means the maximum number of				
29	patrons permitted within the water of an individual pool at any one time.				
30					
31	Maximum individual spa pool bather load means the maximum number of patrons				
32	permitted within the water of an individual spa pool at any one time.				
33					
34	NSF means National Sanitation Foundation.				
35					
36	ORP means Oxidation Reduction Potential.				
37					
38	OSHA means the Occupational Safety and Health Administration.				
39					
40	Overflow trough or gutter means the surface water collection system designed to				
41	remove surface water through pool overflow.				
42					
43	Owner means any person, or legally authorized representative of any person, who				
44	owns or leases an aquatic facility and in whose name the owner's annual or seasonal permit				
45	is issued. The person in charge of the aquatic facility shall be deemed to be the designee of				
46	the owner.				

1				
2	Perimeter means the distance around the swimming pool, spa, wading pool or other			
3	body of water measured where the normal water surface under operating conditions mee			
4	the sidewall of the facility shell.			
5	Dangen means any and all antities including individuals firms northershing			
6 7	<i>Person</i> means any and all entities, including individuals, firms, partnerships, associations, public or private institutions, municipalities or political subdivisions,			
8	governmental agencies, or public or private corporations organized under the laws of this			
9	Commonwealth or any other state or country.			
10 11	Perimeter fence means a closed-type vertical barrier which completely encloses and			
12	secures the pool area and prevents unauthorized entry.			
13				
14	Pinch hazard means any configuration of components that could pinch or entrap the			
15	fingers, toes or any other part of the human body.			
16				
17	<i>Plummet</i> means a line that is perpendicular to the water surface and extends			
18	vertically through a point located at the front edge of a diving board and on the centerline.			
19				
20	<i>Pool</i> means any man-made structure, basin, chamber or tank located either indoors,			
21	outdoors, or both, containing a body of water with sufficient depth for complete or partial			
22	immersion of the body.			
23				
24	Pool area means a pool and all decks, grounds, and other areas located within the			
25	perimeter enclosure.			
26	•			
27	<i>Pool facility</i> means any pool(s), together with the buildings, equipment and			
28	appurtenances pertaining to such a body of water including, but not limited to, all areas			
29	located within the perimeter enclosure.			
30	I			
31	Pool management company means any person, firm, corporation or association			
32	contracting to manage or operate an aquatic facility.			
33	contracting to manage of operate an aquate mentoj.			
34	Pool operator means a person, sixteen years of age or older, trained to conduct the			
35	operation of an aquatic facility.			
36	operation of an aquatic facility.			
37	<i>Pool operator's certificate</i> means the document issued to a person who has			
38	successfully passed a pool operator's exam recognized by the Director and administered by			
38 39				
	an exam proctor that is approved by the Director.			
40				
41	ppm means parts per million.			
42				
43	psi means pounds per square inch.			
44				
45	Public pool means any pool, other than a residential pool serving a single family			
46	dwelling or duplex residence that is not a bed and breakfast, a child care facility, or a limited			

1 2 3	access pool which is intended to be used collectively by a number of persons for swimming, recreation, fitness, relaxation, or therapeutic purposes. Man-made structures such as plastic and/or inflatable weding pools designed for the temporary impoundment of uncirculated			
3 4 5	and/or inflatable wading pools designed for the temporary impoundment of uncirculated and/or undisinfected water will not be permitted as a public pool.			
6 7 8 9	<i>Radius of curvature</i> means the radius arc which denotes the curved surface from the point of departure from the vertical sidewall (springline) of the pool to the pool bottom (e.g. coving).			
10 11 12	<i>Receiving pool</i> means a pool located at the end of a water slide or drop slide that is designed to safely receive the rider of an attraction.			
13 14 15 16	<i>Recessed stairs</i> means a step or series of steps that do not protrude beyond the pool wall. Recessed stairs extend down from the deck with the riser of the bottom step terminating at the pool wall and bottom.			
10 17 18 19	<i>Recreational diving board</i> means any diving board that is not recommended by the manufacturer for diving competition.			
20 21 22 23 24 25	<i>Remodel</i> means to change, rearrange, or modify an aquatic facility's structure, circulation system and/or appurtenances, such that the design, configuration and/or operating characteristics are different from the original design, configuration, and/or operating characteristics. The term "remodel" does not include normal maintenance and repair.			
26 27 28 29 30	<i>Repair</i> means the replacement of existing construction with equivalent materials for the purpose of maintenance and the replacement of a previously approved piece of equipment with an equivalent unit having the same specifications, operating characteristics, and certifications.			
31 32 33 34	<i>Skimmer</i> means a mechanical device connected to the pool water recirculation piping which is used to drain the pool water surface and is equipped with a weir, a flow adjustment device, and a removable and cleanable basket designed to trap small solids.			
35 36	Slide means a drop slide or waterslide as defined herein.			
37 38 39	<i>Slow river</i> means a circuitous stream of pool water, moved by booster pumps or other means, providing a continuous current in which patrons are transported by flotation devices or other means.			
40 41 42 43 44 45 46	<i>Spa pool</i> means any pool intended to be used for recreational or therapeutic use which may include a water jet and/or aeration system, may be heated or cooled, and is not drained, cleaned or refilled after each individual use. The term includes, but is not limited to, units designed for <u>hydrojethydrotherapy jet</u> recirculation, hot water, cold water, mineral bath, air induction bubbles, or any combination thereof. Common terminology for a spa pool includes, but is not limited to, therapeutic pool, hydrotherapy pool, whirlpool, hot spa,			

1 2 3 4	and hot tub. The term spa pool excludes spa pools used by or under the direct supervision and control of licensed medical personnel located in a medical facility and spa pools serving a single family dwelling or duplex residence that is not a bed and breakfast or a child care facility.			
5				
6 7 8	<i>Springline</i> means the point from which the pool wall breaks from vertical and begins its arc in the radius of curvature to the pool bottom.			
9	Superchloring to make to achieve a registing manage in the chloring registral within the			
10	<i>Superchlorinate</i> means to achieve a rapid increase in the chlorine residual within the pool water to oxidize organic impurities, destroy algae and/or achieve breakpoint			
11	chlorination.			
12				
13 14	Swimming pool means any pool intended to be used for public recreational swimming and/or public recreational diving, and means the same as public pool.			
15				
16	Total residual disinfectant means the arithmetic sum of free available residual			
17	disinfectant and combined residual disinfectant.			
18				
19	<i>Turnover time or period</i> means the time required to recirculate the equivalent of the			
20	total volume of pool water through the filter system.			
21				
22	UL means Underwriters Laboratory.			
23	WUCDC magnethe Winsinia Uniform Statemide Duilding Code			
24 25	VUSBC means the Virginia Uniform Statewide Building Code.			
25 26	We live we demonstrate a continuum and designed animarily for use hy small shildren			
26	<i>Wading pool</i> means a swimming pool designed primarily for use by small children which is separate from any other swimming pool within a pool area. A wading pool shall			
27	which is separate from any other swimming pool within a pool area. A wading pool shall			
28 29	have a depth greater than one inch but not exceeding eighteen inches.			
29 30	Waterline means the midpoint of the operating range of the skimmers when there are			
31	no users in the pool. For overflow systems, the waterline is defined as the top of the			
32	overflow rim.			
33	overnow min.			
33 34	Waterpark facility means a water contact facility with design and operational			
35	features which provide recreational activities that are different from those associated with a			
36	conventional swimming pool and purposefully involve the immersion of the body either			
37	partially or totally in the water. Such recreational activities include, but are not limited to:			
38	water chutes, water flumes, slow rivers, activity pools, receiving pools, sprinklers, fountains,			
39	decorative showers, and wave pools.			
40				
41	Water slide means a chute or flume that discharges the user at or below the pool			
42	operating water level.			
43				
44	Wave pool means a pool producing waves which usually begin at the deep end and			
45	proceed toward and dissipate at the shallow end.			
46	r			

1 2 3	Sec. 11-11-6Permits for Construction, and Remodeling, Resurfacing,Modifications, and other changes; Plan Review and Construction and Pre-OperationalInspections.
4 5 6 7 8 9 10	(a) Building and other applicable permits shall be obtained before any aquatic facility regulated under this Ordinance may be constructed. A building permit or other applicable permits may be required from the appropriate official(s) before the remodeling of an aquatic facility regulated under this Ordinance. Plans and specifications shall have been approved by the Director prior to the issuance of such permits.
11 12 13 14 15	(b) If a building permit is not required, plans and specifications for the remodeling of an aquatic facility regulated under this Ordinance shall be submitted to the Director for review and approval. Duplicate copies of the plans and specifications shall be submitted to the Director.
16 17 18 19 20	(c) The approval of any plans or specifications shall not be viewed to be a determination that the said plans or specifications are free from error. The owner shall have final responsibility for the accuracy and completeness of the plans and specifications, as well as for subsequent construction and installation.
21 22 23 24 25	 (d) A plan review fee shall be paid. The fees for the review of plans and associated construction inspections are as established in <u>Sec. 11-11-25</u>. (e) The requirements of this Ordinance are in addition to the requirements of all other applicable ordinances and codes, including but not limited to, plumbing, building, electrical, mechanical, zoning, and fire prevention.
26 27 28 29	(f) Prior to being put into service for the public, the construction of each aquatic facility shall be inspected for compliance with this Ordinance and approved by the Director.
29 30 31 32 33 34 35 36	(g) A pre-operational inspection shall be conducted annually on each seasonal aquatic facility. Where more than one annual pre-operational inspection is required for a facility before it can be approved for operation, the Director shall assess a reinspection fee for each additional inspection after the initial inspection. The fees for pre-operational reinspections are as established in <u>Sec. 11-11-25</u> and shall be set by the City Council. Reinspection fees shall be paid before a reinspection is conducted.
37 38 39 40 41	(h) The Director or their designee shall be notified in writing of any proposed changes to the pool, pool equipment, or deck are that are not like for like at least 10 days prior to commencement of work. The notification shall include an itemized list of all proposed work that is to be performed, including a statement that all work will comply with the requirements stated in this code.
42 43 44	Sec. 11-11-7 Owner's Permit Required; Fee for Same.
45 46	(a) No owner shall allow an aquatic facility to be operated unless the owner has secured an annual or seasonal permit(s) from the Director. The permit(s) shall be posted in a

1 location conspicuous to the public on the premises of the facility. Prior to issuing the 2 permit(s), the Director shall determine that the aquatic facility is in compliance with the 3 requirements of this Ordinance, that all required application fees in Sec. 11-11-25 have been 4 paid, and that the aquatic facility has been approved by the building official. The permit 5 shall be issued in the name of the owner for the calendar year, or if a seasonal pool, for the 6 period during the calendar year the facility will be in operation. A permit(s) may not be 7 transferred from one person or owner to another person or owner. In the event the owner is 8 operating a facility without the required annual or seasonal permit(s), the Director shall order the immediate closure of the facility. An order of closure shall be effective upon 9 10 delivery of a written notice to the owner or person in charge of the facility and shall remain in effect until such time as the owner secures the annual or seasonal permit(s). 11 12 13 (b) The fees for the permit(s) required by Sec. 11-11-7 (A) are as established in 14 Sec. 11-11-25 of this Ordinance. 15 16 The owner and the pool management company, if applicable, of any aquatic (c) 17 facility are responsible for the facility being operated, maintained, and managed in 18 accordance with the requirements of this Ordinance. 19 20 Sec. 11-11-8 Facility Closure and Suspension of the Owner's Permit. 21 22 The Director shall order the immediate closure and permit suspension of any (a) 23 aquatic facility upon finding that a substantial hazard exists to the health or safety of those 24 who utilize the facility. No person shall operate any aquatic facility subject to an order of 25 facility closure and permit suspension. 26 27 An order of facility closure and permit suspension shall be effective upon (b) 28 delivery of a written notice to the permit holder or his/her designee or to the person in 29 charge of the aquatic facility at the time the substantial hazard is discovered. The order shall 30 remain in effect until such time as the Director, or his designee, by written determination, 31 finds that the facility meets the requirements of this Ordinance, including a determination 32 that the hazard no longer exists. 33 34 The holder of a permit for a facility subject to an order of facility closure and (c) 35 permit suspension may appeal such determination by requesting a hearing as described in 36 Sec. 11-11-15. 37 38 Sec. 11-11-9 **Revocation of an Owner's Permit.** 39 40 The Director may revoke an owner's permit(s) upon the finding of serious, repeated, 41 or flagrant violations of any of the requirements of this Ordinance or interference with the 42 performance of the Director's duties. No person shall operate any aquatic facility subject to 43 an order of permit revocation. An owner's permit(s) may not be revoked unless the permit 44 holder has been served with written notice of the Director's intent to revoke the permit(s) at

least thirty calendar days prior to the date of proposed revocation, stating the reason the
 permit(s) is subject to revocation and informing the permit holder of the opportunity for a

hearing before the Director. The holder of an owner's permit subject to an order of permit
 revocation may appeal such determination by requesting a hearing as described in <u>Sec. 11-</u>
 <u>11-15.</u>

5 6

Sec. 11-11-10 Pool Operator Requirements.

(a) It shall be unlawful to operate a swimming pool or waterpark facility unless
it is under the immediate control of a person trained in the basics of swimming pool
operation. Such pool operator shall possess a valid pool operator's certificate accepted by
the Director, have immediately available for inspection a valid photo identification and be
on the premises during operation of the swimming pool or waterpark facility.

11 12

(b) A spa pool or interactive water feature facility shall not be in violation of this
subsection if it is under the control of a person who possesses a valid pool operator's
certificate accepted by the Director, and have immediately available for inspection a valid
photo identification. That person need not be on the premises during the operation of the
spa/interative water feature provided that he is available on-call, the on-call telephone
number is posted in view of the patrons, and the operator can return to the facility within
thirty (30) minutes.

- 20
- 21 22

23

(c) The pool operator shall have the original pool operator's certificate, and valid photo identification available for inspection during the operation of the aquatic facility.

- (d) A pool operator shall be at least 16 years of age and shall have successfully
 passed a pool operator's examination approved by the Director and administered by an
 exam proctor that is approved by the Director within 30 days of the time application for the
 pool operator's certificate. Reasonable fees may be charged for the proctoring of a pool
 operator's exam and issuance of a pool operator's certificate by the Director or a third party
 approved by the Director.
- 30

(e) A pool operator's certificate shall be issued only to a person who has passed
the pool operator's examination, shall not be assignable or transferable, and shall be valid
only for a period not to exceed three years from the date of issuance. Expired certificates
must be reissued in accordance with <u>Sec. 11-11-10</u> (D).

35

(f) Swimming pools or waterpark facilities operating without a trained pool
operator, holding a valid pool operator's certificate, on the premises, with an operator
unable to satisfactorily demonstrate basic knowledge of swimming pool operation, or in a
manner that adversely impacts the public health and safety are subject to immediate closure
and permit suspension.

41

42 **Sec. 11-11-11** 43

1 Issuance of a License to Pool Management Companies.

44 (a) Any person or company that contracts to operate any aquatic facility owned
45 by another person must obtain a license from the Director to operate a pool management
46 company. A copy of the license shall be posted in a location conspicuous to the public on

1				
1	the premises of each pool facility managed by the pool management company. <u>It shall be the</u>			
2	responsibility of the Ppool Mmanagement Ccompany to notify the Director when the			
3	aquatic facility changes pPool Mmanagement C companies.			
4				
5	(b) The application fee for the license required in <u>Sec. 11-11-11</u> (A) are as			
6	established in <u>Sec. 11-11-25</u> .			
7				
8	(c) The owner and the pool management company of any aquatic facility are			
9	responsible for the facility being operated, maintained, and managed in accordance with the			
10	requirements of this Ordinance.			
11				
12	(d) In the event a pool management company is operating an aquatic facility			
13	without the required annual license, the Director, or his designee, shall order the immediate			
14	closure of the facility. An order of closure shall be effective upon delivery of a written			
15	notice to the owner of the facility or his/her designee and shall remain in effect until the			
16	Director, or his designee, by written determination, finds that the facility meets the			
17	requirements of this Ordinance, including either that the pool management company secures			
18	the required annual pool management company license or the <u>aquatic pool</u> facility owner			
19	employs a properly licensed pool management company or assumes full and active			
20	managerial control of the facility.			
21	· ·			
22	Sec. 11-11-12 Requirements for Pool Management Companies.			
23				
24	(a) Any person desiring to obtain a pool management company license as			
25	required by Sec. 11-11-11(A) shall apply in writing on an application approved by the			
26	Director.			
27				
28	(b) A pool management company license shall only be issued to a company that			
29	employs at least one person who has a pool operator's certificate approved by the Director			
30	and who can provide proof of at least 5 years of experience as a certified pool operator			
31	within the previous 7 years.			
32				
33	(c) The fee required in <u>Sec. 11-11-11(B)</u> shall be paid to the Director upon			
34	application for a pool management company license.			
35	application for a poor management company needse.			
36	(d) A pool management company license shall be valid for a period of three			
37	years from the date of issuance.			
38	years from the date of issuance.			
39	Sec. 11-11-13 Revocation of a Pool Management Company License.			
40	See, 11-11-15 Actobation of a 1 our management Company Electise.			
40	(a) The Director may order the revocation of a pool management company			
42	license issued under this Ordinance for serious, flagrant and repeated violations of any of			
43	the requirements of this Ordinance, or for interference with the Director in the performance			
43 44	of his duty.			
45	or mo duty.			
10				

1 (b) The Director shall notify the pool management company in writing, at least 2 sixty calendar days prior to the date of proposed revocation, of the specific reasons for 3 which the license is to be revoked and the procedure for requesting an appeals hearing as 4 described in Sec. 11-11-15.

