

#### **Green Building Policy**

City Council

June 22, 2019

#### **Green Building Policy Timeline**

# Increased minimum certification for DSP and DSUP proposals

## Public Development:

LEED Gold

- Three Green Globes
- Earthcraft:
  - Light Commercial Gold

### Private Development:

LEED Silver

Two Green Globes

- Earthcraft:
  - Multifamily Gold
  - Light Commercial Certified

## **Priority Performance Points for Certification**

#### **Energy Use**

- EUI reduction
- Renewable Energy
- Advanced Metering
- Enhanced
  Commissioning

#### **Water Efficiency**

- Indoor Water Use Reduction
- Outdoor Water
  Use Reduction

#### Indoor Environmental Quality

- Lowemitting/low-VOC materials
- Daylighting
- Thermal Comfort
- Indoor Air Quality

## **Enhanced Public Development Standards**

#### **DSP/DSUPs:**

 Stormwater: 100% treatment with green infrastructure

Energy: Net Zero Energy standard

#### Existing Building Renovations (non-DSP/DSUPs):

- LEED Interior Design and Construction (ID+C)
- LEED Operations and Maintenance (O&M)

#### **Flexibility**

Inherently flexible with three defined rating system standards

Considered on a case-by-case basis:

- Project size
- Proposed use
- Alternate green building practices proposed

#### **Estimated Impacts and Benefits**

20% reduction in energy use

3% reduction of City greenhouse gas emissions

29% reduction in water use

Improved human health and quality of life

# Alexandria at the Forefront for Green Building

- Competitive certification levels
- Directed use credits that target priority areas
- Defined alternatives to LEED through Green Globes and EarthCraft
- Rating systems are tailored to meet Alexandria's environmental goals

#### Planning Commission Recommends Approval

## With amendments to the Policy statement for:

- Net-Zero Energy flexibility criteria
- Net-Zero Energy definition

- 95% of square footage under construction or completed is in compliance with 2009 Green Building Policy – 111 projects approved
- 11 of the total projects approved were Development Site Plans (DSP)
  - 8 DSPs were small projects (less than 75,000 SF or fewer than 50 residential units) and complied with the Policy
  - 2 DSP projects requested flexibility:
    - < 3,000 retail building</li>
    - 9,500 sf church expansion
    - Strived for points without actual certification

# E ALEXADER AND RESTRICTION OF THE PROPERTY OF

### Environmental Action Plan (EAP) Short-Term Action implemented by the Green Building Task Force

- \*Strategy A: Increasing LEED or equivalent third-party green building certification standards for private development.
- \*Strategy B: Establishing a green building standard for new public development at a higher level than required for private development. Evaluating the feasibility of a net zero standard for new public development, including schools.
- \*Strategy C: Establishing incentives for private development participation in green building certifications.
- \*Strategy D: Prioritizing specific green building standards in private development projects.
- \*Strategy E: Introducing mandatory and/or voluntary green building practices for existing buildings not subject to site plan review.
- **Strategy F:** Instituting a building performance monitoring program.
- **Strategy G:** Establishing a Green Zone in the City.
- \*Additional Task Force Strategies: Establish a Green Building Code, include Health and Wellness certification
