# Commute Day 1

MAY 28, 2019

# Morning Travel Times

- Traffic patterns were typical on **King Street** westbound between the King Street Metrorail station and I-395.
- In Alexandria, travel times were between **20% and 30% higher** than last week on **Washington Street, Route 1 and North Van Dorn** in the morning.
- **Weather** and a **crash** on the 14<sup>th</sup> Street Bridge contributed to traffic backups

Project

# Metrorail Stations & Shuttles

- The **Van Dorn**, **King Street** and **Eisenhower** Metrorail Stations had moderate wait times and little to no crowding.
- During the morning peak hour, **Braddock Road** experienced mid-level queuing with most passengers accommodated on the arriving shuttle. Bus bunching was an issue today with a longer than planned gap and then two shuttles arriving at the same time.

# By the Numbers

---

- 84 passengers used the **Water Taxi** during the AM commute period
- 140 parking permits issued at **Landmark Mall**
- WMATA added 9 **additional buses** to cover capacity
- 44 **parking citations**
- Approximately 2,200 riders on the **Blue line** during the morning commute

# Thank you