5 6

Sec. 11-11-14 **Delivery of Notices.**

7

8 A notice of owner's permit or pool management company license suspension or 9 revocation required by this Ordinance is properly delivered when it is hand-delivered to the 10 owner, owner's agent, or pool management company, posted at the facility, or when it is sent by registered or certified mail, return receipt requested, to the last known address of the 11 12 owner or pool management company. A copy of the notice shall also be filed with the 13 records of the Health Department.

14

15 Sec. 11-11-15 Hearings. 16

(a)

17 Any owner or pool management company who has been denied an owner's permit or pool management company license, or any holder of an owner's permit or pool management 18 19 company license who has received an order of suspension or revocation, may request a 20 hearing by filing a written request in the office of the Director, within ten business days of 21 the delivery of the order of permit/license denial, suspension or revocation. The Director 22 shall conduct a hearing within ten business days of receipt of a hearing request and render a 23 decision in writing to the appellant with five business days after the hearing is held. If a 24 written request for a hearing is not filed within the time permitted, the permit denial or order 25 is sustained.

26 27 Sec. 11-11-16

Variances.

28

29

30 31 (b) Any owner who seeks a variance shall apply in writing to the Director Theby 32 completing an application that shall include:

The Director may grant a variance to the requirements of this Ordinance

33 34

35

1. a citation of the Ordinance section to which the variance is requested;

- 36 2. a statement as to why the applicant is unable to comply with the Ordinance 37 section to which the variance is requested; 38
- 39 40

3. the nature and duration of the variance requested;

- 41 a statement of the reasons(s) why the public health or safety would not be 4. 42 jeopardized if the variance was granted, and
- 43 44 a full description of any policies, procedures or equipment that the applicant 5. 45 proposes to use to ameliorate any potential increase in health or safety risks(s) created by granting the variance, and 46

	6.	the hardship to the applicant that would result if the variance were denied
	0.	the hardship to the applicant that would result if the variance were denied.
applic the Di compl	ation is rector lete app	The Director shall complete review a variance application and act on it y business days from the receipt of the written application. If variance s incomplete or the Director requests additional information from the applicant, shall act on the variance application within twenty business days after the plication or requested additional information is submitted. In evaluating the lication, the Director shall consider the following factors:
	1.	information contained in the application;
	<u>2.</u> 1.	unusual circumstances unique to the applicant's facility;
	2.	the hardship to the applicant that would result if the variance were denied;
public	3. at the	the effects that such a variance would have on the health and safety of the aquatic facility;
F		
		any proposed policies, procedures or equipment that could ameliorate any
potent	ial inci	rease in health or safety risks created by granting the variance and,

45		nergency exists, the Director may issue an emergency order necessary for the	
46	preservation of public health and safety or for the protection of patrons and personnel using		

1 any aquatic facility. The emergency order shall state the reasons and precise factual basis 2 upon which it is issued, the actions which an owner, pool operator and/or pool management 3 company are required to take, and the time period for which it is effective. A copy of the 4 emergency order shall be delivered to the owner of the facility or his/her designee and may 5 be publicized in any manner deemed appropriate by the Director. 6 7 Sec. 11-11-24 Grandfather Clause. 8 9 Except as provided in this section, the requirements of this Ordinance (a) 10 governing design or construction of permanent physical facilities shall not apply to any aquatic facility that was constructed prior to the effective date of this Ordinance in 11 12 accordance with the requirements of the ordinance in effect at the time construction was 13 completed (hereinafter referred to as an "existing facility") and that continues to meet those 14 requirements. 15 16 (b) The design and construction requirements of this Ordinance, shall apply to 17 the remodeling of an existing facility unless the Director determines, in writing, that alternate requirements, including, but not limited to, the design and construction 18 19 requirements in effect at the time of construction shall apply to the remodeling of the 20 existing facility. 21 22 Each separate body of water at an aquatic facility shall have a separate (c) 23 circulation, filtration and disinfection system. 24 25 Swimming pools constructed prior to the effective date of this ordinance (d) 26 shall have a main drain outlet system that incorporates a method that prevents suction outlet body entrapment and injury that is approved under this code or by the Director. one or more 27 28 of the following measures to prevent entrapment: 29 30 1. A minimum of two interconnected main drain outlets, that cannot be isolated 31 by valves or other means, for each recirculation pump system. Main drain outlets shall be 32 located in the deepest part of the pool. All piping associated with the main drain outlets 33 shall be of equal diameter and each main drain shall be of equal size. Main drain outlets and 34 associated piping shall be hydraulically designed to provide equal flow though each main 35 drain outlet. A main drain outlet shall be no less than three feet and no more than twenty feet from another main drain outlet, and no more than fifteen feet from a pool side wall; 36 37 38 One unblockable main drain outlet for each recirculation pump system. An 39 unblockable main drain outlet shall be a minimum of 18 inches by 23 inches in size. 40 Unblockable main drain outlets with sizes other than 18 inches by 23 inches may be used 41 provided that they are approved by the Director. 42 43 3. A safety-vacuum release system for each recirculation pump system. These 44 systems shall be tested on an annual basis by the owner, and documentation shall be provided in the pump room near the device specifying who performed the test, when the test 45 46 was performed, how the test was performed, and whether the system passed the test.

1	Additionally, th	nese systems shall be maintained and calibrated according to the
2	manufacturer's	•

31		certificate is issued by the Director,
32		•
33	Sec. 11-11-26	Civil Penalties for Violations;
34		
35	(a)	It shall be unlawful for any person to fail to comply with any of the
36	regulations pro	mulgated pursuant to this chapter. Any person who fails to comply with any
37	such regulation	shall be in violation of this chapter and, for each such violation, shall be
38	•	l penalty. Each day, or any part thereof, during which a violation of this
39		or persists shall constitute a separate violation of this chapter.
40	1	
41	(b)	Falsifying or presenting to the Health Department a falsified pool operator's
42		R certificate, lifeguard certificate or electrical inspection shall be a class one
43		as specified in Title 1, Chapter 1, Sec. 1-1-11. Violation of Sec. <u>11-11-7(A)</u>
44		1(A) of this chapter shall be a class two civil violation as specified in Title 1,
45		1-1-11. Any other violation of this chapter shall be a class four civil
46		ecified in Title 1, Chapter 1, Sec. 1-1-11.

2 1. The civil penalty for a class one civil violation shall be issued to the pool 3 management company. 4 5 2. In the event that the facility is self-managed by the owner, or the owner 6 submits the electrical inspection, the civil penalty for a class one civil violation shall be 7 issued to the owner. 8 9 Upon determining that one or more violations of this chapter exists, the (c)10 Director, or his/her delegate, shall cause a written notice of the violation or violations to be 11 delivered to the owner or operator of the aquatic facility that is in violation of this chapter, 12 or to the person in charge of the aquatic facility. The notice shall, with respect to each 13 violation, contain the following information: 14 15 a description of the violation, with a citation to the regulation that has been 1. 16 violated; 17 18 2. a statement of the amount of the civil penalty to be assessed; 19 20 3. a statement that the person in violation may elect to make an appearance in 21 person, or in writing by mail, to the Treasurer of the City, and admit liability for or plead no 22 contest to the violation, abate the violation, and pay the civil penalty established for the 23 violation, and a statement of the date by which such penalty shall be paid; and 24 25 4. a statement that, in the alternative, the person in violation may elect to 26 contest the violation by filing with the Director, within ten days of receipt of the notice of 27 violation, a written notice of the person's election to contest appeal the violation, and further 28 that, in the event the person elects to contest the violation, the person shall be entitled to an 29 administrative hearing on the violation before the Director, or a designee of the Director. 30 31 (d) If, after a hearing held pursuant to 11-11-26(c)(4), the director or the 32 designee of the director finds that a violation of this chapter has occurred, the person found 33 to be in violation shall, within ten days of the finding, pay the civil penalty originally 34 assessed. 35 36 If a person charged with a violation of this chapter does not elect to admit (e) 37 liability or plead no contest and to pay the assessed penalty, or, following a hearing under 38 subsection 11-11-26(c)(4) which results in a finding that the person has violated the chapter, 39 does not pay the assessed penalty, the violation shall be tried in the Alexandria General 40 District Court upon a warrant in debt, with the same right of appeal as provided in civil 41 actions at law. 42 43 (f) A plea of no contest to, or a finding or admission of liability to, a violation of 44 this chapter shall not be deemed a criminal conviction. 45

1 The remedies provided in this section are cumulative and not exclusive. The (g) 2 designation of a violation of this chapter as a civil violation shall not be construed as 3 prohibiting city officials from initiating appropriate administrative, criminal civil procedures 4 to prevent, correct, restrain or abate violations of the chapter. 5 6 **ARTICLE B** 7 8 **Swimming Pools; Design and Construction** 9 10 Sec. 11-11-27 Location. 11 12 The location of a swimming pool shall in no way hinder the operations for which it 13 is designed nor adversely affect patron safety or water quality. Public pools shall not be 14 located in areas subject to flooding or inundation by ground water drainage. 15 16 Sec. 11-11-28 Access. 17 18 Outdoor pools. Direct and unobstructed access to any swimming pool area (a) 19 shall be provided for the admission of emergency and service vehicles, equipment and 20 personnel. An emergency access lane providing direct access for emergency vehicles shall 21 terminate at each pool facility's emergency gate required in Sec. 11-11-50. Emergency 22 access lanes shall be kept clear and unobstructed. 23 24 (b) Indoor pools. Emergency access to indoor or elevated swimming pools shall 25 be provided at the entrance nearest the pool or the elevator or stairway leading to the pool. Permanent and conspicuous signs shall be posted indicating the most direct route to an 26 27 indoor or elevated pool. An emergency access lane providing direct access for emergency 28 vehicles shall terminate at the entrance nearest the indoor or elevated swimming pool, or the 29 elevator or stairway leading to the indoor or elevated swimming pool. Emergency access 30 lanes shall be kept clear and unobstructed. 31 32 Sec. 11-11-29 **Construction materials and components.** 33 34 Swimming pools shall be constructed of materials which are rigid, inert, impervious, 35 and non-toxic to humans. The materials for components and accessories to be used in and 36 around swimming pools shall be such that the operational strength of the assembly shall not 37 be adversely affected by the exposure to external conditions or normal temperature 38 extremes; and shall be chemically compatible with the materials used in the operation and 39 maintenance of the swimming pool. In addition, construction materials shall provide a tight 40 tank to which a smooth, easily cleanable surface can be applied. The swimming pool 41 surface shall be composed of an impervious material which will retain a smooth, slip 42 resistant, easily cleanable finish without surface cracks or open joints, and shall be finished 43 in a white or light color. Sand or earth bottoms shall not be permitted. If used, lines on the 44 bottom of the pool used to designate swimming lanes should be constructed in a color and of a width that allows for quick and easy identification of a swimmer in distress. Materials 45 other than those described in this section may be approved by the Director. 46

20

Sec. 11-11-36 Stairs, Steps, Ladders, and Bench Seats.

21 (a) Egress. A minimum of two means of egress shall be provided for swimming 22 pools with a perimeter of 100 feet or less. One additional means of egress shall be provided 23 for each additional 200 feet of pool perimeter, or fraction thereof. Additional means of 24 egress may be required as determined by the Director. The location of the means of egress 25 shall be consistent with the design of the swimming pool. A means of egress shall be 26 provided at both sides of the diving area.

1	
2	(b) The design and construction of swimming pool stairs, ladders, and bench
3	seats shall conform to the following:
4	
5	1. The treads of all stairs, ladders, and step holes shall be of non-slip
6	construction.
7	
8	2. When stairs or bench seats are constructed, they shall be recessed into the
9	pool deck, and shall conform to the VUSBC.
10	
11	3. The top and leading edge of all stair treads and bench seats shall be marked
	1 0 0
12	by a permanent, non-slip band of contrasting color <u>tile</u> that is a minimum of <u>one two</u> inch <u>es</u>
13	in width and is located within <u>one two</u> inches of the step or bench edge.
14	
15	4. Recessed step holes shall not protrude into the pool. The recessed step shall
16	have a minimum tread width of six inches, a minimum tread length of twelve inches, a
17	minimum height of five inches, and shall drain into the pool to prevent the accumulation of
18	dirt. Each set of recessed step holes shall be provided with handrails on both sides of
19	recessed step holes to fully service all treads and risers.
20	recessed step notes to rang service an deads and risers.
21	5. Below the water level, there shall be a clearance of not more than six inches
22	nor less than three inches between any ladder tread edge, measured from the pool wall side
23	of the tread, and the pool wall.
24	
25	6. The top surface of the uppermost stair tread shall be located not more than 12
26	inches below the pool coping or deck.
27	
28	7. The upper railing surface of ladder handrails shall extend a minimum of 28
29	inches above the pool coping or deck. a minimum of 28 inches. Ladder bottom braces shall
30	have end caps or bumpers that rest firmly against the pool wall. The top rung of the ladder
31	shall not be more than 12 inches below the pool deck.
32	shan not be more than 12 menes below the poor deek.
32 33	Sec. 11-11-37 Recirculation System.
	Sec. 11-11-57 Reciliculation System.
34	
35	(a) All swimming pools shall be equipped with a recirculation system which, at a
36	minimum, consists of a pump, a filter, connecting piping, fittings, valves, disinfecting
37	equipment, necessary pipe connections to the inlets and outlets, a skimmer and/or overflow
38	gutter and main drains. A separate recirculation system shall be provided for each
39	swimming pool.
40	
41	(b) The recirculation system shall be designed to accommodate the following
42	required maximum turnover time:
43	
43 44	1. Wading pool, two hours;
	1. Waung pool, two nouis,
45	
46	2. Any other swimming pool, six hours.

(c) Adequate provisions shall be made for backwashing and/or cleaning of all
 filters.

4

5 Sec. 11-11-38 Filter Room.

6

7 (a) Swimming pool facilities shall have a room(s) or structure which encloses 8 the filtration equipment, pumps, electrical equipment, chemical feed equipment, and other 9 recirculation and filtration system appurtenances. The room(s) or structure shall provide 10 working area and access above and around all equipment no less than that specified by the 11 manufacturer and sufficient to permit routine maintenance. The room(s) or structure shall 12 be provided with a lockable door(s) of sufficient width to permit the removal of equipment. 13 The entrance to the filter room(s) shall be easily accessible from the deck so the pool 14 operator can enter the room(s) without having to exit the enclosed pool area. The room(s) 15 or structure shall be impervious to water and resistant to the chemicals necessary for the 16 operation of the facility.

17

(b) The floor of the filter room(s) or structure shall be designed to provide
adequate drainage with a minimum floor slope of 1 to 48 and a maximum floor slope of 1 to
24 to a floor drain and shall be kept dry at all times, particularly in the vicinity of electrical
panels. Discharging filter backwash water onto the floor is prohibited.

22

(c) The filter room and chemical shall be equipped with mechanical crossventilation that provides one air change per minute.

(d) Illumination of at least thirty foot-candles, measured 24 inches above the
floor, shall be provided above equipment and working areas. A minimum of two light
fixtures shall be installed, and all light fixtures shall be shielded.

29 30

31

Sec. 11-11-39 Filters and Gauges.

32 The recirculation system shall be equipped with a filtration system that is (a) 33 NSF listed, or the equivalent, and will filter the entire water volume of the swimming pool 34 within the required turnover time specified in Sec. 11-11-37(B). Filtration equipment shall 35 be operated continuously, 24 hours per day. Valves shall be provided at appropriate locations to allow the isolation and maintenance of equipment. Filter components which 36 37 require servicing shall be accessible for inspection and repair and installed according to the 38 manufacturer's specifications and recommendations. All pressure systems shall be provided 39 with a manual or automatic means to permit the release of air which may accumulate within 40 the filter tank. Design criteria for the indicated type of filters shall be as follows:

41

High-rate filter. A filter utilizing a media capable of filtration at a high rate
 of flow. The rate of flow shall not be less than five gallons per minute per square foot of
 filter surface area, nor greater than twenty gallons per minute per square foot of filter
 surface area. The backwash rate of flow shall be at the rate specified by the manufacturer.

