

Dockless Mobility Pilot Update

City Council
October 2, 2019

Program Update

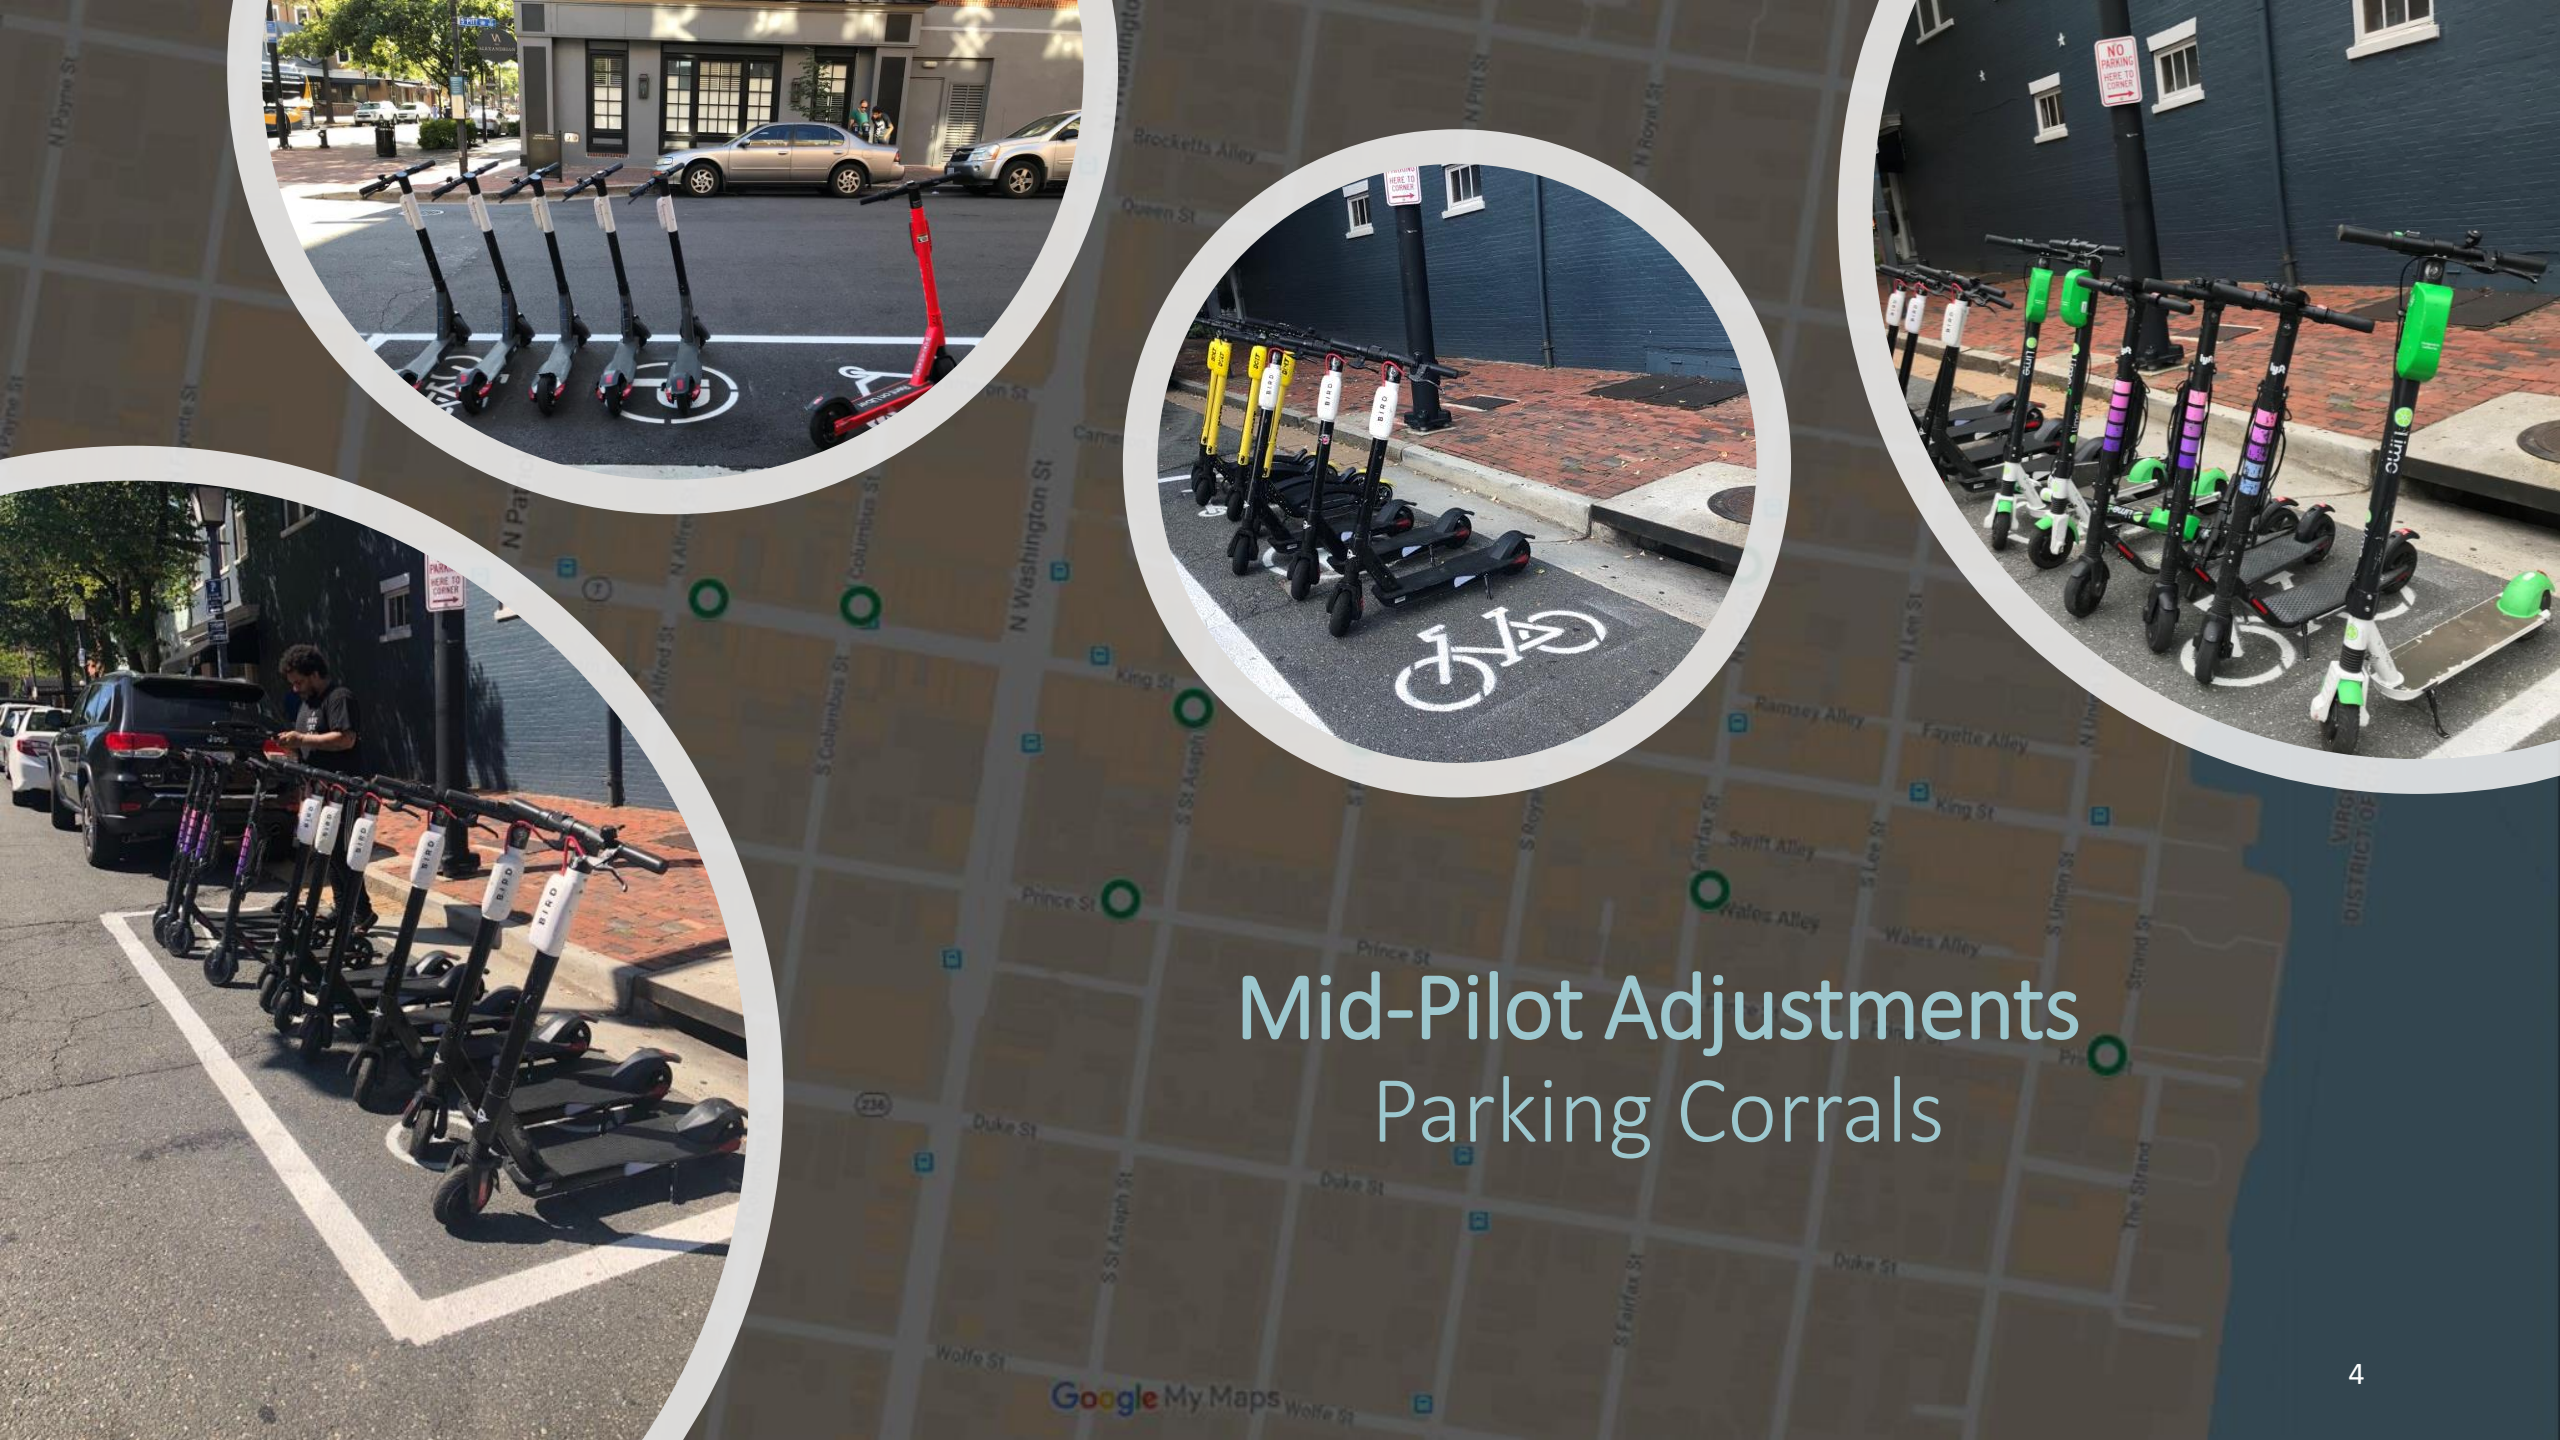

- Pilot was extended in order to draft a recommendation based on:
 - Community input
 - Leading practice research
 - Coordination with other jurisdictions
 - Data evaluation
- Vendors required to pay additional \$5,000 for 3-month extension

Key Data Findings

Key Data Points	January	February	March	April	May	June	July	August	TOTAL
Total Number of Trips	1,590	3,501	14,704	39,012	40,048	32,968	34,344	35,173	201,340
Total Active Users in all Apps	798	1,949	6,696	14,904	16,515	14,973	28,579	30,096	114,510
Total Trip Distance (in miles)	1,477	3,593	10,049	38,638	36,378	29,268	44,457	31,188	195,017
Average Scooter Availability	30	177	370	756	782	475	462	341	

- Average trip distance is about 1 mile
- Average trip duration is about 14 minutes
- Average cost per trip is about \$4.20

Mid-Pilot Adjustments Parking Corrals

GUIDE TO RIDE SCOOTERS IN ALEXANDRIA, VA

#1 HOW TO RIDE

Follow all applicable traffic laws. That means:

- Stopping at red and stop signs
- Yielding to pedestrians
- Riding in the same direction as traffic

#2 WHERE TO RIDE

Don't ride on
sidewalks!