1 2. Diatomaceous earth filter. A filter utilizing diatomaceous earth as a filter 2 media. 3 *Pressure or vacuum type*. A diatomaceous earth filter through which the rate (a)4 of flow does not exceed two gallons per minute per square foot of filter surface area. 5 6 Pressure or vacuum with slurry feeder. A filter that is equipped with a (b) 7 feeder that continuously feeds a diatomaceous earth suspension and has a rate of flow not 8 exceeding three gallons per minute per square foot of filter surface area. 9 10 (c) Separation tanks or a sump pit with a stand pipe shall be installed to collect 11 spent diatomaceous earth so that it can be collected and disposed of in an approved manner. 12 Alternative methods for diatomaceous earth collection may be approved by the Director. 13 When using diatomaceous earth filters with separation tanks, the separation tank shall be 14 provided with a means of release or a lid which provides a slow and safe release of pressure 15 and shall have a readily visible precautionary statement affixed that warns the user that the 16 air release must be opened before opening the separation tank. 17 18 Piping and valves shall be provided for all diatomaceous earth filters to allow (d) 19 for a pre-coat cycle that re-circulates water directly from the outlet to the inlet of the filter 20 without returning to the swimming pool. 21 22 3. *Rapid sand filters.* A filter utilizing sand as the filter media, with a filtration 23 flow rate not exceeding three gallons per minute per square foot of filter area. The 24 backwash rate of flow shall be four times the filtration rate. 25 26 4. Other filtration systems whose performance equals or exceeds those 27 described above may be used in a pool recirculation system with the approval of the 28 Director. 29 30 *Filter cartridges.* The flow rate through a filter cartridge shall not exceed the 5. 31 design rate or a maximum of 0.375 gallon per minute per square foot of filter surface area. 32 Cleaning of filter cartridges must be in accordance with the manufacturer's 33 recommendations. One complete extra set of filter cartridges shall be available at all times 34 to facilitate cleaning. 35 36 Gauges and flow meters. The filter system shall be provided with a (b) 37 minimum of one influent pressure gauge for each filter and one effluent pressure gauge 38 following the filter system. Recirculation system pumps shall be fitted with a vacuum and 39 pressure gauge installed as near as practical to the pump suction and discharge pipe 40 connections. All pressure gauges shall measure pressure directly in pounds per square inch 41 (psi). Vacuum gauges shall measure in inches of mercury. The system shall have a flow 42 meter on the return line to measure the flow of filtered water being returned to the 43 swimming pool. The flow meter shall be of fixed calibration, shall measure in gallons per 44 minute, and shall be properly sized to indicate the design rate of flow at approximately mid-45 scale. Gauges and flow meters shall be readily accessible and clearly visible, shall be in

good repair, and shall be located and installed according to the manufacturer's specifications
 and recommendations.

3 4

5

Sec. 11-11-40 Pumps and Strainers.

6 (a) *Pump*. A removable and reinstallable pump(s) shall be installed with 7 adequate capacity for the required turnover time specified in Sec. 11-11-37(B). Whenever 8 possible, the pump(s) shall be so located as to eliminate the need for priming. If the 9 pump(s) or suction piping is located above the overflow level of the swimming pool, the 10 pump(s) shall be self-priming. The pump(s) shall be capable of providing a flow adequate 11 for the backwashing of filters. Pumps shall be securely supported.

12

(b) *Hair and lint strainer*. All pump systems shall have a hair and lint strainer.
The hair and lint strainer baskets shall be corrosion resistant with openings not exceeding
1/8 inch in size, which provide a free flow area of at least four times the area of the pump
suction line at the strainer connection, and shall be accessible for frequent cleaning. An
extra hair and lint strainer basket shall be provided for each hair and lint strainer.

18 19

20

25

26 27

28

Sec. 11-11-41 Piping System.

(a) The piping system for swimming pools shall be composed of NSF listed
 materials or their equivalent designed for the following operations:

- 23 24
 - filling the swimming pool;
 re-circulating the pool water through the treatment equipment;
 - 3. backwashing or washing each filter to waste;
 - 3. backwasning or wasning each filter to waste
 - 4. operating a suction cleaner (if provided);
 - 5. emptying the pool; and
 - 6. draining the system.
- 29 30

In addition, the piping system of any swimming pool containing a hydro-jet system
 or water conditioning system shall be composed of NSF listed materials, or equivalent,
 which are capable of supporting such systems.

34

35 There shall be no direct connections between the swimming pool (b) 36 recirculation system and the sewer or potable water supply. Fill spouts, when installed, 37 shall be located under diving boards, under guard chairs, adjacent to pool ladder handrails, 38 or otherwise protected to preclude a tripping hazard and shall be properly supported if not 39 inherently self-supporting. Fill spouts shall not project into the space above the pool water 40 surface by more than two inches beyond the edge of the pool. Other means of filling the 41 pool shall comply with the VUSBC and be approved by the Director. Cross-connections 42 shall be prevented by providing an air gap between the highest possible flood level of the 43 pool and the pool fill spout. The air gap shall not be less than two fill spout pipe diameters 44 or less than six inches. An approved backflow prevention device may substitute for the air 45 gap.

1 2	(c) water to waste	The system shall have a means of discharging filter backwash or other pool e as follows:
3	water to wast	
4	1.	Waste from backwashing or draining of a pool shall be discharged in a
5	manner appro	wed by the Director. When only a sanitary sewer is available to a swimming
6		of discharge is subject to the approval of the appropriate authority for sanitary
7		eatment facilities.
8		
9	2.	An air gap to prevent a cross-connection between waste discharge piping and
10	recirculation	piping shall be provided.
11		
12	3.	Discharge receptor and piping of sufficient size to accept backwash water
13	and prevent b	
14	Ĩ	
15	4.	A sight glass in the backwash discharge line in a readily observable location.
16		
17	5.	In the event the backwash waste pipe will not accommodate the backwash
18	flow, 1	the design and installation of a holding tank shall be required. The holding
19	tank sl	hall be sized to contain 110 percent of the volume of water required to
20	adequ	ately clean the filter(s) at the backwash flow rate and length of time specified
21	by the	filter manufacturer.
22		
23	(d)	The piping system shall be securely anchored, supported or braced, unless
24	inherently sel	f-supporting. Visible piping shall be marked with permanent tags, labels or
25	markings to c	learly identify the direction of flow and shall be color coded as follows:
26		
27	1. Fre	eshwater blue (to check valve)
28	2. Ba	ckwash black
29	3. Inf	luent yellow
30	4. Eff	luent white
31		ction cleaner orange (to control valve)
32		circulation green (Auxiliary recirculation not part of the filtration system; such
33		t not limited to, water features, jets, fountains, water falls, aeration systems or
34		r features)
35	7. He	ater piping red (to nearest isolation valves)
36		
37	(e)	All piping shall be designed to minimize friction losses and to carry the
38		tity of water at a velocity not to exceed eight feet per second for copper
39		ing, and ten feet per second for discharge piping other than copper. Suction
40	•	Il piping shall not exceed six feet per second. Pipe suction velocity may also
41	•	the maximum flow rate specified by the manufacturer of the suction outlet
42	covers installe	ed in the swimming pool.
43		
44	(f)	All piping and appurtenances included in the recirculation and filtration
45	system shall b	be inspected and approved by the Director prior to covering. All plastic pipe

46 connections and fittings shall be joined using the type primer and cement recommended by

the pipe manufacturer. The primer and cement shall be of different colors so that they can be easily identified by visual inspection. All piping shall be tested at the time of inspection to at least 25 psi of pressure. All subsurface pool piping shall be imbedded in and covered with sand or an approved equivalent.

- 5
- 6 (g) All valves shall be clearly identified with permanent markings or tags which
 7 are referenced by a pool water recirculation system operation manual and/or placard.
 8

9 **Sec. 11-11-42 Main Drain Outlets.** 10

(a) Swimming pools shall that employ a main drain outlet system that must
 comply complies with (1), or (2) or (3) of this section. In addition, pools designed without a
 main drain must install additional inlets and skimmers to ensure adequate circulation. The
 number of inlets and skimmers may be in excess of that stated in 11-11-43 and 11-1145
 depending on the design of the system.

- 16
- 17

18 A minimum of two interconnected main drain outlets, that cannot be isolated 1. 19 by valves or other means, for each recirculation pump system. Main drain outlets shall be 20 located in the deepest part of the pool. All piping associated with the main drain outlets 21 shall be of equal diameter and each main drain shall be of equal size. Main drain outlets and 22 associated piping shall be hydraulically designed to provide equal flow though each main 23 drain outlet. A main drain outlet shall be no less than three feet and no more than twenty 24 feet from another main drain outlet, and no more than fifteen feet from a pool side wall; 25

2. One unblockable main drain outlet for each recirculation pump system <u>that</u>
 meets the requirements of ANSI/APSP-16 2011. An unblockable main drain outlet shall be
 a minimum of 18 inches by 23 inches in size. Unblockable main drain outlets with sizes
 other than 18 inches by 23 inches may be used provided that they are approved by the
 Director.

31

32 (b) A main drain outlet opening and other suction outlet openings shall be 33 covered with a protective grate or anti-vortex cover which is not hazardous to patrons, is 34 anchored in accordance with the manufacturer's specifications and recommendations, and is 35 designed to prevent body entrapment or injury. Main drain grates or covers shall be secured so that their removal requires the use of tools. Main drain covers shall be manufactured and 36 37 installed according to the specifications set forth by the ASME/ANSI and NSF International 38 standards for suction fittings. The cover, frame, and all components shall be corrosion 39 resistant and shall be designed to withstand the maximum anticipated forces generated by 40 active use.

41

42 (c) The design of a main drain outlet or outlets, and the components of main
43 drains outlets shall comply with ANSI/ASME A112.19.8-2007 ANSI/APSP-16 2011.
44

1 The water velocity through a main drain outlet shall not exceed the maximum (d)2 water velocity specified by the manufacturer. The maximum flow rate possible at the 3 manufacturer's specified velocity shall meet or exceed the total system flow.

4 5

(3) Other main drainage system as approved by the Health Director or their designee.

7 Sec. 11-11-43

8

6

Inlets.

9 All inlets located in pool walls shall be spaced not more than twenty feet on center 10 around the pool perimeter. When inlets are located in the pool bottom, the number of inlets 11 and their location shall be designed to ensure the proper distribution of filtered water. The 12 minimum number of bottom inlets shall be determined by dividing the perimeter of the pool, 13 in feet, by twenty. All wall inlets, except makeup water inlets and wading pool inlets shall 14 be at least fifteen inches below the operating water level of the pool, except for 15 prefabricated gutters with 45 degree angle inlets in the bottom. Each inlet shall be provided 16 with a means of adjusting flow, through a range of at least fifty percent of its design 17 capacity. Inlet flow controls shall be readily accessible.

- 18
- 19 20

Sec. 11-11-44 **Pool Suction Cleaner.**

21 A suction cleaner shall be provided. Where a suction cleaner is operated by the re-22 circulating pump, a device or devices shall be provided for regulating the flow(s) from the 23 pool outlets. The suction cleaner line shall be connected through a hair and lint strainer. 24 Portable electric suction cleaners shall be UL rated and connected to a GFCI protected 25 electrical outlet. Waste from a portable suction cleaner shall be disposed of as solid waste. Hydraulic jet-type suction cleaners shall be permitted in lieu of other suction cleaners if the 26 27 fresh water pressure is 30 psi or greater and the water service line is provided with an 28 approved backflow preventer.

29

31

30 Sec. 11-11-45 **Overflow Gutters and Skimmers.**

32 Overflow gutters or skimmers shall be provided on the vertical wall(s) of all 33 swimming pools, and designed to adequately skim the pool surface. The overflow gutter or 34 skimming system shall be capable of continuously removing eighty percent or more of the 35 re-circulated water and returning it to the filter.

36

37 Where overflow gutters are used, they shall extend completely around the (a) 38 swimming pool except at steps, recessed ladders, ramps, and stairs. The overflow gutter 39 shall be designed to serve as a handhold. Overflow gutters having a surge capacity less than 40 one cubic foot per linear foot of pool perimeter shall be indirectly connected to the 41 recirculating system through a properly sized and designed surge tank/balancing tank with a 42 minimum surge capacity of one gallon per square foot of water surface area. Overflow 43 gutters having a surge capacity of one cubic foot, or greater, per linear foot of pool 44 perimeter shall be connected to a properly sized and designed balancing tank. The gutter, 45 drains and piping draining to the surge tank/balancing tank shall be designed to rapidly 46 remove overflow water caused by recirculation, displacement, wave action or other causes

1 produced during the maximum swimming pool load. The opening into the gutter beneath 2 the coping shall not be less than four inches and the interior width of the gutter shall not be less than three inches. Where gutters are used, they shall be designed to prevent patron 3 4 entrapment or injury. The overflow edge or lip shall be rounded and not greater than $2\frac{1}{2}$ 5 inches thick for the top two inches. The overflow outlets shall be provided with outlet pipes 6 at least two inches in diameter. The outlet fittings shall have a clear opening in the grating 7 at least equal to $1\frac{1}{2}$ times the cross-sectional area of the outlet pipe. 8 9 Where skimmers are used they shall be provided at the rate of one skimmer (b)per forty feet of pool perimeter or fraction thereof, or one per 400 square feet of pool water 10 surface area or fraction thereof, whichever is greater. They shall be spaced so as to provide 11 12 maximum skimming action of the pool surface. 13 14 1. Skimmer throats shall be no greater than the width required for ten-inch weirs. 15 16 2. Skimmer weirs shall be automatically adjustable to variations in water level over 17 a minimum range of four inches. 18 19 3. A removable basket or screen to entrap large matter shall be provided in each 20 skimmer. 21 22 4. The flow rate through the skimmer shall not be less than twenty gallons per 23 minute, nor greater than 35 gallons per minute. Each skimmer shall be provided with a 24 means of adjusting the flow through the skimmer. 25 26 5. Skimmer systems shall be designed so that all skimmers are interconnected. 27 28 6. Skimmer lids shall be securely in place at all times. 29 30 Sec. 11-11-46 Decks. 31 32 All swimming pools shall have a continuous deck at least five feet wide, (a) 33 including the width of the coping, extending around the entire perimeter of the pool. In 34 addition, there shall be at least three feet of clear, unobstructed deck behind any diving 35 stand, guard stand, or other deck mounted equipment. All decks shall be constructed of continuous poured concrete or other approved smooth, impervious material which shall have 36 a smooth, non-slip finish. All decks shall have a slope of not less than 1 to 48 or more than 37 38 1 to 24 and shall be designed to conduct drainage away from the swimming pool in a 39 manner that will not create a slip hazard or contribute to the ponding of water. All decks 40 shall be properly supported and any fill under the decks shall be properly compacted to 41 prevent decks from settling. Roof run-off or other drainage shall not be wasted onto the 42 deck. All areas surrounding the deck shall have surface drainage directed away from the 43 pool deck area or be served by a drainage system approved by the Director. 44 45 (b) Deck risers and steps shall comply with the VUSBC.

1 Sec. 11-11-47 Lighting.

3 (a) An indoor swimming pool or an outdoor swimming pool used after dark shall 4 be equipped with lighting fixtures to light all parts of the pool, the pool water, and the 5 swimming pool area. A sufficient number of light fixtures shall be installed to supply a 6 minimum of ten foot candles for the pool surface area and thirty foot candles for the pool 7 deck area measured six inches above the pool deck and water surface. The lighting fixtures 8 shall be designed and installed so that the lifeguard(s) and patrons can clearly see every part 9 of the swimming pool, including decks, diving boards, and other appurtenances, without 10 interference from glare. Lighting fixtures shall be installed in a manner which creates no 11 hazard to patrons or employees. All lighting fixtures shall be prohibited directly above the 12 water surface area or within three feet horizontally of the pool rim except as permitted by 13 theVUSBC. All light fixtures shall be shielded.

14

(b) Underwater pool lighting, when installed, shall provide at least one watt per
square foot of water surface area, or the equivalent, and shall be equipped with GFCI(s) as
required by the VUSBC.

18

19 When using LED lighting for outdoor pools, the minimum intensity shall be (c). 20 not less than 108 lux or 10 lumens per square foot, at the water surface (measured 21 horizontally). For indoor pools maintained illumination shall be not less than 323 lux or 30 22 lumens per square foot, at the water surface (measured horizontally). Deck area lighting for 23 both indoor and outdoor pools shall provide maintained illumination of not less than 108 lux 24 or 10 lumens per square foot, at the walking surface of the deck (measured horizontally). 25 Underwater lighting shall provide no less than 86 lux or 8 lumens per square foot, at the 26 water surface area (measured horizontally).

27

28 Sec. 11-11-48 Safety Requirements. 29

30 (a) Swimming pools equipped with pool water heaters shall have a fixed 31 thermometer installed in the main return line. The thermometer shall be located sufficiently 32 downstream from where the water heater effluent pipe connects to the main return line to 33 allow the mixing of the heated and unheated water. The thermometer shall be designed and 34 located so that it may be easily read. A thermometer shall also be provided in a skimmer, or 35 another easily accessible location.

36

(b) A separate room <u>or designated area</u> shall be provided for the care and
isolation of victims of injury, illness, or accident which is directly accessible from the pool
deck. The room shall be well lighted and ventilated, and shall be large enough to permit
unrestricted movement of both the victim and first-aid providers. <u>The room shall be located</u>
so a clear and unobstructed view of the pool(s) is provided.

42

43 (c) A direct dial, hard-wired telephone that is fully operational shall be provided
44 within the swimming pool area. The phone shall be immediately accessible from the pool
45 deck. The phone shall be located so a clear and unobstructed view of the pool(s) is

provided. Emergency telephone numbers and the facility's name and address shall be posted
 by the telephone.

3

4 (d) Permanent depth markings shall be installed in a minimum 4 inch high 5 number and be of contrasting color of the pool walls and deck. The full or abbreviated 6 words "feet", "FT", or "inches", "IN" shall be a minimum of 1 inch high and may be located 7 on the same tile-surface as the depth number. The depth of water in swimming pools shall 8 be marked at every one foot increment of depth and at least every twenty feet of swimming 9 pool perimeter on both the horizontal surface of the deck and the vertical surface of the pool 10 wall. Horizontal depth markings shall be positioned to be read while standing on the deck 11 facing the water. Depth markings on deck surfaces shall be non-slip. All numbers and 12 letters shall be at least five inches in height and be of contrasting color with the pool walls 13 and deck. Depth markings are not required for wading pools.

14

27

(e) Fixed, floating, or moveable platforms in swimming pools shall be
constructed with an air space of at least eighteen inches between the water surface and the
underside of the platform or be provided with a barrier system at the perimeter of the device
to prevent access under the device.

(f) There shall be a minimum of one lifeguard stand provided for every 2,000 square feet of water surface area <u>of the pool.</u> within the pool enclosure. Additional lifeguard stands may be required where, due to the configuration of the pool, full visibility is not provided from the installed lifeguard stand. Facilities with less than 2,000 square feet of water surface area shall not be required to provide a <u>fixed or installed</u> elevated lifeguard stand <u>unless the Health dDirector or Designee deems it necessary due to the configuration of the pool.</u>

28 A transition line shall be provided in all pools that are deeper than 5 feet. (g) 29 The line shall be on the bottom of the pool and continue up to the waterline of the pooland a 30 floating life line shall be provided at the five-foot water depth between the shallow and deep 31 portions of the swimming pool. The transition line shall be constructed of tile that is of a 32 dark and high contrasting color. Tile located on the pool floor shall be non-slip. The life 33 line and transition line shall be located within six inches of n either the shallow side of the 34 break in slope to water greater than five feet in depth. The life line shall have clearly visible 35 floats set at not greater than five-foot intervals. The transition line shall be a minimum of 36 two inches wide. The life line shall be securely fastened to wall anchors of corrosion 37 resistant materials which shall be recessed and shall have no projections into the pool. The 38 line shall be of sufficient size and strength to offer a good handhold and support loads 39 normally imposed by swimmers. The floating lifeline may be temporarily removed from the 40 pool to facilitate lap swimming if:

- 41
- 42

1. There are no children in the pool not swimming laps,

1	3. The floating lifeline is immediately put back in place when lap swimming
2	concludes.
3	
4	(h) There shall be no protrusions, extensions, means of entanglement, or
5	obstructions which can cause entrapment or injury.
6	obstructions which can cause entraphent of injury.
7	Sec. 11-11-49 Disinfection Equipment.
8	Sec. 11-11-47 Disinfection Equipment.
9	(a) All swimming pools shall be provided with approved mechanically operated,
10	positive displacement disinfectant feeding equipment, or other disinfection equipment
11	approved by the Director, which:
12	
13	1. shall be in good working order and shall be capable of providing a continuous
14	and effective residual of disinfectant within the swimming pool water 24 hours per day;
15	
16	2. shall have a design feed rate which will provide effective disinfection levels when
17	the swimming pool is in peak demand conditions;
18	and a minimizer poor to impound contained contained by
19	3. shall be capable of applying a dose the equivalent to maintain a concentration of
20	at least 1 ppm free chlorine throughout the swimming pool at all times of operation.
20	at least 1 ppm nee emorne unoughout the swimming poor at an times of operation.
	4 shlaving conception equipment will only be encoured as secondary disinfection
22	4. chlorine generation equipment will only be approved as secondary disinfection
23	unless the chlorine generation equipment is sized to provide a minimum of 2ppm free
24	chlorine, or enough free chlorine to meet peak demands. Electrolytic generators shall have a
25	TDS or salt (NaCl) readout and a low salt indicator. The feed rate shall be adjustable from
26	zero (0) to full range. The generation unit shall be listed and labeled to UL 1081 by an
27	ANSI-accredited certification organization and shall be interlocked with an automatic means
28	to be disabled. The generator unit(s) shall be installed according to the manufacturer's
29	instructions.
30	
31	(b) The use of chlorine gas as a disinfectant <u>is prohibited.shall not adversely</u>
32	affect the safety and health of patrons, pool personnel, or the public; shall comply with
33	OSHA and the City of Alexandria Fire Prevention Code; and shall comply with the
34	following:
35	Tonowing.
36	1. Chlorine gas feeding equipment and chlorine gas cylinders shall be installed
30 37	
	in a room separate from the filter room(s) and electrical panels and shall be equipped with a
38	lockable door. Gas chlorinator rooms shall be equipped with a forced draft fan exhausting
39	to the outside from the floor level. The exhaust fan shall provide a minimum of sixty air
40	changes per hour. A fresh air inlet shall be provided near the ceiling. The gas chlorinator
41	room shall be located above ground level and below the deck level of all pools. The
42	chlorine gas tanks shall be protected from direct sunlight and securely fastened in place
43	during storage and use, and shall be mounted on a scale when in use. A self-contained gas
44	mask for chlorine or a gas mask with a supply of oxygen under positive pressure or
45	compressed air shall be provided at facilities where chlorine gas is utilized. The chlorine
46	gas mask shall be approved by the Bureau of Mines and the City of Alexandria Fire

1	Department.	The gas mask shall be located accessible to, but outside of, the gas chlorinator		
2	room. The ch	lorinator shall be provided with an emergency cut-off device to prevent gas		
3	discharge or injection of gas during electrical outage. A gas chlorine detection device with			
4	an alarm shall	be provided.		
5				
6	2	The use of gas chlorine as a disinfectant shall require a chemical feeder for		
7	the feeding of	sodium carbonate into the recirculation system.		
8				
9		The use of gas chlorine as a disinfectant shall require that a supply of		
10	ammonia hydi	oxide be present for the checking of leaks in the chlorination system.		
11				
12	(c)	When the pool water recirculation system is equipped with an automatic		
13		rol mechanism that continuously analyzes the pool water and automatically		
14		nical feeding, a water flow sensing device shall be provided that automatically		
15	deactivates all	associated chemical feeders when the water flow in the recirculation system		
16	ceases.			
17				
18	(d)	When bromine is used as the disinfectant, the following shall be followed:		
19				
20	1.	Bromine shall be fed on a continuous basis;		
21	_			
22	2.	A concentration of at least $\frac{2 \text{ ppm}}{4.0-6.0 \text{ ppm}}$ bromine residual shall be		
23		roughout the pool water at all times. A maximum of 4ppm 10 ppm bromine		
24	residual shall	be permitted in any swimming pool during use.		
25				
26	3.	Solid stick or tablet type bromine shall be used with NSF certified		
27	commercial fe	ed equipment.		
28	Λ	Enciencies de la della de la construcción de		
29	4.	Erosion feeders shall be equipped with a flow meter.		
30	Q., 11 11 50			
31 32	Sec. 11-11-50	Fencing and Barriers.		
32 33	(a) A 11	outdoor pool areas shall be completely enclosed with a perimeter fence, or		
33 34		rier, at least six feet in height, measured from the highest ground elevation		
35	-	eet adjacent to the outside of the barrier. If horizontal surfaces are used, top		
36		e separated by a vertical distance that is no less than 45 inches and shall		
30 37	-	assage of a sphere larger than 1.75 inches in diameter through any opening in		
38				
38 39	the fence or barrier. The fence or barrier shall be non-climbable from the outside of the enclosure. Non-climbable shall mean no handholds, footholds, horizontal members, or			
40		that are available, which would aid in climbing the fence from outside of the		
41		shall be no objects within a six-foot arc from the top of the perimeter fence or		
42		closer than three feet to any part of the fence or barrier. The material used to		
43		Sence or barrier shall be approved by the Director. If the fence or barrier does		
44		contal surfaces, it shall be constructed so as to prohibit the passage of a sphere		
45		ir inches in diameter through any opening in or under the fence or barrier.		
45	larger than lot	in increasing dameter through any opening in or under the rence of barrier.		

46 Access gates installed in the perimeter fence or barrier shall have latches and locks at least

pool. equal	(d) diamete (e)	Wading pool skimmers and main drain outlets shall be interconnected with er piping. The distance from the deck to the water level shall be six inches or less.
pool.		Wading nool skimmers and main drain systems shall be interconnected with
	(c)	A separate recirculation system shall be provided exclusively for the wading
requir	ements.	
-	~ ~ ~	The gate width and maneuverability area shall comply with ADA
	0	self-closing, three foot foot high gate that opens outward or away from the
		proved by the Director. The fence shall be at least three feet in height with a

1 2	Equipment.
2 3 4 5 6	(a) Slides, sprinklers, fountains, activity pools, and other pool equipment for which design standards are not contained in this Article shall meet the design standards in Article F of this Ordinance or shall meet design standards approved by the Director.
7 8 9 10	(b) The construction of filter room shall meet the requirements of <u>Sec. 11-11-38</u> . The collector tank or reservoir shall be installed in accordance to manufacturer's specifications.
11 12 13 14	(c) The disinfectant residual, pH, total alkalinity, and calcium hardness shall be continuously maintained within the minimum and maximum ranges specified in the table in $11-11-69$ (c)(1).
15	Sec. 11-11-55 Ventilation in Indoor Swimming Facilities.
16 17 18 19 20	Indoor swimming facilities shall be equipped with mechanical ventilation that provides for 0.5 cfm of outdoor air per square feet of pool and deck area.
21	ARTICLE C: Swimming Pools; Operation and Maintenance
22 23 24	Sec. 11-11-56 General Operation and Maintenance.
25 26 27 28 29 30	Swimming pool facilities shall be operated and maintained in a manner which will not create a nuisance or hazard to the public's safety or health. The pool shall be adequately secured to prevent unauthorized entry when not in use. Water in the pool and that standing on or in pool covers or other pool equipment shall at all times be treated in a manner to prevent the growth of algae and the breeding of mosquitoes or other insects.
30 31 32	Sec. 11-11-57 Water Operating Levels.
32 33 34 35 36	The water level shall be maintained within the operating range of the skimmers or at the top of the overflow rim of a gutter system at all times the swimming pool is open for use.
37	Sec. 11-11-58 Monitoring, Reporting, and Record Keeping.
 38 39 40 41 42 	The following information shall be recorded and maintained by the owner for a minimum of one year from the date of the recording, occurrence, or incident; and shall be available for inspection at all times while the swimming pool is in operation:
42 43 44	(a) Water Quality Parameters and Maintenance.
44 45 46	1. The disinfectant residual and pH shall be tested and the results recorded at least once every two hours while the pool is in use. ORP readings, if applicable, shall also be

1 recorded every two hours while the pool is in use. The water temperature, for heated pools, 2 and the total chlorine residual, for pools utilizing chlorine, shall be tested and recorded a 3 minimum of once a day. 4 5 2. Influent and effluent pressure gauge readings and the flow rate shall be observed 6 every two hours and be recorded at least two times per day; at least once prior to opening to 7 the public and during the last hour of operation. The date and time of each backwash or 8 filter cleaning shall be recorded. 9 10 3. Total alkalinity and calcium hardness tests shall be performed and recorded 11 weekly, or more often as necessary to provide proper chemical balance of the pool water. 12 Cyanuric acid tests shall be performed and recorded weekly at all pools utilizing cyanuric 13 acid or chlorinated cyanurates. 14 15 4. The date, time, type, and amount of any chemicals added to the pool water shall 16 be recorded. However, for chemicals added continuously with a chemical feeder, only the 17 type of chemical shall be documented. 18 19 (b) Other Records. 20 21 1. The owner shall immediately notify the Director of all drownings, near 22 drownings, injuries, water- related illness or deaths which have occurred. Notification of 23 minor injuries, such as minor abrasions or superficial cuts, shall not be required. Owners 24 shall submit a complete written drowning and injury report, containing all relevant facts and 25 information related to the incident, to the Director within seven days of an incident. The following information must be included in the report of all drownings, near drownings, 26 27 injuries, water-related illnesses, or deaths which have occurred: 28 29 (a) Name, address and phone number of pool operator on duty at time of 30 incident; 31 32 (b) Date, time and exact location of incident; 33 34 Name, age, certifications, address and phone number of persons responding (c) 35 during the incident; 36 37 Name address and phone number for all lifeguards on duty at time of (d) 38 incident; 39 40 Exact locations of all lifeguards on duty at the time of the incident; (e) 41 42 (f) Pool and/or spa water clarity at the time of the incident; 43 44 Number of bathers in the pool at the time of the incident; (g) 45 46 Number of patrons in the facility at the time of the incident; (h)

1		
1	(•)	
2 3	(i)	Police Case number (if available);
4	(j)	Injury description;
5		
6	(k)	Names, addresses and phone numbers of witnesses; and
7		
8	l. De	tailed description of incident;
9		
10	2. Ov	vners and/or the pool management company shall have available at the aquatic
11		f of the credentials, training, and/or certifications required for personnel as
12		ec. 11-11-10 and Sec. 11-11-63.
13		
14	3 M	aterial Safety Data Sheets (MSDS) for all chemicals used at a swimming pool
15		be provided in a location readily accessible to all employees. MSDS shall not
16	•	the filter room and/or other rooms where chemicals are stored and/or used.
	be located III	the fifter room and/or other rooms where chemicals are stored and/or used.
17	Sec. 11-11-59) D la sa sula
18	Sec. 11-11-5	P Placards.
19 20		
20	(a)	The water test results specified in <u>Sec. 11-11-58</u> (A)(1) shall be legibly and
21		y posted on a permanent, water-proof, and durable placard in a location where
22	•	bservable by the patrons. The most recent required water quality test results,
23		date and time of day tested, shall be posted. The minimum and maximum
24		these parameters, as specified in Sec. 11-11-69 Table III, shall be included on
25	the placard.	Water temperature shall also be posted for heated pools.
26		
27	(b)	A conspicuously posted placard shall include the following statement: "This
28	facility is insp	pected regularly by the Environmental Health Division of the Alexandria
29	Health Depar	tment. They may be contacted at (703) $\frac{838-4400746-4910}{6}$ or at
30	www.alexhea	
31		
32	(c)	Areas restricted to operating personnel only shall be prominently identified
33		nent, legible placard stating "Authorized Personnel Only" including, but not
34		e filter and chemical storage rooms. The placards shall be conspicuously
35		e exterior of the doors to the restricted areas.
36	focuted on the	e exterior of the doors to the restricted areas.
30 37	(d)	A normanant logible placerd(a) specifying facility rules and regulations
		A permanent, legible, placard(s) specifying facility rules and regulations
38	0 01	sonal health and safety shall be posted in plain view of patrons within the
39 40	facility.	
40		
41	(e)	A permanent, legible, engraved plastic or laminated paper specification
42	-	be conspicuously displayed within the filter room(s) and shall be adequately
43	lighted. The	following information shall be included on the placard:
44		
45		me and address of the facility;
46	2. vo	lume in gallons of each pool or spa or water park feature;

1 3. water surface area in square feet of each pool or spa or water park feature; 2 4. minimum turnover time in hours of each pool or spa or water park feature; 3 5. minimum rate of flow in gallons per minute to provide the required turnover time 4 of each pool or spa or water park feature; and 5 6. maximum facility load, and maximum pool load(s) of each pool or spa or water 6 park feature. 7 8 (f) Legible placards shall be posted in an appropriate location within the filter 9 room(s) to describe the following pool operating procedures: 10 11 Instructions on the proper operation of pumps and filters including the valve 1. 12 line-ups for filtration; and 13 14 2. instructions on proper backwashing or cleaning procedures and valve 15 positions for backwashing. 16 17 (g) A separate, permanent, legible placard clearly indicating the maximum facility load and individual swimming pool load(s) shall be conspicuously posted at the 18 19 main entrance to the swimming pool facility. The letters and numbers indicating the load(s) 20 shall be a minimum of 2 inches in height. 21 22 Sec. 11-11-60 **Precautions Relative to Communicable Disease.** 23 24 Any person having an obvious skin disease, nasal or ear discharge, inflamed eye, or 25 any communicable disease with symptoms of diarrhea or vomiting shall be excluded from the facility. Any person with a chronic disease that may pose a hazard to other swimmers 26 27 may be excluded from the facility by the Director. 28 29 Sec. 11-11-61 **Food Service.** 30 31 No area or physical facility for the preparation, service, or consumption of (a) 32 food and/or drinks may be located less than ten feet from the rim of a swimming pool. 33 34 Any area or physical facility for the preparation, service, or consumption of (b) 35 food or drinks shall be enclosed by a suitable fence or barrier. 36 37 A physical facility for the preparation, service, or consumption of food (c) 38 and/or drinks at a pool owned by a condominium association does not have to meet the 39 requirements of Subsections A. and B. above if said facility is located at least twenty feet 40 from the rim of the condominium swimming pool. 41 42 (d) Any person engaged in eating or drinking shall remain in the area designated 43 for the consumption of food and drink. However, at a condominium swimming pool, food 44 and drink may be consumed up to the pool rim, but not in the swimming pool if the rules 45 and regulations adopted by the condominium association allow it. 46

1 (e) Water in an unbreakable plastic container is exempt from the requirements 2 contained in Subsection D. above.

3 4

5 6

7 8

9

10

(f)

Glass containers are not permitted in the pool area.

Sec. 11-11-62 Boisterous and Rough Play.

Boisterous and/or rough play and running is prohibited at any swimming pool facility.

Sec. 11-11-63 Lifeguards and Pool Operators.
12

13 There shall be at least one lifeguard at all pool facilities. A minimum of one (a) 14 lifeguard shall be required pool-side for every 25 patrons or fraction thereof in the pool 15 enclosure. Additional lifeguards may be required by the Director when deemed necessary 16 for complete visual coverage of the pool or when conditions exist that may compromise the 17 health or safety of pool patrons. Waterparks shall be required to position lifeguards based on the recommendation of a national waterpark lifeguard accrediting institution, to include a 18 19 system of zone management based on recognition time and response times. Additional 20 lifeguards may be required by the Director when deemed necessary for complete visual 21 coverage of the pool or when conditions exist that may compromise the health or safety of 22 pool patrons. Lifeguards shall wear distinguishing emblems on their clothing clearly 23 identifying them as lifeguards while on-duty.