#3 WHERE TO PARK

- ✓ Scooter parking zones
- ✓ "Furniture zone" (street lamps, bike racks)
- ✗ Blocking pedestrians or sidewalks
- ✗ Blocking driveways or vehicle travel lanes
- ✗ Blocking fire hydrants or on private property

#4 WHAT TO WEAR

Scooter companies' user agreements
require wearing a helmet. Do not wear
headphones in both ears.

#5 HOW TO GET STARTED

NEED HELP IN THE CASE OF AN EMERGENCY, CALL

TO REPORT
INCORRECTLY PARKED
SCOOTERS OR
OTHER CONCERNS,
CONTACT THE OPERATORS

SPIN (ORANGE & BLACK)

Mid-Pilot Adjustments

- Geofencing No-Park Zones
- Scooter hang-tags

Community Input

Takeaways from the Feedback Form

- Total Responses: 2,914 (38% have ridden a scooter)
- Of scooter riders:
 - If there were no scooters in Alexandria, **47% would have used a personal vehicle** or Uber/Lyft/taxi to take most of these trips
 - 26% most frequently ride in a bike lane and **53% would *prefer* to ride in a bike lane**
 - **67%** agreed that scooters have **decreased their need for parking**
 - **60%** agreed that scooters have **increased their access to public transportation**
 - **85%** agreed that scooters are **convenient, easy, fun to ride**
- Top changes to management (all respondents):
 - **Enforcement** of traffic rules for scooter riders
 - Banning parking and riding in certain areas
 - Providing more **dedicated space** for parking scooters off sidewalks

Recommendations for Program

Approve Phase II Pilot through December 2020

- Gives the City the ability to manage the program and set regulations for operators
- Companies still operating in region and crossing borders

Application and Permit Requirement

- Strict MOU which all vendors must comply to receive a permit to operate
- Higher permit fees to cover actual cost of management of program
 - Likely reduction in number of operators

Changes from Existing Pilot

Riding / User behavior

- Sidewalks: Scooters permitted on sidewalks unless explicitly banned (same as bikes)
- Speed limits: 15 mph on streets, 6 or 8 mph on sidewalks or in "slow zones"
- Limit only one rider per device

Education and Outreach

- City Manager appointed Ad-Hoc Scooter Task Force for duration of Phase II pilot
- Require in-app safety messaging, rules of the road and sidewalk riding and parking messaging

Changes from Existing Pilot

Operator / Device Requirements

- Performance Measures: Tracking data compliance and integrity, quality of customer service and response times, etc.
- Data: Require MDS feed or some other more detailed compliant information
- Parking: Require deployment in parking corrals if existing
- Fleet size: Minimum and maximum with dynamic fleet caps
- Devices: Require speedometers, braille, QR codes, etc.
- Equity: requirements for deployment/rebalancing in different neighborhoods
 - Require participation in income-based discount programs

Enforcement

Changes to City Code

- Define e-scooters and other micro-mobility
- Ban e-scooters from sidewalks where bikes are currently banned
- Require helmets on riders 14 year or younger
- Require only one rider per device
- Create speed limit for sidewalk riding (6 or 8 mph)

During Phase II Pilot

Staff will Evaluate/Identify:

- Equity zones
- Streamlined “reporting” process (311 auto-rerouting)
- Additional parking corral locations
- Permanent program structure & requirement
- Income-based discount programs
- Regional Coordination
- Mechanisms for greater enforcement

Community Engagement:

- Convene an Ad Hoc “shared mobility Task Force”
- Pop-up events
- Community feedback forms

Final Report to Include

Report Category	Content
Leading Practices	<ul style="list-style-type: none">• Review of NACTO scooter guidelines and recommendations• Local jurisdictions consideration (Arlington County, D.C., etc.)• Lessons learned from other cities
Community Engagement	<ul style="list-style-type: none">• Feedback Form analysis• Dockless.mobility@alexandriava.gov email address comments• Feedback from Scooter Education Outreach Events & focus groups
Data Analysis & Findings	<ul style="list-style-type: none">• Reporting key metrics set by MOU• Analysis of trip start/end point and crash data• Equity analysis and impacts on ADA/disabled community• Review of local and state laws
Recommendations	<ul style="list-style-type: none">• Recommendations by type (user behavior/unsafe riding, parking, operator/device, administrative/program management) and by source (Leading Practices, Community Engagement, Data Analysis)
Next Steps / Looking Ahead	<ul style="list-style-type: none">• Recommendations for changes from Phase I to Phase II• Staff considerations during Phase II

Timeline and Next Steps