24

25 Lifeguards shall be at least fifteen years of age and shall be properly trained (b) 26 and certified in accordance with nationally recognized standards equivalent to or exceeding 27 those set by the American Red Cross. Lifeguards shall also be trained and currently 28 certified in cardio-pulmonary resuscitation in accordance with national standards equivalent 29 to or exceeding those set by the American Red Cross. It is the responsibility of each 30 training organization that issues lifeguard and/or CPR certifications to insure that the course 31 standards are equivalent to or exceed those set by the American Red Cross. Waterpark 32 lifeguards shall be required to attend a minimum of four hours of in-service training per 33 month covering such specific operational aspects as guest service, scanning & vigilance 34 techniques, safe water entry/exit, incident recognition, and rescue procedures, plus physical 35 conditioning drills. Waterpark lifeguards will also be subject to performance audits from their accrediting institution and participate in emergency simulations, including periodic 36 37 practice with local first-response authorities. Lifeguards shall have their original document 38 of current certification and valid photo identification at the pool facility during operation of 39 the pool facility.

40

41 (c) In order to maintain the level of alertness and vigilance necessary for
42 lifeguarding, lifeguards shall be required to take a continuous ten minute break after every
43 50 minutes of continuous lifeguarding and a continuous thirty-minute break after four hours
44 of lifeguarding . <u>While the If a lifeguard is not stationed poolside during this break period</u>,
45 all patrons shall remain out of the pool and wading pool.

1 Lifeguards shall not be subject to, or engage in, duties that would distract (d) 2 their attention from the proper observation of patrons in the pool area or that would prevent 3 immediate assistance to patrons in distress. 4 5 The Director, or his designee, may require lifeguards to demonstrate skills (e) 6 through verbal questioning, written questions, and/or active demonstration. These skills 7 include, but are not limited to, the following: 8 9 1. Ability to swim two pool lengths, 10 2. Knowledge of basic lifesaving skills as taught in Red Cross lifeguarding courses, 11 3. Knowledge of CPR, and 12 4. Knowledge of how and when to report accidents, injuries, near drownings, and 13 deaths. 14 15 (f) The Director, or his designee, may require pool operators to demonstrate 16 skills through verbal questioning, written questions, and/or active demonstration. These 17 skills include, but are not limited to, the following: 18 19 1. Knowledge of how to handle a fecal contamination incident, 20 2. Ability to conduct water quality tests of the pool as required in Sec. 11-11-58, 21 3. Knowledge of how and when to backwash or clean the filters, 22 4. Knowledge of what the required water chemistry parameters are contained in 23 11-11-69, 24 5. Knowledge of how to adjust the disinfectant and pH levels of the pool, and 25 6. Knowledge of what health or safety conditions should cause a swimming pool to 26 be immediately closed to the public. 27 28 Safety and Rescue Equipment; Other Safety Features. Sec. 11-11-64 29 30 Every swimming pool facility shall be equipped with the following readily (a) 31 accessible safety and rescue aids: 32 33 1. A minimum of one rescue tube shall be provided immediately adjacent to 34 each lifeguard stationed poolside. The rescue tube shall measure at least 45 inches in length 35 and shall provide adequate buoyancy to keep two persons afloat in the water. 36 37 2. An approved first aid kit, which meets OSHA First Aid 29 CFR 1910.151 38 standards, shall be readily available. The kit shall meet the minimum requirements of 39 generic first aid kits according to the American National Standards Institute (ANSI) Z308.1-1978. 40 41 42 2. A first aid kit shall be readily available. The first aid kit shall contain, at a 43 minimum, all items stipulated by the Health Department. 44 45 3. A full-length backboard with straps shall be provided. The backboard shall 46 be buoyant, and capable of supporting a minimum of 350 pounds, center loaded, with

1 2 3	minimal deflection. The backboard shall have an impervious surface and be provided with runners, numerous hand/strap holes, and a minimum of three backboard straps.
4 5	4. Provide one or more light, but strong, non-telescopic poles with blunted ends not less than twelve feet in length including a body hook.
6 7 8 9	5. A blood-borne pathogen kit which meets OSHA 29 CFR 1910.1030(d)(3)(i) standards shall be provided.
9 10 11	6. Each lifeguard shall be equipped with a CPR pocket mask.
11 12 13	(b) <i>Other Safety Features.</i>
14 15 16	1. The room designated for emergency care of casualties shall, at a minimum, be equipped with an approved first aid kit, a cot, and two blankets. Filter or chemical storage rooms shall not be used as emergency care rooms.
17 18 19 20	2. All chemicals associated with the facility shall be stored and utilized in a safe and approved manner in accordance with manufacturer's recommendations. Incompatible chemicals shall not be stored in close proximity to each other. Cleaning chemicals and
21 22 23 24	supplies shall be stored in a safe manner, separate from swimming pool chemicals. Chemicals shall be stored in properly labeled containers which shall be kept covered at all times.
25 26 27 28	3. Chemical vats shall be covered with proper lids and shall be provided with an approved means of secondary containment such as an outer spill control container or a spill pallet adequate in size and capacity to contain spills and leaks.
20 29 30 31	4. Protective equipment, including but not limited to goggles or full face shields; neoprene rubber gloves; and rubber aprons shall be provided and used by personnel handling hazardous chemical compounds.
32 33 34 35	5. Plugs or caps shall be installed at all pool suction cleaner outlet ports when the suction cleaner is not in use. The main valve controlling the water flow from the pool suction cleaner outlet ports shall be closed when the pool suction cleaner is not in use.
36 37 38	6. All safety equipment and features required in this Ordinance shall be maintained in good condition and repair.
39 40	7. Pool water temperature shall not exceed 104 degrees Fahrenheit.
41 42 43 44	8. Safety signs shall be displayed in a prominent location warning against diving into water less than five feet deep without specific supervision. The letterings of the safety signs must be a minimum of five inches in height.
44 45 46	9. Outdoor swimming pool facilities and indoor swimming pool facilities with windows overlooking the pool shall close for 30 minutes following thunder or lightning.

1	
2	
3	9. <u>Outdoor swimming pool facilities shall close immediately during thunder or</u>
4	lightning, and remain closed for 30 minutes following the end of the thunder or lightning.
5	
6	<u>10. Indoor swimming pool facilities within buildings that do not have appropriate</u>
7	electrical protection shall close immediately during thunder or lightning, and remain closed
8	for 30 minutes following the end of the thunder or lightning.
9	
10 11	Sec. 11-11-65 Laundering.
12 13 14 15	Bathing suits, towels and other reusable materials furnished by a swimming pool facility shall be properly cleaned or laundered and disinfected before being issued to patrons.
16	Sec. 11-11-66 Water contamination.
17 18	(a) The following information shall be posted at the entrance of every pool:
19	
20	1. If you have or have had diarrhea in the past two weeks, please do not use the
21	pool.
22	
	2. Shower your child and yourself before entering the pool or after using the toilet.
	2. Dethers who are not tailet trained on who are incentinent must wear a swim
	diaper.
	1 Do not drink pool water
	4. Do not unik pool water.
	(b) The introduction of body waste including sputum or vomitus into a pool is
	The following decions shall be taken prior to reopening the poor.
	1 In the event of well-formed stool or vomitus contamination:
	a Clear the pool of all patrons:
	0 I I
	rr rr
46	2. In the event of diarrheal contamination:
23 24 25 26 27 28 29 30 31 32 33 34 35 36 37 38 39 40 41 42 43 44 45 46	 Shower your child and yourself before entering the pool or after using the toilet. Bathers who are not toilet trained or who are incontinent must wear a swim diaper. Do not drink pool water. (b) The introduction of body waste including sputum or vomitus, into a pool is prohibited. Patrons wearing cloth or disposable diapers are prohibited from entering the pool water. A pool contaminated by human feces or vomit shall be cleared immediately. The following actions shall be taken prior to reopening the pool: In the event of well-formed stool or vomitus contamination:

1		
1		c. Clean the need of all notrong
2		a. Clear the pool of all patrons;
3		b. Remove as much contaminating material as possible from the water using
4		a net or scoop. Vacuuming is not permitted unless it discharges directly to
5		waste;
6		c. Raise the pool chlorine level to a minimum of 40 ppm for 6.5 hours or
7		twenty ppm for 13.0 hours.
8		d. Adjust the pH of the pool water to a level of 7.5 or less;;
9		e. Prohibit patrons from entering the pool during the time period specified in
10		(c); and
11		d. Achieve acceptable disinfectant residuals and chemical balance as
12		specified in <u>Sec. 11-11-69</u> Table III. Chemical Water Quality Standards for
13		Swimming Pools prior to allowing patrons to enter the pool.
13		Swinning 1 oois prior to anowing pations to enter the pool.
14	2	Deals using stabilizer should follow these stars in the subst of diamhas
	3.	Pools using stabilizer should follow these steps in the event of diarrheal
16	contamination	n:
17		
18		a. Clear the pool of all patrons;
19		b. Remove as much of the contaminating material as possible from the pool
20		water. Vacuuming is not permitted unless it discharges directly to waste;
21		c. Raise pool disinfectant level to a minimum of 40 ppm and adjust pH to a
22		level of 6.5 or less for 48 hours;
23		d. Patrons are prohibited from entering the pool during this time period; and
24		e. Achieve acceptable disinfectant residuals and chemical balance as
25		specified in Sec. <u>11-11-69</u> Table III. Chemical Water Quality Standards for
26		Swimming Pools prior to allowing patrons to enter the pool.
27		s winning roots prior to anowing parons to enter the poor.
28	4.	The Director shall be notified within 1 hour if the pool is contaminated with
28 29	feces and/or v	
	ieces and/or v	volint.
30	-	
31	5.	The instructions in $\underline{11-11-66}$ B shall be maintained on site in allocation that
32	is easily acces	ssible to the pool operator.
33		
34	6.	In the event that CDC recommends a longer contact time, the CDC
35	recommendat	tion should be followed.
36		
37	Sec. 11-11-67	7 Deck contamination.
38		
39	(a)	In the event that body fluids such as blood, vomit, or feces contaminate the
40	· · ·	owing procedures shall be followed:
41		
42	1 Block	off the area of the spill from patrons until clean-up and disinfection is
43	complete.	and the area of the spin from partons with crean up and distinction is
44	complete.	
44 45) Dut or	n disposable latex gloves to prevent contamination of hands.
45 46	∠. rut Ol	i disposable fatex gioves to prevent containination of nations.
40		

1 2 3	3. Wipe up the spill using paper towels or absorbent material and place in a plastic garbage bag.
5 4 5	4. Gently pour bleach solution (5,000 ppm) onto all contaminated areas of the surface.
6 7	5. Let the bleach solution remain on the contaminated area for twenty minutes.
, 8 9	6. Wipe up the remaining bleach solution.
10 11 12	7. All non-disposable cleaning materials used such as mops and scrub brushes should be disinfected by saturating with bleach solution and air dried.
12 13 14	8. Remove gloves and place in plastic garbage bag with all soiled cleaning materials.
15 16	9. Double-bag and securely tie-up plastic garbage bags and discard.
17 18	10 Thoroughly wash hands with soap and water.
19 20 21	(b) In the event that vomitus or fecal contamination contaminating the deck enters the pool, the pool operator shall follow the procedures in Sec. 11-11-66 (B).
22	Sec. 11-11-68 Water Clarity.
23 24 25	When a swimming pool is open for use, the water shall be considered sufficiently clear when the main drain grates are clearly visible.
26 27	Sec. 11-11-69 Water Treatment and Test Equipment.
28 29	(a) The following chemicals may be used to treat swimming pool water:
30	aluminum sulfate, calcium chloride, calcium hypochlorite, carbon dioxide, cyanuric acid,
31	lime, muriatic acid, polyaluminum chloride, sodium bicarbonate, sodium bisulfate, sodium
32 33	carbonate, sodium hypochlorite, sodium thiosulphate, approved algaecides, approved bromine compounds, and approved chelating, sequestering, and clarifying agents. No other
33 34	chemicals shall be used to treat swimming pool water without prior written authorization
35	from the Director.
36	
37	(b) Aluminum sulfate and polyaluminum chloride shall not be fed continuously
38	into a recirculation system using rapid sand filters. Formation of the floc shall be achieved
39	separately and applied directly to the filter influent during the rewash and continuing into
40	the early part of the filter cycle.
41	
42	(c) Chemical water quality standards for swimming pools, except for pools that
43	use Cyanuric acid or chlorinated cyanurates, shall be as follows:
44	
45 46	1. Except as noted below, disinfectant residual, pH, total alkalinity, and calcium hardness shall be continuously maintained within the minimum and maximum ranges

1 specified in Table III. If the swimming pool is equipped with automatic chemical

2 controllers utilizing ORP measurements, ORP shall be maintained within the ranges

3 specified in Table III. Disinfectant residual limits specified in Table III may be exceeded in

4 pools with automatic chemical controllers, which utilize ORP measurements and continually

5 analyze and automatically control pH and the disinfectant residual, only if necessary to

6 maintain the ORP specified in Table III. However, the disinfectant residual shall not exceed 7 5 ppm in such pools. The use of ORP sensing equipment does not eliminate the requirement

8 for routine water testing specified in Sec. 11-11-58. Disinfectant residual limits specified in

9 Table III may be exceeded when superchlorinating a swimming pool provided that no

10 patrons are present in the swimming pool water and that the disinfectant level is returned to

11 the acceptable range prior to allowing patrons to enter the swimming pool water. Table III.

Chemical Water Quality Standards for Swimming Pools

14

15

16 TABLE INSET:

1	7

Parameter	Minimum	Ideal	Maximum
Outdoor Pool Free Chlorine Residual (ppm)	1.0	<u>2.0 4.0</u>	5.0 10.0
Indoor Pool Free Chlorine Residual (ppm)	1.0	<u>2.0_3.0</u>	5.0
Combined Chlorine Residual (ppm)	0.0	0.0	0.2 0.4
Bromine Residual (ppm)	2.0	3.0 <u>4.0-6.0</u>	4.0 10.0
Oxidation Reduction Potential (ORP) (millivolts)	650	750 - 900	N/A
pH	7.2	7.4 - 7.6	7.8
Total Alkalinity (ppm)	60	80 - 120	180
Calcium Hardness (ppm)	150	200 - 400	1000
Total Dissolved Solids	0		1600

18

19 2. Except as noted in Sec. 11-11-69(C)(1) &(D), disinfectant residuals 20 shall be maintained within the ranges specified in Table III, 24 hours per day, through the 21 use of automatic disinfection equipment specified in Sec. 11-11-49. For swimming pools that backwash/clean filters to storm drains, streams, lakes or other bodies of water, 22 23 disinfectant levels may be temporarily reduced immediately prior to the

24 backwashing/cleaning of filters, provided the swimming pool facility is not open for patron 25 use.

26

27 (d) If Cyanuric acid or chlorinated cyanurates is used in an outdoor swimming 28 pool, the Cyanuric acid levels and disinfectant residuals shall be maintained within the 29 following ranges:

- 2 1. A minimum free chlorine residual of at least 2 ppm shall be maintained in pools 3 using for Cyanuric acid levels from 0 to 50 ppm. 4 2. The concentration of Cyanuric acid shall not exceed 50 ppm. 5 3. The use of Cyanuric acid or other chlorine stabilizers is prohibited in indoor 6 swimming pools and in wading pools. 7 8 An approved water quality test kit for determining free and total chlorine or (e) 9 total bromine residuals, pH, total alkalinity, and calcium hardness shall be provided and 10 maintained. Provisions shall be made for checking superchlorination levels. Diethyl-pphenylene diamine (DPD), or other testing reagent approved by the Director, is required for 11 12 determining free halogen residual. If another disinfectant has been approved by the Director 13 for use at a swimming pool, an appropriate test kit approved by the Director shall be 14 provided and maintained. A test kit for measuring the concentration of Cyanuric acid, 15 accurate within 5 ppm, shall be provided at each swimming pool using Cyanuric acid or 16 chlorinated cyanurates. 17 18 Hand-feeding of chemicals shall not be permitted during hours of operation (f) 19 or within thirty minutes prior to opening. 20 21 (g) Chemical Water Quality Standards for wading pools shall comply with Sec. 22 11-11-103 Table IV. 23 24 Sec. 11-11-70 **Design Load.** 25 26 The maximum individual swimming pool bather load shall be determined by 27 dividing the total water surface area in square feet of each swimming pool within the 28 swimming pool facility by 27 square feet. The designated maximum individual swimming 29 pool bather load and the maximum facility load shall not be exceeded. The pool operator 30 shall be responsible for enforcing the maximum individual swimming pool bather load and 31 the maximum facility load. The maximum facility load may be temporarily exceeded to 32 allow for spectators of special events, such as recreational swimming meets or other water 33 sport activities, provided that the spectators shall not have access to and shall be separated 34 from the pool(s) both during and after the event. 35 36 Sec. 11-11-71 Spectators. 37 38 No person in street shoes shall be allowed on the deck of a swimming pool within 39 five feet of the pool edge. Exceptions may be made for participants and spectators of 40 swimming meets or other water sport activities, operating personnel, personnel engaged in 41 repair work or the Director. 42

 20 21 Fencing and barriers shall be provided as specified in <u>Sec. 11-11-50</u>. In addition, for
21 Fencing and barriers shall be provided as specified in <u>Sec. 11-11-50</u> . In addition, fe
22 indoor spa poor racinities, locked doors of an equivalent barrier acceptable to the Director
shall be provided to prevent the entry of unauthorized individuals.
24 shall be provided to prevent the entry of unautionized individuals.
25 Sec. 11-11-83 Drinking Fountains.
26 Dimking Foundams.
Each spa pool facility shall have at least one source of cold (less than 75°F) potable
water readily accessible to all patrons.
29 when readily decession to an partons.
30 Sec. 11-11-84 Inlets, Outlets, Piping, Drains, and Skimmers.
31
32 (a) Spa pool inlets and outlets shall be provided and arranged to maintain a
33 uniform circulation of water and disinfectant residual.
34
35 (b) All spa pool piping shall comply with the requirements specified in <u>Sec. 11</u> .
36 11-41, except only subsurface spa pool piping which is not integrally included in the
37 manufacture of the spa pool shall be embedded in and covered with sand or an approved
38 equivalent.
39
40 (c) All spa pools shall be provided with a minimum of one skimmer. Spa pool
41 skimmers shall comply with the requirements specified in Sec. $11-11-45$ (B).
42
43 (d) Spa pool suction outlets shall be designed so that each pumping system in the
44 spa pool provides one of the following alternatives:
45

1 Two or more interconnected suction outlets. The system shall be designed so 1. 2 that none of the outlets can be isolated from the suction line by a valve or by any other 3 means. All piping associated with the suction outlets shall be of equal diameter and each 4 suction outlet shall be of equal size. Suction outlets and associated piping shall be 5 hydraulically designed to provide equal flow through each suction outlet. The open area of 6 the suction outlets shall be covered with suitable protective grates or covers that are 7 anchored using manufacturer supplied parts in strict accordance with the manufacturer's 8 specifications and recommendations and shall be designed to prevent body entrapment or 9 injury. The suction outlet covers shall be secured so that their removal requires the use of 10 tools. Suction outlet covers shall be manufactured and installed according to the latest 11 specifications set forth by the ASME/ANSI/APSP-16 2011 and NSF standards for suction 12 fittings. The cover, frame and all components shall be corrosion resistant and shall be 13 designed to withstand the maximum anticipated forces generated by active use. If the 14 suction outlets are main drain outlets, they shall have anti-vortex covers or grates, shall be 15 located in the deepest part of the spa pool, and shall be capable of draining the pool. The 16 total water velocity through suction outlets, with the exception of skimmers, shall not 17 exceed one foot per second and shall not exceed the maximum flow rate specified by the 18 manufacturer of the suction outlet cover. 19 20 2. Other methods that prevent suction outlet body entrapment or injury may be 21 approved by the Director. 22 23 3. The design of a main drain outlet or outlets, and the components of main 24 drains outlets shall comply with ANSI/ASME A112.19.8-2007 ANSI/APSP-16 2011. 25 26 4. The water velocity through a main drain outlet shall not exceed the maximum water velocity specified by the manufacturer. The maximum flow rate possible at the 27 28 manufacturer's specified velocity shall meet or exceed the total system flow. 29 30 (e) If fill spouts are used at spa pools, they shall be installed according to 31 applicable requirements specified in Sec. 11-11-41(B). 32 33 Sec. 11-11-85 **Recirculation System.** 34 35 (a) All spa pools shall be equipped with a recirculation system consisting of at least a pump, connecting piping, fittings, valves, a filter, disinfecting equipment, necessary 36 37 pipe connections to the inlets and outlets, skimmer(s) and main drains. 38 39 (b) The recirculation system shall be designed for maximum turnover time of 40 fifteen minutes. 41 42 (c) Adequate provision shall be made for backwashing or cleaning the filters. 43 44 (d) A separate recirculation system shall be provided for each spa pool. 45 46 Sec. 11-11-86 Filters and Gauges.

1 2 3 4 5	(a) system that wi <u>85</u> (B).	The recirculation system of a spa pool shall be equipped with a filtration ill filter the entire volume of the spa pool at the rate specified in Sec. 11-11-
6 7 8 9 10	Director. Exc	Only high-rate sand, diatomaceous earth or replaceable cartridge filters shall a pools. Other filtration systems may be used with the approval of the ept as provided above, filters and associated piping and valves shall comply rements specified in Sec. 11-11-39(A).

42	(a)	All spa pools shall be provided with disinfection equipment meeting the
43	requirements s	specified in Sec. 11-11-49(A) and (C).
44		
45	(b)	Chlorine gas shall not be used as a disinfectant in spa pools.
46		

<u>(c)</u> Sta	abilized chlorine products shall not be used as disinfectants in spa pools.
Sec. 11-11-91	Ventilation in Indoor Spa Facilities.
1	a facilities shall be equipped with mechanical ventilation that provides for or air per square feet of spa pool and deck area.
	ARTICLE E: Spa Pools; Operation and Maintenance
Sec. 11-11-92	General Operation and Maintenance.
Spa pool f	facilities shall be operated and maintained as specified in Sec. 11-11-56.
Sec. 11-11-93	Water Operating Levels.
	level shall be maintained within the operating range of the skimmer or at rflow rim of a gutter system at all times.
Sec. 11-11-94	Monitoring, Reporting, and Record Keeping.
	water testing shall be performed as specified in <u>Sec. 11-11-58</u> . In addition, es the spa pool is drained and cleaned shall be recorded.
Sec. 11-11-95	Placards.
Placards s	hall be provided as specified in Sec. 11-11-59.
Sec. 11-11-96	Precautions Relative to Communicable Disease.
Precautior enforced.	ns relative to communicable disease specified in Sec. 11-11-60 shall be
Sec. 11-11-97	Food Service.
Food serv	ice shall be limited as specified ins Sec. 11-11-61
Sec. 11-11-98	Boisterous and rough play.
Boisterous	s and/or rough play and running at any spa pool facility is prohibited.
Sec. 11-11-99	Temperature Requirements.
shall be provided	water temperature shall not exceed 104 degrees Fahrenheit. A thermostat for the control of the spa pool water temperature. <u>Spa pools shall have a</u> r installed in the main return line. The thermometer shall be located

1		from where the heater effluent pipe connects to the main return line to allow		
2	mixing of the heated and unheated water. The thermometer shall be located so that it may			
3	be easily read	<u>I. A thermometer shall be provided in the heater effluent line</u> . An accurate,		
4	impact resistant spa pool thermometer shall be kept in each spa pool skimmer, or another			
5	easily accessi	ble location for measuring water temperature.		
6 7	Sec. 11-11-10	00 Safety and Rescue Equipment; Other Safety Features.		
8 9	(a)	Every spa pool facility shall be equipped with the following readily		
10		fety and rescue aids:		
11				
12	1.	A first aid kit shall be provided as specified by the Health Department an		
13		t aid kit, which meets OSHA First Aid 29 CFR 1910.151 standards, shall be		
14	11	ble. The kit shall meet the minimum requirements of generic first aid kits		
15	•	the American National Standards Institute (ANSI) Z308.1-1978.		
16	2.	A full-length backboard shall be provided as specified in Sec. 11-11-		
17	64(A)(3).	Train longin buckbourd shan be provided as specified in bee. IT Th		
18	01(11)(3).			
19	3.	A working clock shall be provided which is clearly visible from within the		
20	spa pool.	The straining erook shall be provided which is ereally visible from which are		
21	spupoon			
22	4.	A blood-borne pathogen kit which meets OSHA 29 CFR		
23		$\underline{D}(3)(i)$ standards.		
24	1)10.1020(<mark>u</mark>			
25	(b)	Other safety features:		
26				
27	1.	The following recommendations for safe use of the spa shall be posted at the		
28	entrance of ev	very spa pool:		
29				
30	(a)	Do not use spa alone.		
31		1		
32	(b)	Pregnant women, elderly persons and persons suffering from heart disease,		
33	• •	phormal blood pressure or other at-risk persons should not enter the spa pool		
34		ulting a physician.		
35				
36	(c)	Do not use the spa pool while under the influence of alcohol, tranquilizers, or		
37	other drugs w	which may cause drowsiness, alter blood pressure or put the patron at risk.		
38	-			
39	(d)	Do not use at water temperatures above 104 degrees Fahrenheit.		
40				
41	(e)	Unsupervised use by children is prohibited.		
42				
43	(f)	Enter and exit slowly.		
44		-		
45	(g)	Limit your use of the spa pool to a maximum of fifteen minutes at one time.		
46				

1		(h)	Cool down before revisiting.
2 3 4	death.	(i)	Long exposure may result in nausea, dehydration, dizziness, fainting or
5 6 7		(j)	The use of oils, body lotions and mineral bath salts is prohibited.
8 9	enterin	(k) g the sp	Patrons with symptoms of a communicable disease are prohibited from a pool.
10 11 12	from th	(l) ne prem	Failure to comply with these regulations constitutes grounds for exclusion ises or management action as necessary.
13 14 15	and ap	2. proved	All chemicals associated with spa pools shall be stored and utilized in a safe manner as specified in <u>Sec. 11-11-64</u> (B)(2).
16 17 18 19	specifi	3. ed in <u>Se</u>	Protective equipment shall be provided for handling hazardous chemicals as $\frac{11-11-64}{B}$ (B)(4).
20 21 22	authori	4. zed per	Filter and chemical storage rooms shall be locked at all times when sonnel are not present.
23 24 25	overloo	5. oking th	Outdoor spa pool facilities and indoor spa pool facilities with windows as pool shall close for 30 minutes following thunder or lightning.
26 27	Sec. 11	L-11-10	1 Laundering.
27 28 29 30	shall b		g suits, towels and other reusable materials furnished by a spa pool facility rly cleaned or laundered and disinfected before being issued to patrons.
31 32	Sec. 11	l -11-10 2	2 Water Clarity.
33 34 35	when t		a spa pool is open for use, the water shall be considered sufficiently clear a drain grates are clearly visible when jets are off.
36 37	Sec. 11	l -11-10 .	3 Water Treatment and Test Equipment.
38 39 40	treat sp	(a) ba pool y	No chemicals other than those specified in <u>Sec. 11-11-69</u> (A) shall be used to water without written authorization from the Director.
41 42 43 44 45 46	and ma chemic ranges	aximum cal contr specifie	Except as noted below and in <u>Sec. 11-11-103 (-C)</u> , disinfectant residual, pH, r, and calcium hardness shall be continuously maintained within the minimum ranges specified in Table IV. If the spa pool is equipped with automatic rollers utilizing ORP measurements, ORP shall be maintained within the ed in Table IV. Disinfectant residual limits specified in Table IV may be pols with automatic chemical controllers, which utilize ORP measurements

and continually analyze and automatically control pH and the disinfectant residual, only if necessary to maintain the ORP specified in Table IV. However, the disinfectant residual shall not exceed 10 ppm in such spa pools. The use of ORP sensing equipment does not eliminate the requirement for routine water testing specified in Sec. 11-11-94. Disinfectant residual limits specified in Table IV may be exceeded when superchlorinating a spa pool

6 provided that no patrons are present in the spa pool water and that the disinfectant level is

23

(c) If cyanuric acid or chlorinated cyanurates are used in an outdoor spa pool, the
 cyanuric acid levels and disinfectant residuals shall be maintained within the following
 ranges:

A free chlorine residual of at least 4 ppm shall be maintained for cyanuric
 acid levels from 0 to 50 ppm. The concentration of cyanuric acid shall not exceed 50 ppm.
 The use of cyanuric acid or other chlorine stabilizers is prohibited in indoor spa pools.

24 (cd) An approved water quality test kit shall be provided as specified in <u>Sec. 11-</u>
25 <u>11-69(E).</u>
26

27 (de) Hand-feeding of chemicals shall not be permitted while the spa pool is open
 28 or accessible to patrons and within thirty minutes of opening.
 29

30	Sec. 11-11-104	Water Contamination.
50		water containmation.

1 2 3 4	The introduction of body wastes, including sputum or vomitus, into a spa pool is prohibited. A spa pool contaminated by human feces or vomit shall be closed immediately and the following additional actions shall be taken by the spa pool operator:
5	(a) Remove the contaminating material from the pool water.
6 7 8	(b) Backwash the filters <u>or change the filter cartridge(s)</u> .
8 9 10	(c) Drain the spa pool.
10 11 12	(d) Clean and disinfect the bottom and sidewalls of the spa pool and skimmers.
12 13 14	(e) Refill with potable water.
14 15 16	(f) Sanitize contaminated filter cartridge(s) by soaking in a bleach solution of a minimum 20 ppm chlorine for 13.75 hours OR a CT value of 15,300.
17	initialitize ppin emorine for 15.75 hours of a cr varae of 15,500.
18	Sec. 11-11-105 Deck Contamination.
19	
20	(a) In the event that body fluids such as blood, vomit, or feces contaminate the
21	deck, follow the procedures indicated in Sec. $11-11-67(A)$.
22	
23	(b) In the event that vomitus or fecal contaminating the deck enters the pool, the
24	operator shall follow the procedures indicated in Sec. 11-11-103. Sec. 11-11-66(B)
25	
26	Sec. 11-11-106 Posting of Water Quality Test Results and Water Quality
27	Standards.
28	
29	The water tests indicated in Sec. 11-11-94 shall be conducted and the results posted
30	as specified in <u>Sec. 11-11-59</u> (A).
31	
32	Sec. 11-11-107 Design Load.
33	
34	The maximum individual spa pool bather load shall be calculated by dividing the
35	total water surface area in square feet of each spa within the spa pool facility by ten square
36	feet or shall be determined by the Director at the time of construction. The designated
37	maximum individual spa pool bather load and the maximum facility load shall not be
38	exceeded. The pool operator shall be responsible for enforcing the maximum individual spa
39	pool bather load and the maximum facility load.
40	
41	
42	ARTICLE F: Waterpark Facilities; Design, Construction, Operation, and
43	Maintenance
44	
45	Sec. 11-11-108 Scope.
46	

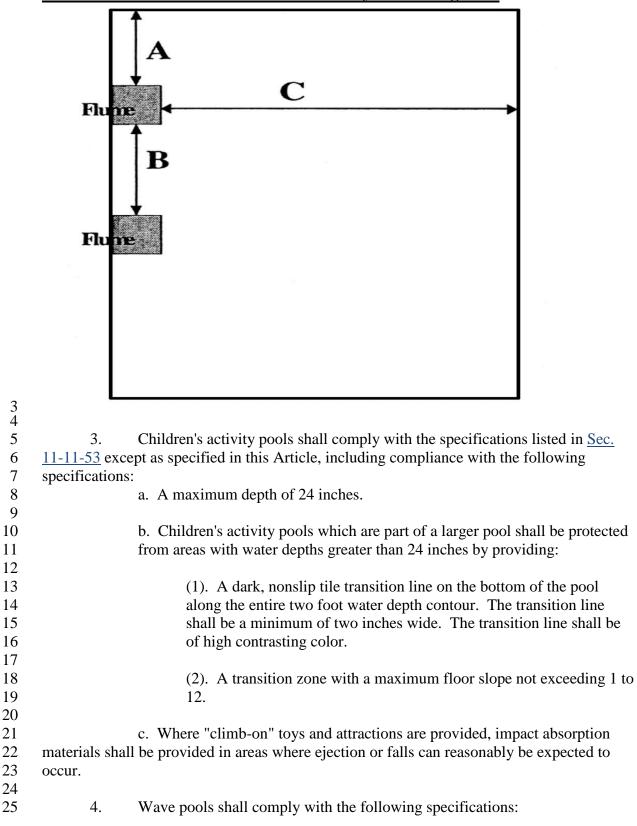

1 This Article addresses the special design, construction, operation and maintenance 2 considerations unique to waterpark facilities. 3 4 Sec. 11-11-109 Design. 5 6 Waterpark facilities shall meet or exceed the following design and (a) 7 construction standards in effect at the time of construction, including but not limited to: 8 9 1. Specifications contained in this Ordinance. 10 2. ASTM F-24 "Standards on Amusement Rides and Devices." 11 12 13 3. "Virginia Amusement Device Regulations." 14 15 4. Industry standards and manufacturer's specifications and recommendations. 16 17 (b) The proposed design shall be reviewed and approved by a licensed engineer. 18 19 Waterpark facilities shall be designed to provide for the safety of the patron (c) 20 and proper recirculation of the waterpark facility's water. The design shall include, but not 21 be limited to the following: 22 23 Absence of protrusions, pinch hazards, extensions, means of entanglement, 1. 24 or other obstructions which can cause entrapment or injury. 25 26 2. Construction tolerances conforming with ANSI public pool standards. 27 28 A report, prepared by a licensed engineer, that certifies the design of the (d) 29 waterpark facility is consistent with accepted safety engineering practices, industry 30 standards, manufacturer's specifications and recommendations, and this Ordinance, shall be 31 included with the original plans and specifications submitted to the Director for review. 32 33 1. The report shall address issues related to safety design, including the 34 ergonomic aspects of biomechanics for waterpark facilities. 35 36 2. The report shall substantiate that a comprehensive risk analysis was made of 37 the waterpark, including a risk analysis of each separate component and of the components 38 interaction with other elements of the water park. 39 40 3. The report shall demonstrate that the waterpark design protects the patron, 41 under foreseeable conditions and normal usage and behavior, from exposure to injury. 42 Elements to be considered include, but are not limited to, the following: 43 44 a. The activity shall contain the patron. 45 b. The activity shall provide clear and smooth passage of the patron. 46

1		
2		c. The activity shall maintain designed patron speeds.
3		
4		d. The activity shall provide smooth transitions in speed and direction.
5		
6		e. The activity shall provide for safe landing and/or disembarkation of the
7	patron.	······································
8	puton	
9		f. The activity shall accommodate continuous patron surveillance by
10	lifequards and	l attendants, except for an enclosed, tubular chute or flume where the patron
11	-	tored at the points of entry and exit by qualified operation personnel.
12	shan be mom	tored at the points of entry and exit by quantied operation personnel.
13	4.	The report shall specify the maximum pool loads and the maximum facility
13 14	load.	The report shall speenly the maximum poor loads and the maximum raemty
14	Ioad.	
16	5.	The report shall be accompanied by a facility operation and maintenance
17		includes manufacturer's specifications and recommendations for each
17		arding operation and maintenance of the attraction to include, but not be
18 19	•	0 1
20	limited to, the	following.
20 21		a Annuantista construction drawings
		a. Appropriate construction drawings.b. Maintenance instructions.
22		
23		c. Operation instructions.
24		d. Staffing requirements and procedures.
25		e. Instructional and warning signage.
26	<i>.</i>	
27	6.	Upon completion of the waterpark facility and prior to issuance of the
28		nal or annual permit, an addendum to the report, prepared by a licensed
29	0	l be submitted to the Director. The report addendum shall certify that each
30		been tested under normal operating conditions and found to perform
31	•	The Director may require that the testing procedure be witnessed by one or
32	U	es of the Director. The addendum shall also certify that the waterpark facility
33		ed as detailed in the plans and specifications approved by the Director and
34		h accepted safety engineering practices, industry standards, manufacturer's
35	-	and recommendations, the report described in Sec. 11-11-108-Sec. 11-
36	<u>11.109</u> (D) and	d this Ordinance.
37		
38	(g)	The following specific types of waterpark facility attractions shall comply
39	with the requi	rements indicated:
40		
41	1.	Water chutes or flumes and inner-tube rides shall be provided with:
42		
43		a. Control of unauthorized patron access at entry and exit areas, and points
44	along the attra	action not designed for entry or exit.
45		
46		b. Handrails and non-slip walking surfaces at attraction entry and exit areas.

1 2	c. Attendant stations for patron control that have direct line of sight between		
3	the entry and exit area of each attraction except as provided in Sec. 11-11-108-Sec. 11-		
4	11.109(D)(3)(f). Additional attendant stations may be required by the Director to provide		
5	complete visual coverage of the attraction.		
6			
7	d. An effective internal communication system that allows direct		
8	communication between the attendants stationed at the entry areas, exit areas, and/or		
9	additional locations along the attraction as necessary.		
10			
11	e. All structure supported attractions shall be designed to prevent water		
12	leaks, discharge, and splashout to minimize or eliminate structural deterioration, under		
13	structure erosion, loss of structural support or other safety hazards.		
14			
15	f. Instruments shall be provided to measure the flow of water through each		
16	attraction.		
17			
18	g. Any tethered attractions shall not pose a pinch, puncture, or any other		
19	safety hazard.		
20			
21	2. Receiving pools shall have the minimum clearances detailed in Figure II for		
22	flume or chute entrances into pools. Sufficient distance shall be provided between the		
23 24	flumes or chutes to prevent collision. Receiving pools shall also meet the following		
24 25	requirements:		
23 26	a. The flume or chute sliding surface of waterslides shall end at or below the		
20 27	pool operating water level.		
27	poor operating water level.		
28 29	b. The flume or chute shall be perpendicular to the wall of entry for a		
30	minimum of ten feet.		
31			
32	c. Receiving pools for drop slides shall comply with the manufacturer's		
33	specifications and recommendations.		
34	-r who recommendations.		
35	Figure II: Minimum Clearances for Flume or Chute Entry to Receiving Pools		
36	,		
37	TABLE INSET:		
38			

Value	Minimum Distance	Description
А	5 Feet	Minimum distance from edge of flume to side of pool
В	6 Feet	Minimum distance between edges of parallel flumes
С	20 Feet	Minimum distance from where flume terminates to opposite side of pool

2 (a) Walls of wave pools shall be vertical with a minimum six-inch radius of 3 curvature between the wall and pool bottom. 4 5 (b) Decks shall have a minimum width of ten feet along the shallow end. 6 7 A chainlink fence, or similar restrictive barrier acceptable to the Director, (c) 8 shall be installed to direct patrons to access the wave pool from the shallow area. The fence 9 shall be a minimum of 36 inches in height and at least four feet out from the edge of the 10 coping or pool/deck juncture, and shall be provided adjacent to water depths 24 inches or greater. The fence shall be exclusive of the perimeter fence or barrier. Emergency exit 11 12 openings in the fence or barrier shall be provided at a minimum of one per fifty feet of pool 13 sidewall and shall be a minimum of four feet in width. 14 15 (d) Prominently identified and conspicuously located wave pool emergency cut-16 off switch(es) that terminate wave action shall be provided at each wave pool. One 17 emergency cut-off switch shall be provided for every 100 feet of pool perimeter or fraction thereof. Cut-off switches shall be immediately accessible to each lifeguard. Cut-off 18 19 switches are to be used strictly in the event of an emergency. An "EMERGENCY WAVE 20 CUT-OFF SWITCH" sign shall be posted at the switch, and shall have letters at least four 21 inches in height which are color contrasted with the background color of the sign. The 22 emergency cut-off switch shall not be capable of activating the wave action. 23 24 A public address system shall be provided for use by authorized personnel, (e) 25 which is clearly audible to all areas of the wave pool. 26 27 (f) Pool depths shall be measured without wave action. 28 29 A warning horn and flashing light shall be provided that automatically (g) 30 signals prior to the initiation of wave action. Sufficient time shall be allowed between the 31 warning horn/flashing light and the initiation of wave action to allow patrons the option of 32 leaving the wave pool. 33 34 Slow river attractions shall have a maximum current speed of three miles per 5. 35 hour. 36 37 For activity pools in which climb-on toys and attractions are provided in 6. 38 water depths less than 36 inches, impact absorption materials shall be provided in areas 39 where ejection or falls can reasonably be expected to occur. Impact absorption materials 40 may also be required in other areas of the facility as determined by the Director. 41 42 Sec. 11-11-110 Location. 43 44 The location of a waterpark facility shall in no way hinder the operations for which it 45 is designed nor adversely affect patron safety or water quality. Pools within the waterpark 46 facility shall be greater than fifteen feet from any structure, object, or land formation from

which a patron could jump into a pool unless, at the discretion of the Director, other 1 2 measures have been taken that are sufficient to prevent patrons from jumping from the 3 structure, object, or land formation. The Director has the discretion to determine that the 4 minimum fifteen foot distance requirement does not apply to certain segments of attractions 5 or to barriers provided to prevent unauthorized access to pools. The Director may impose 6 additional access restrictions. 7 8 Sec. 11-11-111 Access. 9 10 Additional emergency access gates and lanes, in excess of those required by Sec. 11-11-28, may be required as determined by the Director to allow immediate access to all areas 11 12 within the waterpark facility. 13 14 Sec. 11-11-112 **Slope of Bottom.** 15 16 The slope of waterpark facility pools shall comply with the requirements specified in 17 Sec. 11-11-32 with the exception of the waterpark facility pools listed below: 18 19 Receiving or exiting pools. The maximum slope shall not exceed 1 to 7 (a) 20 where total water depth is less than 48 inches. 21 22 (b) Activity pools. The maximum slope shall not exceed 1 to 12 up to a water 23 depth of five feet in activity pools where users enter and participate in extended activities. 24 25 (c) Wave Pools. The maximum slope shall not exceed 1 to 12 where water depths range from 0 to 3.5 feet and shall not exceed 1 to 9 where water depths exceed 3.5 26 27 feet. 28 29 Sec. 11-11-113 Handholds and Handrails. 30 31 All pools at waterpark facilities shall be provided with suitable handholds around 32 their perimeter. One handrail for every seven feet, or fraction thereof, of exit area width or 33 perimeter shall be provided at exit steps from receiving pools. 34 35 Handholds may consist of any one or a combination of the following: (a) 36 37 1. Coping, gutter ledges or flanges, or decks which have a top edge that 38 provides a suitable slip resistant handhold located not more than twelve inches above the 39 water line. 40 41 2. Ladders, steps or handrails. 42 43 3. Other methods approved by the Director. 44 45 Sec. 11-11-114 Stairs, Steps and Ladders. 46

1 2	Stairs, steps, and ladders shall be constructed as detailed in <u>Sec. 11-11-36</u> except for the circumstances outlined below.			
3				
4	(a)	The stairs, ramps, and platforms associated with structure supported		
5	attractions shall be designed to provide for the safety of the intended users and shall take			
6	into account th	he following:		
7				
8		avy patron loads.		
9		o hazards.		
10	3. Pro	perly located and sized handrails.		
11				
12	(b)	Wave pools shall be provided with recessed ladders or step holes with		
13	-	bars at water depths greater than $3\frac{1}{2}$ feet, for emergency exit only, spaced at		
14	intervals of no	ot greater than fifty feet.		
15				
16	(c)	Stairs and steps shall be recessed into the pool wall or deck.		
17				
18	(d)	Handrails shall extend over the coping or edge of the deck.		
19				
20	(e)	Ladders or footholds shall be provided to allow patron exit from pools		
21	-	our feet in water depth, except in receiving pools which bring the user toward a		
22	shallow water	depth area after entering the water.		
23	(0)			
24	(f)	A minimum of one exit shall be provided for every fifty feet or fraction		
25	-	I perimeter for pools whose water depth is greater than four feet. At least two		
26	U	ss/ingress shall be provided for each diving area or drop slide receiving pool.		
27	The exits shall	l be arranged to prevent exit paths from crossing slide discharge paths.		
28				
29	(g)	Slow Lazy river attractions shall be provided with properly sized recessed		
30		ampways with handrails. Entry and exit points shall be sufficiently wide to		
31	easily accomm	nodate patrons boarding on or disembarking from flotation devices.		
32	(1)			
33	. ,	Additional handrails at entry and exit areas may be required as determined by		
34 25	the Director.			
35	G., 11 11 11	5 Designal diam Grant and		
36	Sec. 11-11-11	5 Recirculation Systems.		
37	The se	simulation system shall most all of the maninements are sifind in Sec. 11.11		
38		circulation system shall meet all of the requirements specified in <u>Sec. 11-11-</u>		
39 40	<u>57</u> except as s	pecified below:		
40	(a)	The recirculation quoteen for all needs at a maternauly facility, other than these		
41	(a)	The recirculation system for all pools at a waterpark facility, other than those $11, 11, 27$ (D) shall be designed to accommodate the following required		
42	-	ec. <u>11-11-37</u> (B), shall be designed to accommodate the following required		
43 44	maximum turi			
44 45	1 Ch	ildran's Activity Dool, one hour		
43 46	I. UII	ildren's Activity Pool, one hour.		
40				

1	2. Wave pool, two hours.		
2	2. Desciving real that is completely concerts from the main hady of the real has re-		
3	3. Receiving pool that is completely separate from the main body of the pool, has no		
4	more than two attractions, and has a volume of 20,000 gallons or less shall be		
5	provided with a turnover time of one hour. The turnover time may be increased by		
6	one hour for every additional 20,000 gallons of pool volume up to a maximum of		
7	four hours per turnover.		
8			
9	4. All other pools, maximum of four hours.		
10			
11	Sec. 11-11-116 Pumps.		
12			
13	Pumps shall meet the specifications outlined in <u>Sec. 11-11-40</u> (A). Pumps which		
14	drive the water current in slow river attractions shall be designed to produce minimal cross		
15	currents at their suction and discharge points. Propulsion pump water intake pipes shall be		
16	installed in a manner to prevent patron entrapment. The propulsion pump water discharge		
17	shall be uniform and located in a manner to cause minimal effect on the patron. Booster		
18	pumps shall be sized to provide a continuous river-like flow rate no greater than three mph.		
19	The number and size of suction outlets serving the booster pump shall be designed so that		
20	the water flow through each suction outlet does not exceed a velocity of half foot per		
21	second.		
22			
23	Sec. 11-11-117 Overflow Gutters and Skimmers.		
24			
25	Overflow gutters and skimmers shall be provided as specified in <u>Sec. 11-11-45</u>		
26	except that skimmers shall not be used in slow river attractions or any other waterpark		
27	facility pools having currents, moving water, or turbulence created by mechanical means or		
28	gravity that would prevent efficient skimming action by the skimmers. Alternative means of		
29	removing floating debris, which are approved by the Director, shall be provided for such		
30	attractions.		
31			
32	Sec. 11-11-118 Fencing and Barriers.		
33			
34	At intermediate pools, which are pools between the entry and exit pools in		
35	attractions using a series of pools, barriers shall be designed and constructed to prevent		
36	unauthorized entry or access from one attraction to another attraction. Fencing or barriers		
37	shall also be provided to prevent unauthorized access to a pool(s) or attraction which has		
38	designated entry/exit points.		
39			
40	Sec. 11-11-119 Operation and Maintenance.		
41			
42	(a) Waterparks shall be operated and maintained in accordance with the most		
43	restrictive applicable operational standards specified in the following documents:		
44			
45	1. Specifications contained in this Ordinance.		
46			

1	2. AS	STM F-24 "Standards on Amusement Rides and Devices."		
2 3	3. Virginia Amusement Device Regulations."			
4				
5	4. Inc	dustry standards and manufacturer's specifications and recommendations.		
6 7	(b)	Personnel.		
8				
9 10	1. <u>10</u> .	Pool operators shall comply with the requirements specified in Sec. 11-11-		
11	<u>10</u> . 2.	Lifeguards shall meet the requirements specified in Sec. 11-11-63 and		
12	receive training	ng specific to the waterpark facility environment.		
13 14	3.	Attendants shall be trained to operate an attraction and control the patrons in		
15	a safe and ord	1 1		
16				
17 18	Attene waterpark po	dants not certified as lifeguards shall not substitute for lifeguards at any		
19	waterpark po	or or reature.		
20	(c)	Safety.		
21 22	1.	For all attractions with flumes or chutes, clearing of the receiving pool entry		
23		allowing another patron to enter is required.		
24				
25 26	2. swimming ab	Use of certain waterpark facility pools may be limited by an individual's ility. Other restrictions may be imposed as necessary.		
20 27	swinning do	mity. Other restrictions may be imposed as necessary.		
28	. 3.	Attendant and lifeguard stations shall be manned at all times that an		
29 30	attraction is in	n use.		
31	4.	U.S. Coast Guard approved personal floatation devices shall be readily		
32	available and	accessible for those patrons that choose to use them.		
33 34	5.	Outdoor waterpark facilities and indoor waterpark facilities with windows		
35		he facility shall close for 30 minutes following thunder or lightning.		
36	(1)			
37 38	(d)	Design Load.		
39	Indivi	dual pool loads and the maximum facility load shall be determined by the		
40		n consideration of <u>Sec. 11-11-108-Sec. 11-11.109</u> (D)4). At no time shall the		
41 42		aximum pool load or the maximum facility load be exceeded. The maximum and the maximum pool loads shall be posted at the main entrance to the		
43		cility. The waterpark facility pool operator shall be responsible for enforcing		
44		n facility load and maximum pool loads.		
45				

1	1.	The maximum pool loads and the maximum facility loads may be
2	additionally re	estricted due to the following conditions:
3		
4		a. A congested grouping of patrons, tubes or floatation devices or any other
5		grouping that obstructs the lifeguard's view of the pool bottom.
6		
7		b. Other conditions which may compromise the health or safety of the
8		patrons.
9	(-)	
10	(e)	Additional operational procedures.
11	1	
12	1.	Pool operators shall monitor the water flow rates through flume and
13		nsure that a constant water flow is maintained at rates in accordance with
14	manufacturers	s specifications and recommendations.
15	2	
16	2.	The facility operation and maintenance manual specified in $\frac{\text{Sec. 11-11-108}}{\text{Sec. 11-11-108}}$
17		$\frac{9}{(D)}(5)$, shall be maintained at the waterpark facility and be available for
18	inspection at a	Il times.
19		
20	3.	No chemical other than those specified in Sec. 11-11-69 (a) shall be used to
21	treat the water	without written authorization from the Director.
22		
23	4.	Chemical water quality standards shall comply with Sec. 11-11-103 Table
24	<u>IV.</u>	
25	G 44 44 44	
26	Sec. 11-11-12	0 Ventilation in Indoor Waterpark Facilities.
27	T 1	
28		waterpark facilities shall be equipped with mechanical ventilation that
29		.5 cfm of outdoor air per square feet of pool and deck area. The Director may
30	-	onal ventilation for indoor waterpark facilities with features that tend to create
31	water aerosols	•
32		
33	Sec. 11-11-12	1 Secondary Disinfection.
34		
35		irector may require facilities with features that tend to create water mist or
36	spray water ae	prosols to employ a secondary disinfection method.
37		
38	Sec. 11-11-12	2 Water Contamination.
39		
40		troduction of body wastes, including sputum or vomitus, into a Waterpark is
41	-	waterpark facility contaminated by human feces or vomit shall be closed
42	immediately a	nd procedures for clean up in Sec. 11-11-66 (B) followed.
43		
44	Sec. 11-11-12	3 Deck Contamination.
45		

1	(a) In the event that body fluids such as blood, vomit, or feces contaminate the		
2	deck, follow the procedures indicated in Sec. 11-11-67(A).		
3			
4	(b) In the event that vomitus or fecal contaminating the deck enters the pool, the		
5	operator shall follow the procedures indicated in Sec. 11-11-66(B).		
6			
7 8	ARTICLE G: Interactive Water Feature Facilities		
9 10	Sec. 11-11- <u>122</u> <u>124</u> Water Depth.		
11	The depth of water in an interactive water feature facility shall not exceed one inch		
12	at any point accessible to the public.		
13			
14	Sec. 11-11-123-125 Walking Surfaces.		
15			
16	(a) The walking surfaces of an interactive water feature facility shall be		
17	constructed of a non-porous, non-slip material.		
18			
19	(b) The walking surfaces of an interactive water feature facility shall be		
20	constructed so as to eliminate trip and fall hazards.		
21			
22	(c) The walking surfaces of an interactive water feature facility shall be		
23	maintained so as to prevent the accumulation of algae or any other slippery substance.		
24			
25	(d) Any time the temperature of the walking surface(s) of an interactive water facility is any distant to the facility 40%		
26	feature facility is predicted to drop below 40°F, the pumps circulating water to the facility		
27 28	shall be shut off and the walking surface allowed to dry.		
28 29	(e) Should ice or frost form on the walking surface(s) of an interactive water		
30	feature facility, barriers shall be erected to prevent the public from entering the area of the		
31	facility.		
32	nuonny.		
33	Sec. 11-11-124 126 Recirculation System.		
34			
35	(a) Water from the interactive water feature facilities shall be collected by		
36	gravity below grade in a collector tank or sump. The water shall then be filtered,		
37	disinfected, and then pumped to the feature discharge points. All interactive water feature		
38	facilities shall be equipped with a recirculation system which, at a minimum, consists of a		
39	pump, a filter, connecting piping, fittings, valves, disinfecting equipment, necessary pipe		
40	connections to the inlets and outlets, and drains.		
41			
42	(b) The water in an interactive water feature facility shall be re-circulated,		
43	filtered, and treated at least once every thirty minutes. The water disinfection equipment		
44	requirements contained in Sec. 11-11-49 and the water treatment and testing equipment		
45	requirements contained in Sec. 11-11-69 shall be met.		
46			

1	(c) Adequate provisions shall be made for backwashing and/or cleaning of all			
2	filters.			
3				
4	(d) If a pool operator will not be on-site at all times the facility is in operation,			
5	the water feature recirculation system shall be designed with a turn-off system that will shut			
6	off the water feature if the water quality parameters are outside the requirements in Sec. 11-			
7	11-69.			
8				
9	Sec. 11-11- <u>125-127</u> Filter Room.			
10				
11	The filter room for an interactive water feature facility shall meet the requirements			
12	contained in <u>Sec. 11-11-38</u> .			
13				
14	Sec. 11-11- <u>126</u> <u>128</u> Filters and Gauges.			
15				
16	The recirculation system for an interactive water feature facility shall meet the			
17	requirements contained in Sec. 11-11-39.			
18				
19	Sec. 11-11- <u>127</u> <u>129</u> Pumps and Strainers.			
20	Sec. 11-11- $\frac{127}{127}$ 1 umps and Stramers.			
	(a) D_{umn} A removable and rejectallable $p_{umn}(c)$ shall be installed with			
21	(a) <i>Pump</i> . A removable and reinstallable pump(s) shall be installed with			
22	adequate capacity for the required turnover time. Whenever possible, the pump(s) shall be			
23	so located as to eliminate the need for priming. If the pump(s) or suction piping is located			
24	above the level of the interactive water feature's surface, the pump(s) shall be self-priming.			
25	The pump(s) shall be capable of providing a flow adequate for the backwashing of filters.			
26	Pumps shall be securely supported.			
27				
28	(b) <i>Strainer</i> . All pressure filter systems shall have a strainer. The strainer			
29	baskets shall be corrosion resistant with openings not exceeding 1/8 inch in size, which			
30	provide a free flow area of at least four times the area of the pump suction line at the strainer			
31	connection, and shall be accessible for frequent cleaning. An extra strainer basket shall be			
32	provided for each strainer.			
33	provided for each strainer.			
34	Sec. 11-11- <u>128</u> <u>130</u> Piping System.			
35	Sec. 11-11- $\frac{120}{150}$ I iping System.			
	(a) The giving system for interactive system for the formalities shall be some and			
36	(a) The piping system for interactive water feature facilities shall be composed			
37	of NSF listed materials or their equivalent designed for the following operations:			
38				
39	1. circulating water to the interactive water feature,			
40	2. collecting and re-circulating the water through the treatment equipment,			
41	3. backwashing or washing each filter to waste, and			
42	4. draining the system.			
43				
44	(b) There shall be no direct connections between the recirculation system and the			
45	sewer or potable water supply.			
46				

1 The system shall have a means of discharging filter backwash or other water (c) 2 to waste as follows: 3 4 1. Waste from backwashing or draining shall be discharged in a manner 5 approved by the Director. When only a sanitary sewer is available, the rate of discharge is 6 subject to the approval of the appropriate authority for sanitary sewers and treatment 7 facilities. 8 9 2. An air gap to prevent a cross-connection between waste discharge piping and 10 recirculation piping shall be provided. 11 12 Discharge receptor and piping of sufficient size to accept backwash water 3. 13 and prevent backflooding. 14 15 4. A sight glass in the backwash discharge line in a readily observable location. 16 17 5. In the event the backwash waste pipe will not accommodate the backwash flow, the design and installation of a holding tank shall be required. The holding tank shall 18 19 be sized to contain 110 percent of the volume of water required to adequately clean the 20 filter(s) at the backwash flow rate and length of time specified by the filter manufacturer. 21 22 The piping system shall be securely anchored, supported or braced, unless (d) 23 inherently self-supporting. Visible piping shall be marked with permanent tags, labels or 24 markings to clearly identify the direction of flow and shall be color coded as follows: 25 26 1. Freshwater blue (to check valve) 27 2. Backwash black 28 3. Influent vellow 29 4. Effluent white 30 31 All piping shall be designed to minimize friction losses and to carry the (e) 32 required quantity of water at a velocity not to exceed eight feet per second for copper 33 discharge piping, and ten feet per second for discharge piping other than copper. Suction 34 velocity for all piping shall not exceed six feet per second. Pipe suction velocity may also 35 be limited by the maximum flow rate specified by the manufacturer of the suction outlet 36 covers installed. 37 38 All piping and appurtenances included in the recirculation and filtration (f) 39 system shall be inspected and approved by the Director prior to covering. All piping shall 40 be tested at the time of inspection to at least 25 psi of pressure. All subsurface piping shall 41 be imbedded in and covered with sand or an approved equivalent. 42 43 (g) All valves shall be clearly identified with permanent markings or tags which 44 are referenced by a water recirculation system operation manual and/or placard. 45 46 Sec. 11-11-129-131 Drains.

1			
2	Any drains or suction outlets shall comply with Sec. 11-11-42(A) and shall be		
3	covered with a protective grate or anti-vortex cover which is not hazardous to patrons, is		
4	anchored in accordance with the manufacturer's specifications and recommendations, and is		
5	designed to prevent body entrapment or injury.		
6	See 11 11 120 122 Decl On materi		
7 8	Sec. 11-11-130 132 Pool Operator.		
9	All interactive water feature facilities must be operated under the immediate control		
10	All interactive water feature facilities must be operated under the immediate control of a pool operator holding a valid pool operators certificate. An operator is not required by		
11	this section to be present at the interactive water feature facility at all times, but must be		
12	immediately available to the facility in case of emergency.		
13	g		
14	Sec. 11-11-133 Water treatment and Test Equipment.		
15			
16	The Director may require facilities with features that create mist or spray to employ		
17	a secondary disinfection method. No chemical other than those specified in Sec. 11-11-69		
18	(a) shall be used to treat the water without written authorization from the Director.		
19	Chemical water Quality Standards shall comply with Sec. 11-11-103 Table IV.		
20			
21	Sec. 11-11-134 Water Contamination.		
22			
23	The introduction of body wastes, including sputum or vomitus, into a Waterpark is		
24	prohibited. A waterpark facility contaminated by human feces or vomit shall be closed		
25	immediately and procedures for clean up in Sec. 11-11-66 (B) followed.		
26			
27	Sec. 11-11-135 Deck Contamination.		
28	(a) In the event that had a fluids such as blood warrit on faces contaminate the		
29	(a) In the event that body fluids such as blood, vomit, or feces contaminate the deals follows the proceedures indicated in Sec. 11, 11, $(7(A))$		
30	deck, follow the procedures indicated in Sec. 11-11-67(A).		
31 32	(b) In the event that venitus or feed conteminating the deals enters the need the		
32 33	(b) In the event that vomitus or fecal contaminating the deck enters the pool, the		
33 34	operator shall follow the procedures indicated in Sec. 11-11-66(B).		
34 35	APTICLE H: Bathhouse Facilities: Design Construction and Maintenance		
36	ARTICLE H: Bathhouse Facilities; Design, Construction, and Maintenance		
30 37	Sec. 11-11-131-136 Establishments Required to Provide Bathhouse Facilities.		
38	See 11-11-151 150 Establishments Required to 110 vide Datimouse 1 activities.		
39	All aquatic facilities, except interactive water feature facilities, shall provide		
40	bathhouse facilities. Motels and other similar establishments which restrict the use of all		
41	pools to occupant guests are not required to provide bathhouse facilities. Interactive Water		
42	Feature Facilities are required to comply with Sec 11-11-140 (B); 11-11-141 (B); 11-11-		
43	<u>142 (B); 11-11-143 (B)</u>		
44			
45	Sec. 11-11-132-137 Design and Location.		
46	0		

The bathhouse shall be designed so that patrons pass through the rooms containing the dressing areas, showers and toilet fixtures prior to accessing the pool. It shall be provided with an entrance and a separate exit opening directly to the swimming pool, spa pool, or waterpark facility deck; provided, however, the exit shall not be near the deep portion of a swimming pool when the pool depth is greater than five feet.

7 8 Sec. 11-11-133 138 Floors.

Floors for all showers, toilets and lavatories in a bathhouse shall have a minimum
slope of 1 to 48 to the drains with no low spots which will allow water to pond. Such floors
shall have a smooth but non-slip, non-absorbent, finish and shall not be carpeted and shall
be maintained in a clean and sanitary condition. The room shall be mechanically ventilated.

13 14

19

21

14 15

Dressing Rooms.

Separate dressing rooms shall be provided for each sex. Dressing rooms shall be
maintained in a clean and sanitary condition. Clothing hooks shall not present a puncture
hazard to patrons.

20 Sec. 11-11-135 140 Showers.

Sec. 11-11-134-139

22 (a) Showers shall be provided in the proportion of one per each forty persons or 23 fraction thereof at each swimming pool, spa pool, or waterpark facility based upon the 24 maximum facility load. Each shower shall supply an adequate quantity of heated water 25 through a device that will prevent scalding. The device that prevents scalding shall be adjusted to provide a maximum hot water temperature at the nozzle head of 110 degrees 26 27 Fahrenheit, and a minimum hot water temperature at the nozzle head of at least 90 degrees 28 Fahrenheit. Water from each shower shall drain separately or each shower shall be located 29 and have the floor sloped so that waste from one shower shall not flow over the floor 30 serving another. Each shower fixture shall be provided with a liquid soap dispenser and an 31 adequate supply of liquid soap. Showers shall be maintained in a clean and sanitary 32 condition. 33

34 (b) Interactive Water Feature Facilities are required to provide a foot shower within
 35 30 feet of the spray pad. The foot shower shall be maintained in a clean and sanitary
 36 condition.

37

38 39 Sec. 11-11-136-141 Toilets and Urinals Diaper Changing Facilities.

40
41 (a) Diaper changing facilities shall be provided in each restroom that opens onto the pool deck (pool restrooms). For facilities that do not have restrooms that open
43 onto the pool deck, the diaper changing facilities shall be provided in each mens', ladies' and unisex restroom located closest to the pool.
45

1			
1	(b) <u>Interactive water features facilities shall provide at least one diaper changing</u>		
2	facility in each toilet facility provided.		
3	Tailet facilities shall be married din the numbers required by the WUCDC at the time		
4	Toilet facilities shall be provided in the numbers required by the VUSBC at the time		
5	of maximum facility usage. Computations shall be based on the premise that at the time of		
6	maximum load half of the patrons will be male and half female unless the facility is		
7 8	exclusively to be used by patrons of one sex. An adequate supply of dispensed toilet paper shall be provided to each water elegent. Toilets and wingels shall be maintained in a clean and		
o 9	shall be provided to each water closet. Toilets and urinals shall be maintained in a clean and		
9 10	sanitary condition.		
10	Sec. 11-11-137-142 Lavatories Toilets and Urinals.		
11	Sec. 11-11- $\frac{137}{142}$ = $\frac{142}{142}$ = $1000000000000000000000000000000000000$		
12	(a) Toilet facilities shall be provided in the numbers required by the VUSBC at the		
13 14	time of maximum facility usage. Computations shall be based on the premise		
14	that at the time of maximum load half of the patrons will be male and half female		
16	unless the facility is exclusively to be used by patrons of one sex. An adequate		
17	supply of dispensed toilet paper shall be provided to each water closet. Toilets		
18	and urinals shall be maintained in a clean and sanitary condition.		
19	and drinkis shar be maintained in a crean and saintary condition.		
20	(b) Interactive water features shall provide at least one toilet facility within 500 feet		
21	of the feature. This facility may be temporary or seasonal in nature, or of		
22	permanent construction. An adequate supply of dispensed toilet paper shall be		
23	provided to each water closet. Toilets and urinals shall be maintained in a clean		
24	and sanitary condition.		
25			
26	Lavatories shall be provided in the numbers required by the VUSBC at the time of		
27	maximum facility usage. Each lavatory shall be provided with a liquid soap dispenser and		
28	an adequate supply of liquid soap. Each lavatory shall be provided with an adequate supply		
29	of dispensed paper towels and/or a mechanical means of hand drying. Lavatories shall be		
30	maintained in a clean and sanitary condition.		
31	·		
32	Sec. 11-11-138-143 Hose Bibs and Cleaning Equipment Lavatories.		
33			
34	(a) Lavatories shall be provided in the numbers required by the VUSBC at the time		
35	of maximum facility usage. Each lavatory shall be provided with a liquid soap		
36	dispenser and an adequate supply of liquid soap. Each lavatory shall be provided		
37	with an adequate supply of dispensed paper towels and/or a mechanical means of		
38	hand drying. Lavatories shall be maintained in a clean and sanitary condition.		
39			
40	(b) Interactive water features shall provide at least one lavatory adjacent to or within		
41	each toilet facility provided. Each lavatory shall be provided with a liquid soap		
42	dispenser and an adequate supply of liquid soap. Each lavatory shall be provided		
43	with an adequate supply of dispensed paper towels and/or a mechanical means of		
44	hand drying. Lavatories shall be maintained in a clean and sanitary condition.		
45			

1	Hose bibs with vacuum breakers or approved backflow preventers shall be provided		
2	at convenient locations. A minimum of one hose bib shall be provided in both the female		
3	and male sections of the bathhouse. Hoses, brushes and other cleaning equipment as needed		
4	to maintain the bathhouse facility shall be kept stored in the bathhouse facility.		
5			
6	Sec. 11-11-139-144 Lighting Hose Bibs and Cleaning Equipment.		
7			
8	Hose bibs with vacuum breakers or approved backflow preventers shall be provided		
9	at convenient locations. A minimum of one hose bib shall be provided in both the female		
10	and male sections of the bathhouse. Hoses, brushes and other cleaning equipment as needed		
11	to maintain the bathhouse facility shall be kept stored in the bathhouse facility.		
12			
13			
14	All areas within the bathhouse facility shall be illuminated at a minimum of thirty		
15	foot candles measured 24 inches above the floor. All light fixtures shall be shielded.		
16			
17	Sec. 11-11-140-145 Saunas and Steam Rooms Lighting.		
18			
19	All areas within the bathhouse facility shall be illuminated at a minimum of thirty		
20	foot-candles measured 24 inches above the floor. All light fixtures shall be shielded.		
21			
22			
23	A sauna, steam room, or similar device in which the patron's body is exposed to		
24	water, steam, moist or dry heat, that is provided in conjunction with a regulated swimming		
25	pool or spa pool facility, shall be installed in accordance with the requirements of the		
26	VUSBC, and shall be maintained in a clean and sanitary condition; and shall comply with		
27	the following requirements:		
28			
29	(a) Shielded, vapor proof lighting fixtures shall be provided.		
30			
31	(b) Adequate mechanical ventilation shall be provided.		
32			
33	(c) The doors to all steam rooms and sauna rooms shall have viewing ports fitted		
34	with shatterproof glass or plastic, and shall not be capable of being blocked or otherwise		
35	secured against opening by pushing from the inside. The door to the sauna or steam room		
36	shall open outward.		
37			
38	(d) A timer switch that automatically shuts off the heat or steam source. The		
39	timer switch shall be readily accessible to patrons and be located directly adjacent to the		
40	sauna or steam room and shall have a maximum setting which does not exceed fifteen		
41	minutes.		
42			
43	(e) A suitable barrier shall be provided to prevent patron injury from the heating		
44	element or unit.		
45			

(f) Bench surfaces shall be of a smooth finish and free of protrusions that could		
cause injury to patrons.		
	(g) A sign shall be posted stating that users must shower prior to enter	ing the
pool.
